

Overview · One spine, two tracks, three switchbacks; seven stitches; ten K–marks

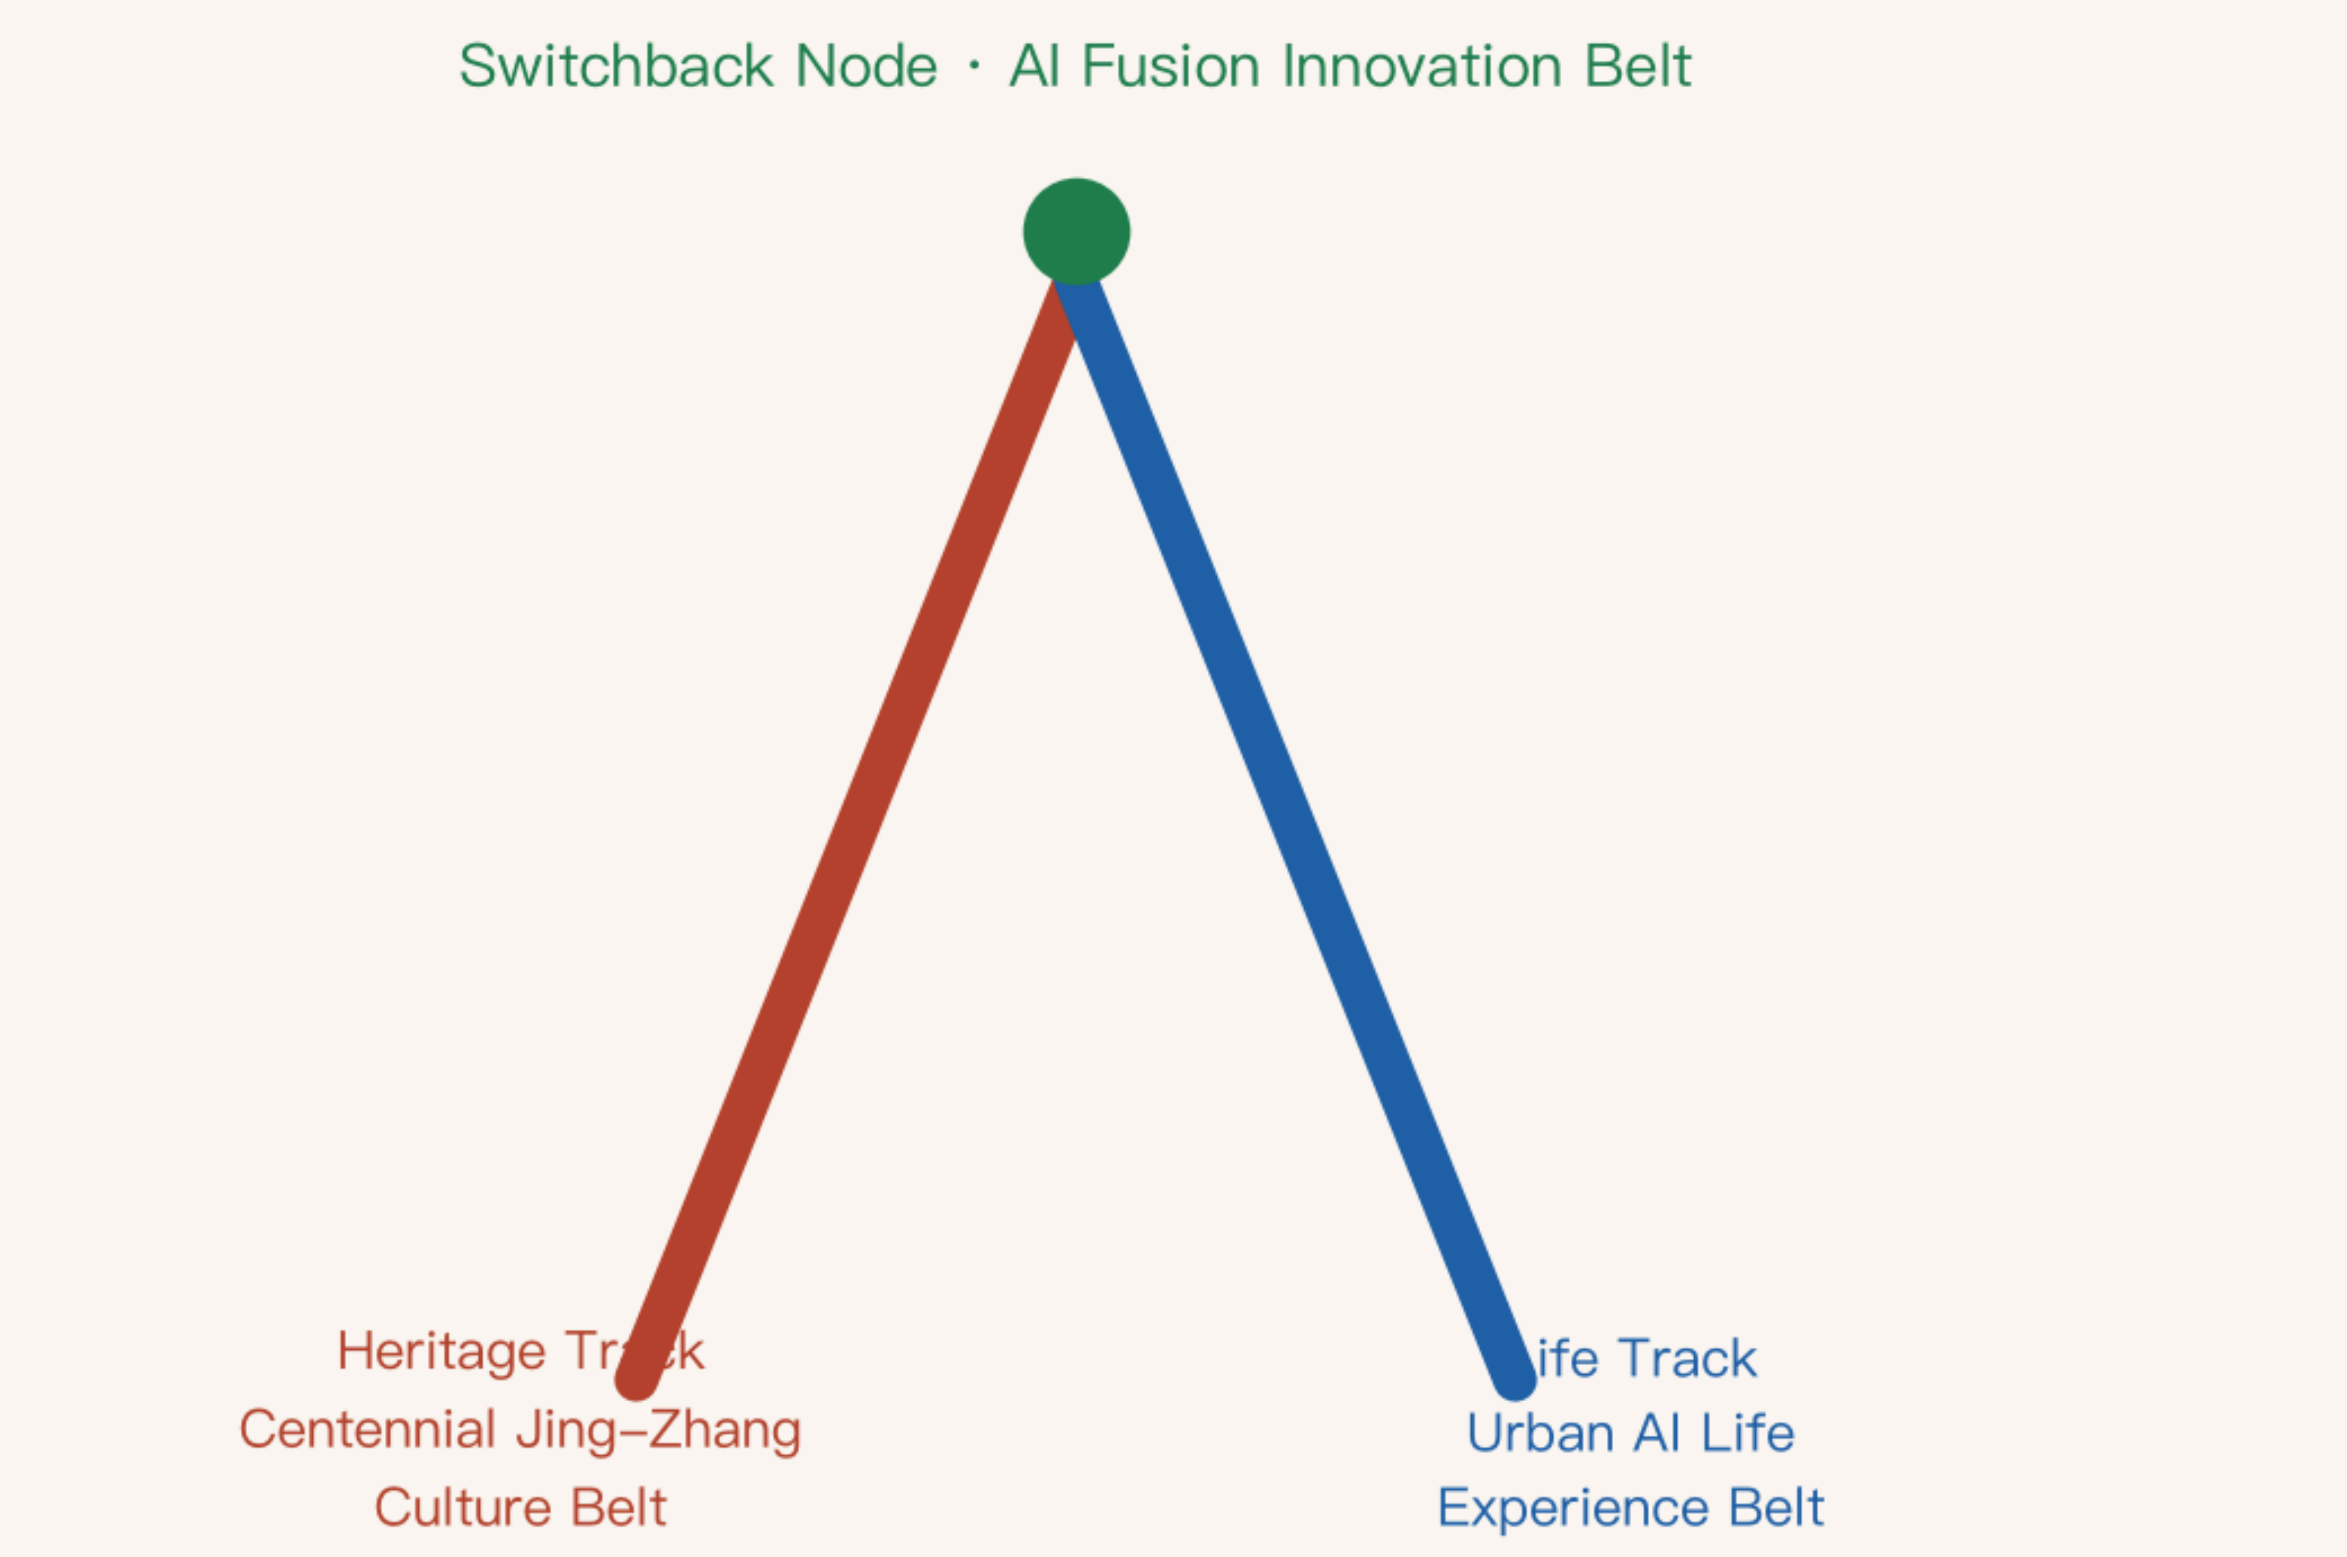

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

Spine: the Jing-Zhang Heritage Park green corridor (~160 m wide). Tracks: R&D Track (west) × Life Track (east). Switchbacks: Bell Station (Dazhongsi) / Origin Station K0 / Summit Station (Zhongzhiyuan). Seven east-west stitching streets mend the century-old severance; ten K-mark waypoints line the spine. The switchback climbs by iteration (Switchback → Backprop); the character 人 means a human-centered AI district.

The Jing–Zhang AI Switchback — Climb by Iteration

The switchback climbs by iteration
From Switchback to Backprop

- Spine** Jing–Zhang Heritage Park green spine, ~160 m wide
- Tracks** R&D Track (west) × Life Track (east)
- Switchbacks** Bell Stn (Dazhongsi) · Origin K0 · Summit Stn
- 7 Stitches** seven E–W stitching streets mend the severance
- 10 Waypoints** K0–K9 milestone scenario nodes

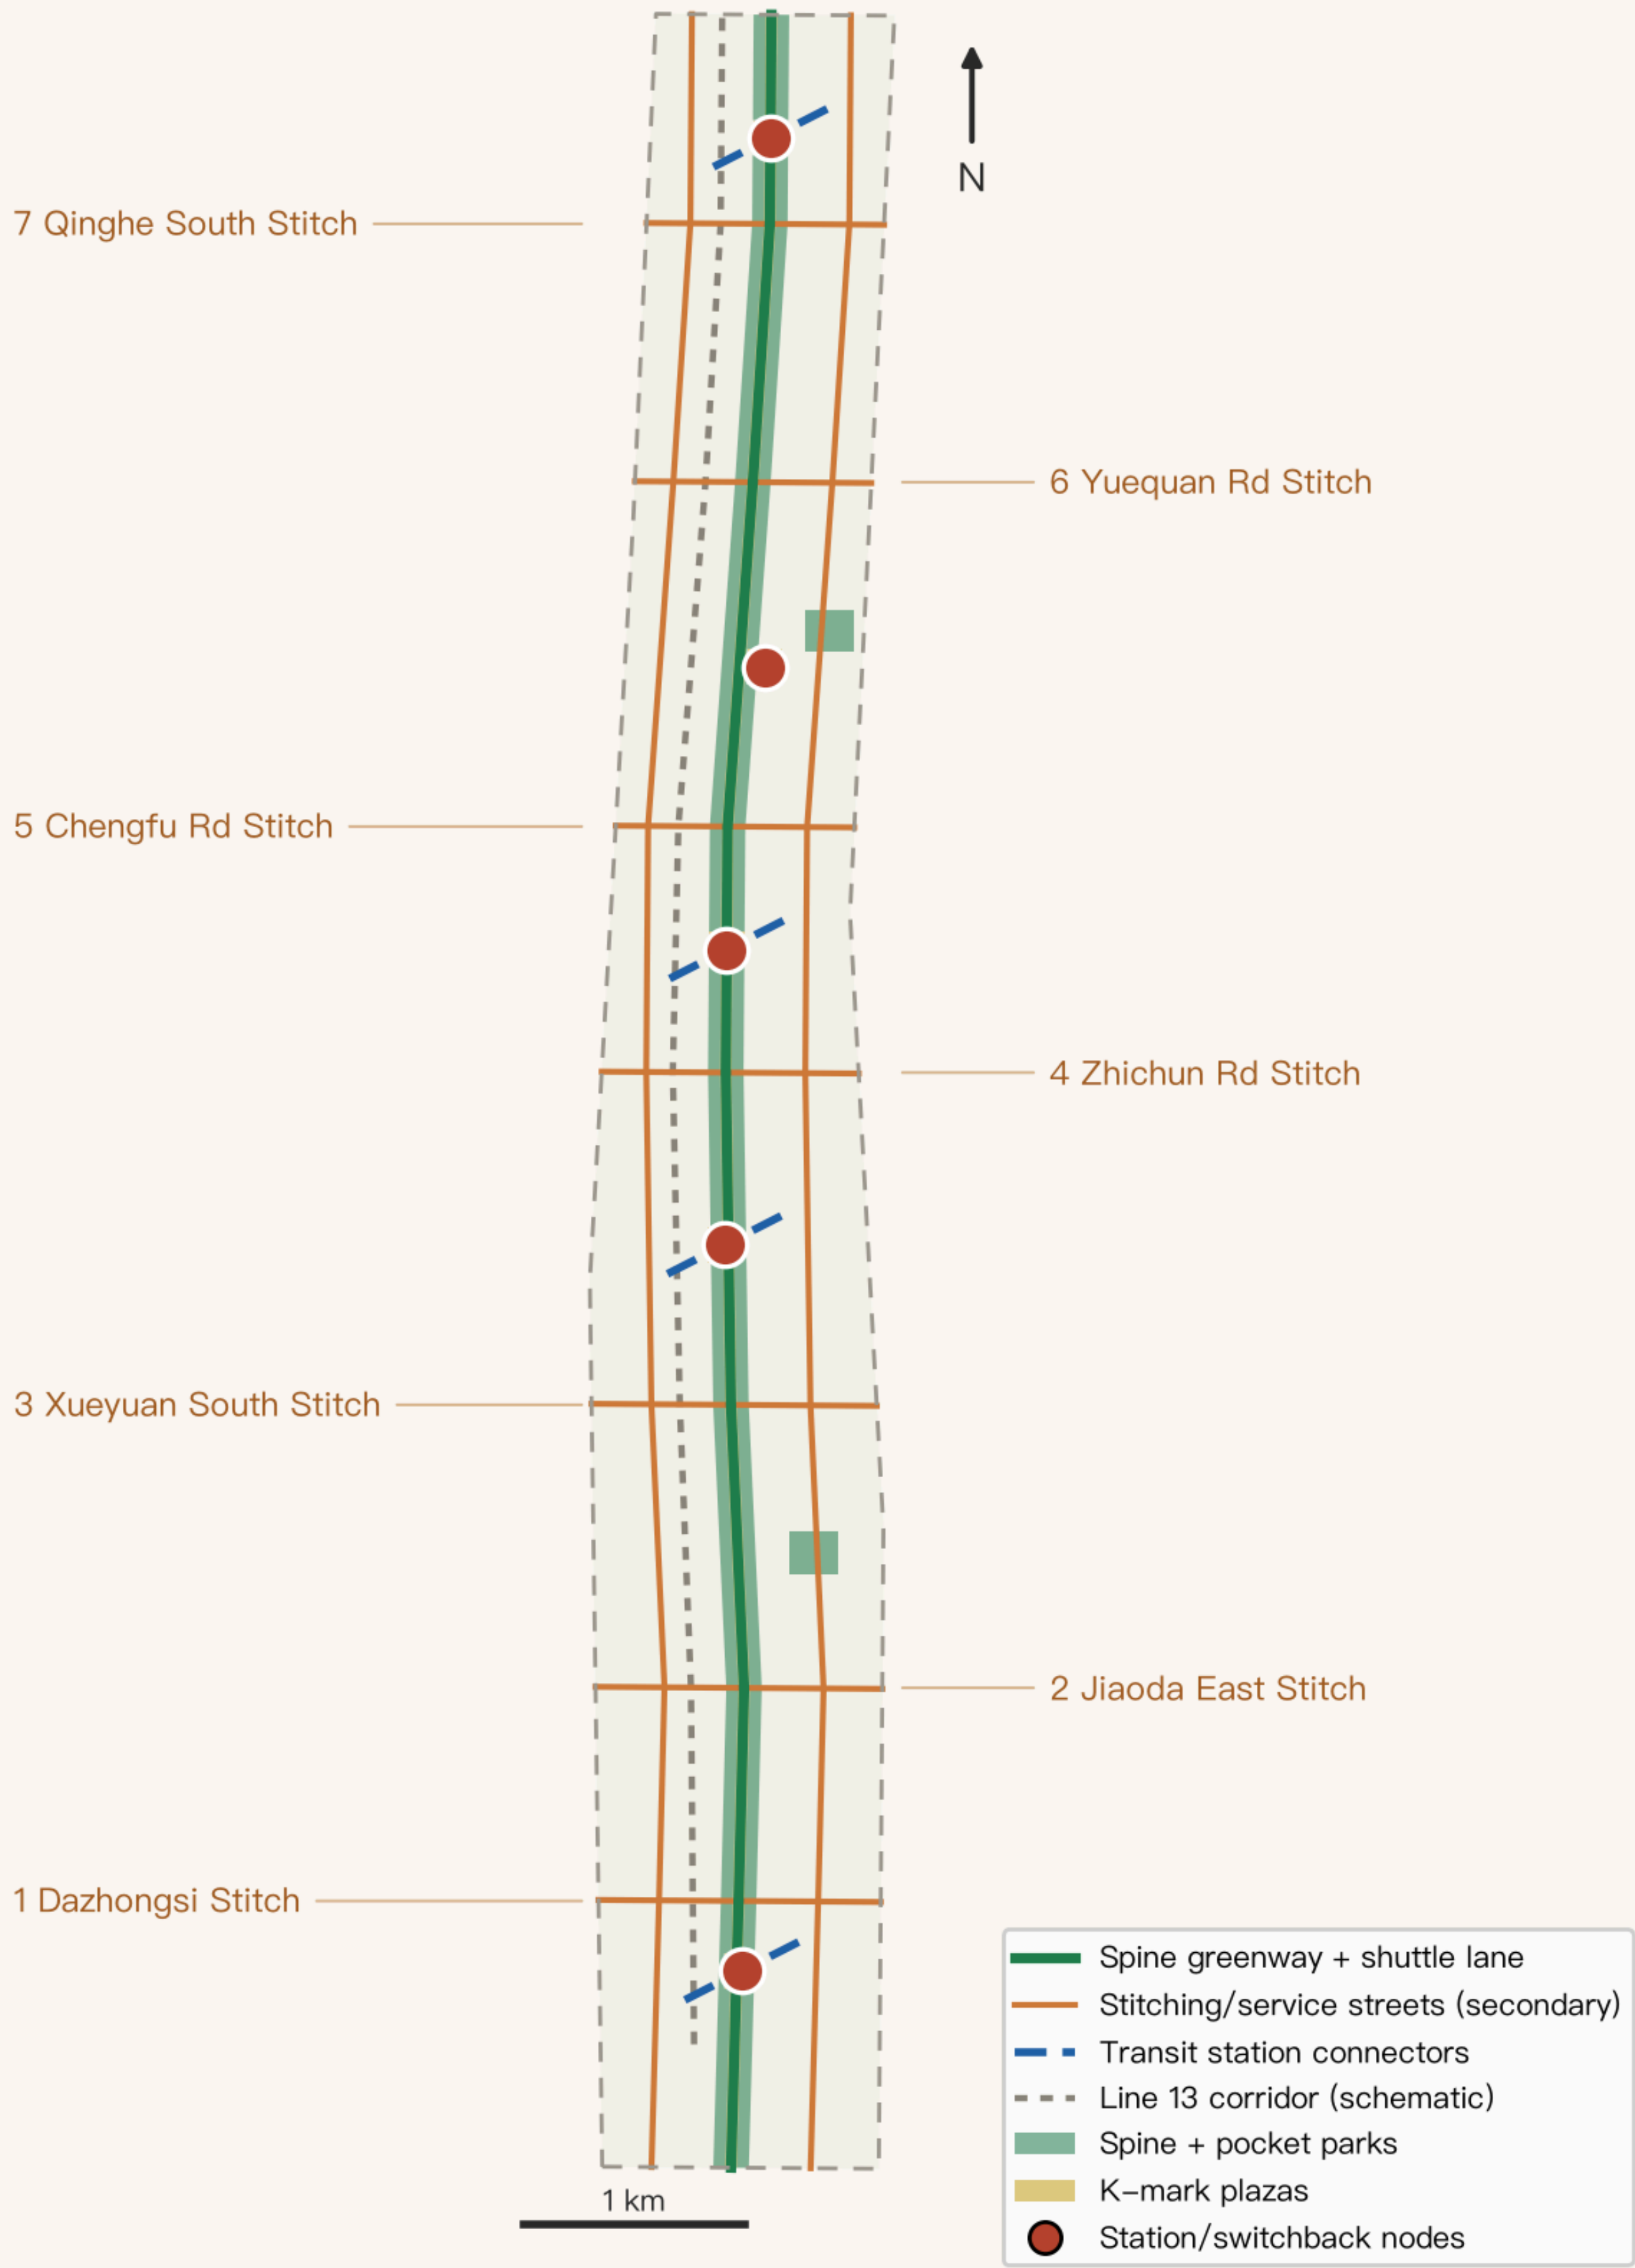

Scope transmission & land-use structure · 24 cells, gapless and overlap-free

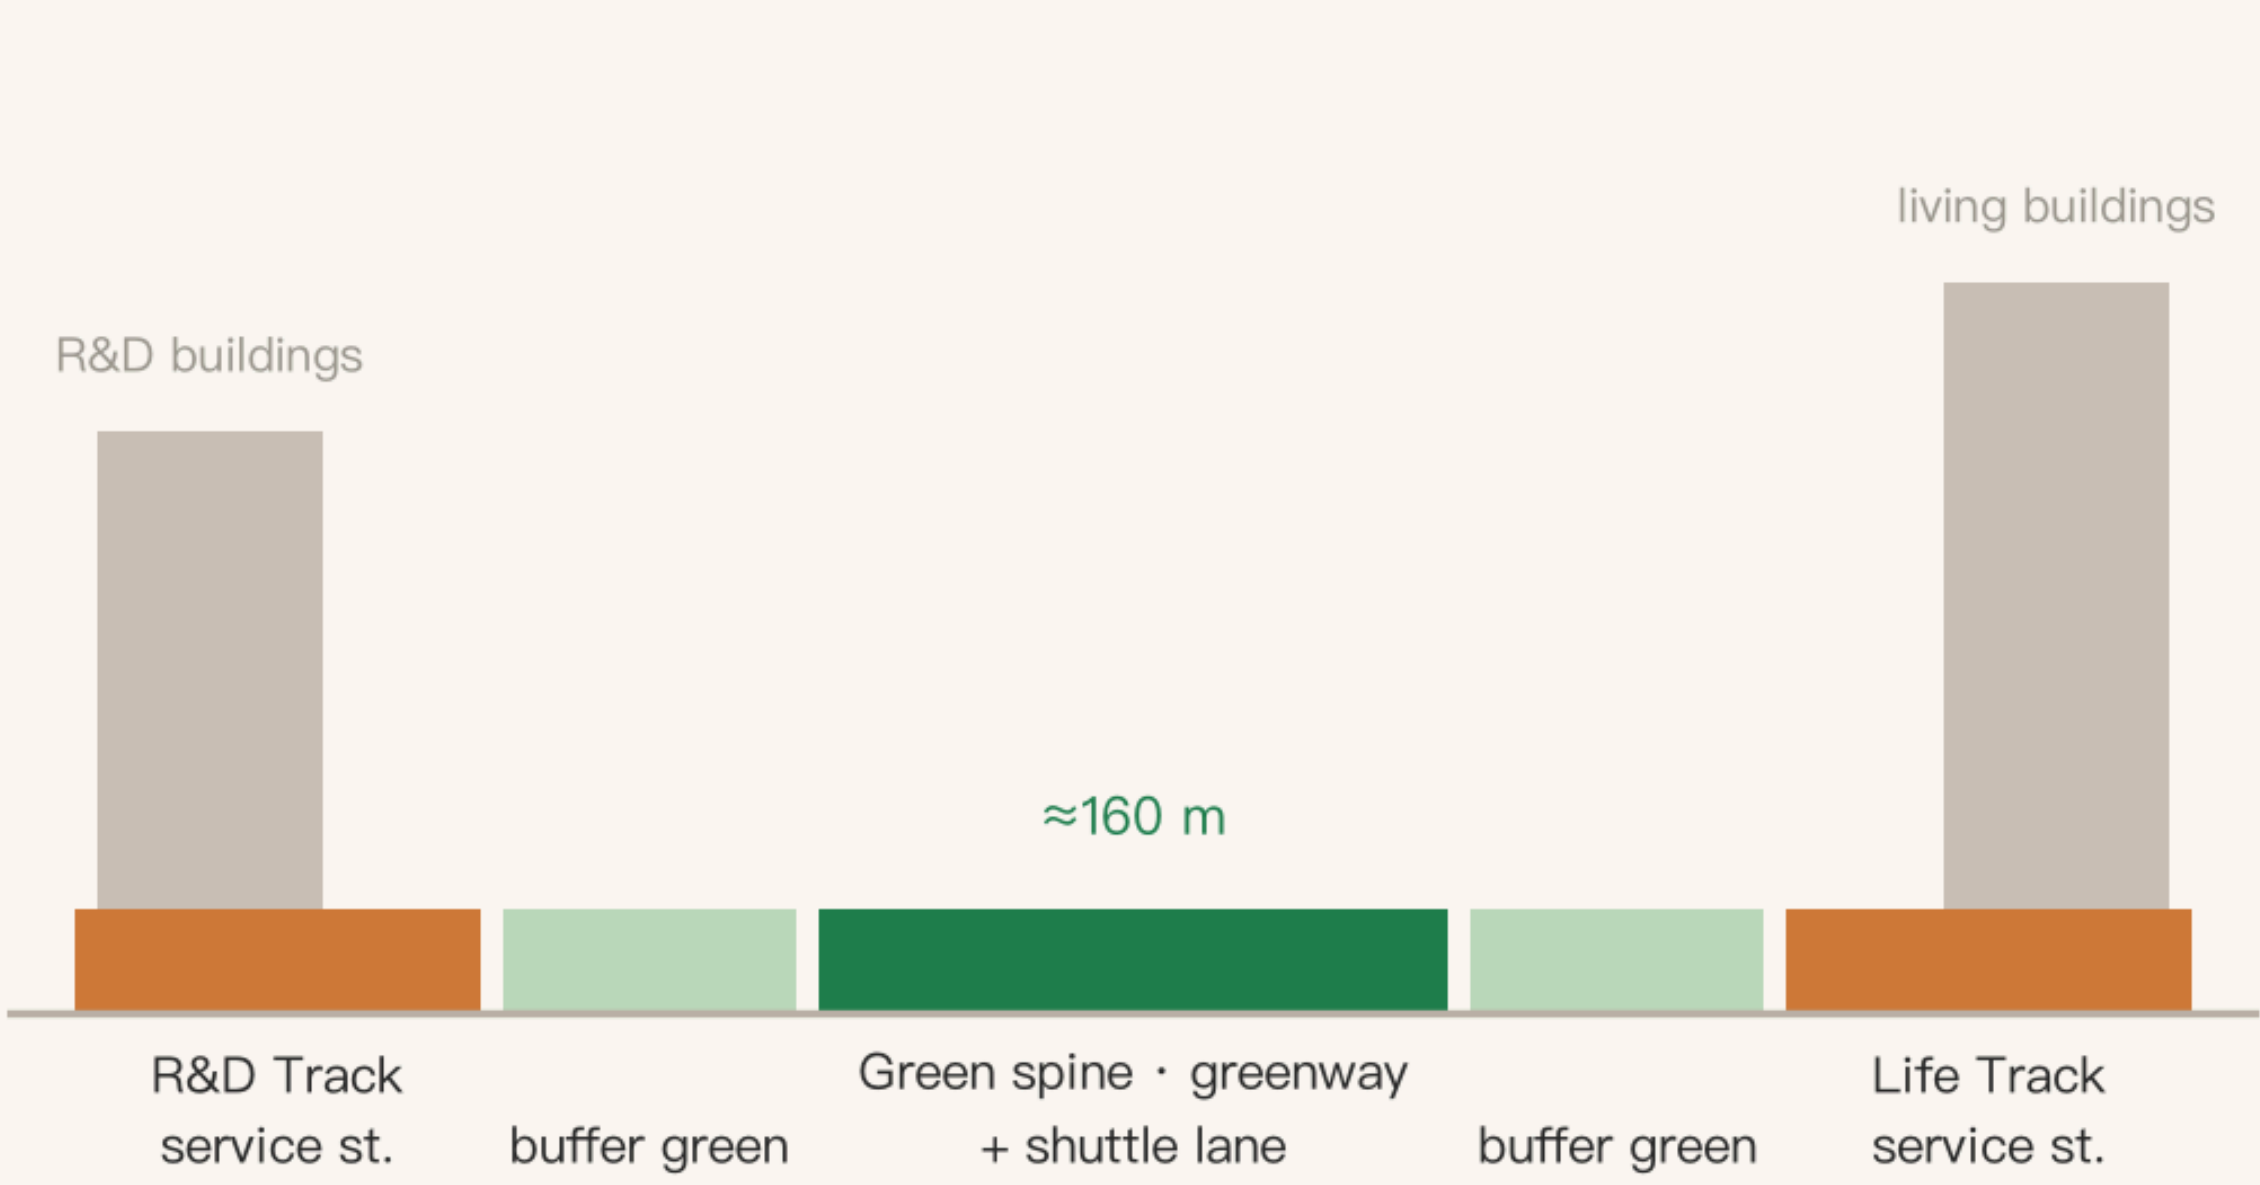

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

24 design cells sharing cut edges — gapless, overlap-free, fully recomputable. Research 3.02M m² · commercial 1.97M m² · residential 1.89M m² · green 1.54M m² · education 1.23M m². Stock first, increment as accent: renovation-led south / renewal + open interfaces middle / new-build + 433k m² strategic reserve north. No area-wide demolition; parcel-level conclusions await ownership and heritage assessment.

Mobility × blue–green public–space composite system

Spine standard section (conceptual)

Network scale (recomputed from geometry)

39.7 km total road centerline	7 E–W stitching streets
4 transit connectors	1.54M m² spine + pocket parks
0.60M m² plazas + promenade	13.5% / 5.3% green ratio / public–space ratio

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

39.7 km of road centerlines; seven stitching streets + two service streets + the spine greenway + four transit connectors. The autonomous shuttle lane (test scenario T1) runs inside the spine. New infrastructure: photovoltaic canopy + storage demo, edge-compute waypoints, a belt-wide sensing base (no human-image capture), open data interfaces for agents. Conventional municipal capacities await official data — no calculations claimed.

The spine = the belt public living room

Green ratio 13.46% (plan layers: spine + two pocket parks, 1.537M m²); public-space ratio 5.26% (promenade + five plazas, 0.60M m²): Bell Plaza · Zhichun Switchback Plaza · K0 Origin Plaza · Xueyuan Stitching Plaza · Summit Plaza.

Four AI pilgrimage landmarks

K0 Origin Stone: dynamic honor wall of open-source contributors; Ren Tower: global AI milestone gallery; Bell Museum × AI Chimes: bell ceremony for open-source releases; Switchback Bridge: authorized code and paper engravings. Honor system = K-marks + contributor register + the annual Ren Prize.

Cultural narrative

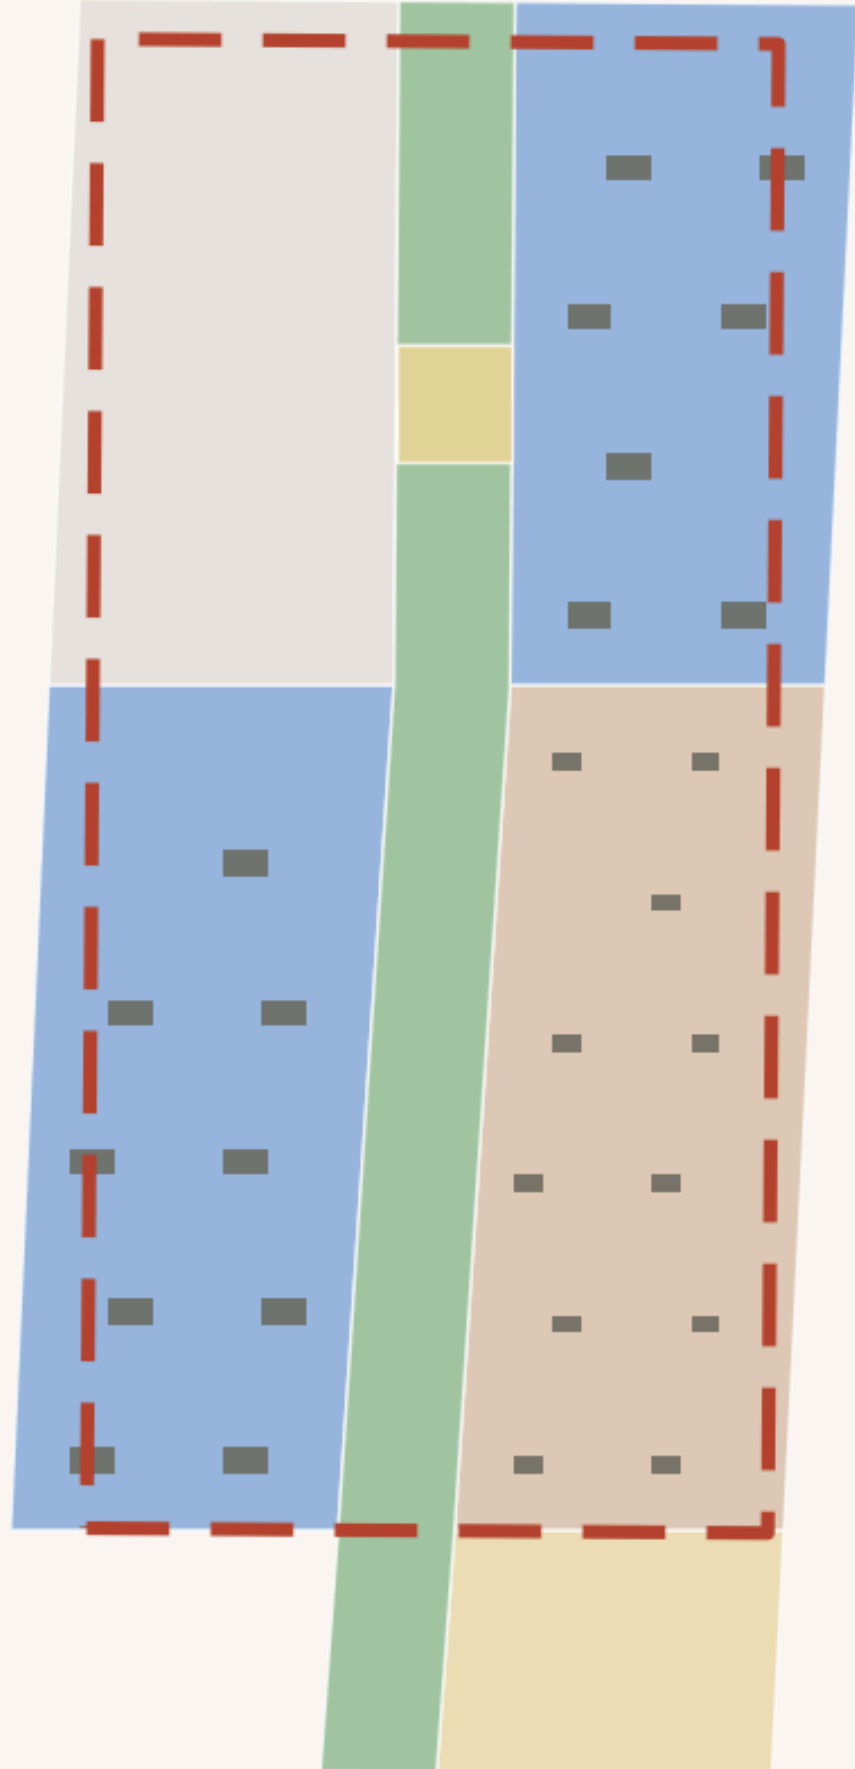

A triple overlay: Centennial Jing-Zhang (Zhan Tianyou, the switchback, self-reliant engineering) × Zhongguancun (going to sea, garages, open source) × new AI culture (human-machine co-creation, agents, open science). South speaks Bells, middle speaks Origin, north speaks Summit. Wayfinding: K-marks + the ren-arrow + three-color track lines (rust red / signal green / compute blue); open-licensed typefaces only. International narrative: From Switchback to Backprop — one line, two ascents.

Landmarks are conceptual; heritage, greenery and traffic-safety constraints prevail; no over-entertainment.

Three key areas · differentiated tasks of three switchback nodes

Zhongzhiyuan AI Acceleration Area

Summit Station · full-stack verification · ~192.1 ha (provisional)

Position: full-stack verification + governance

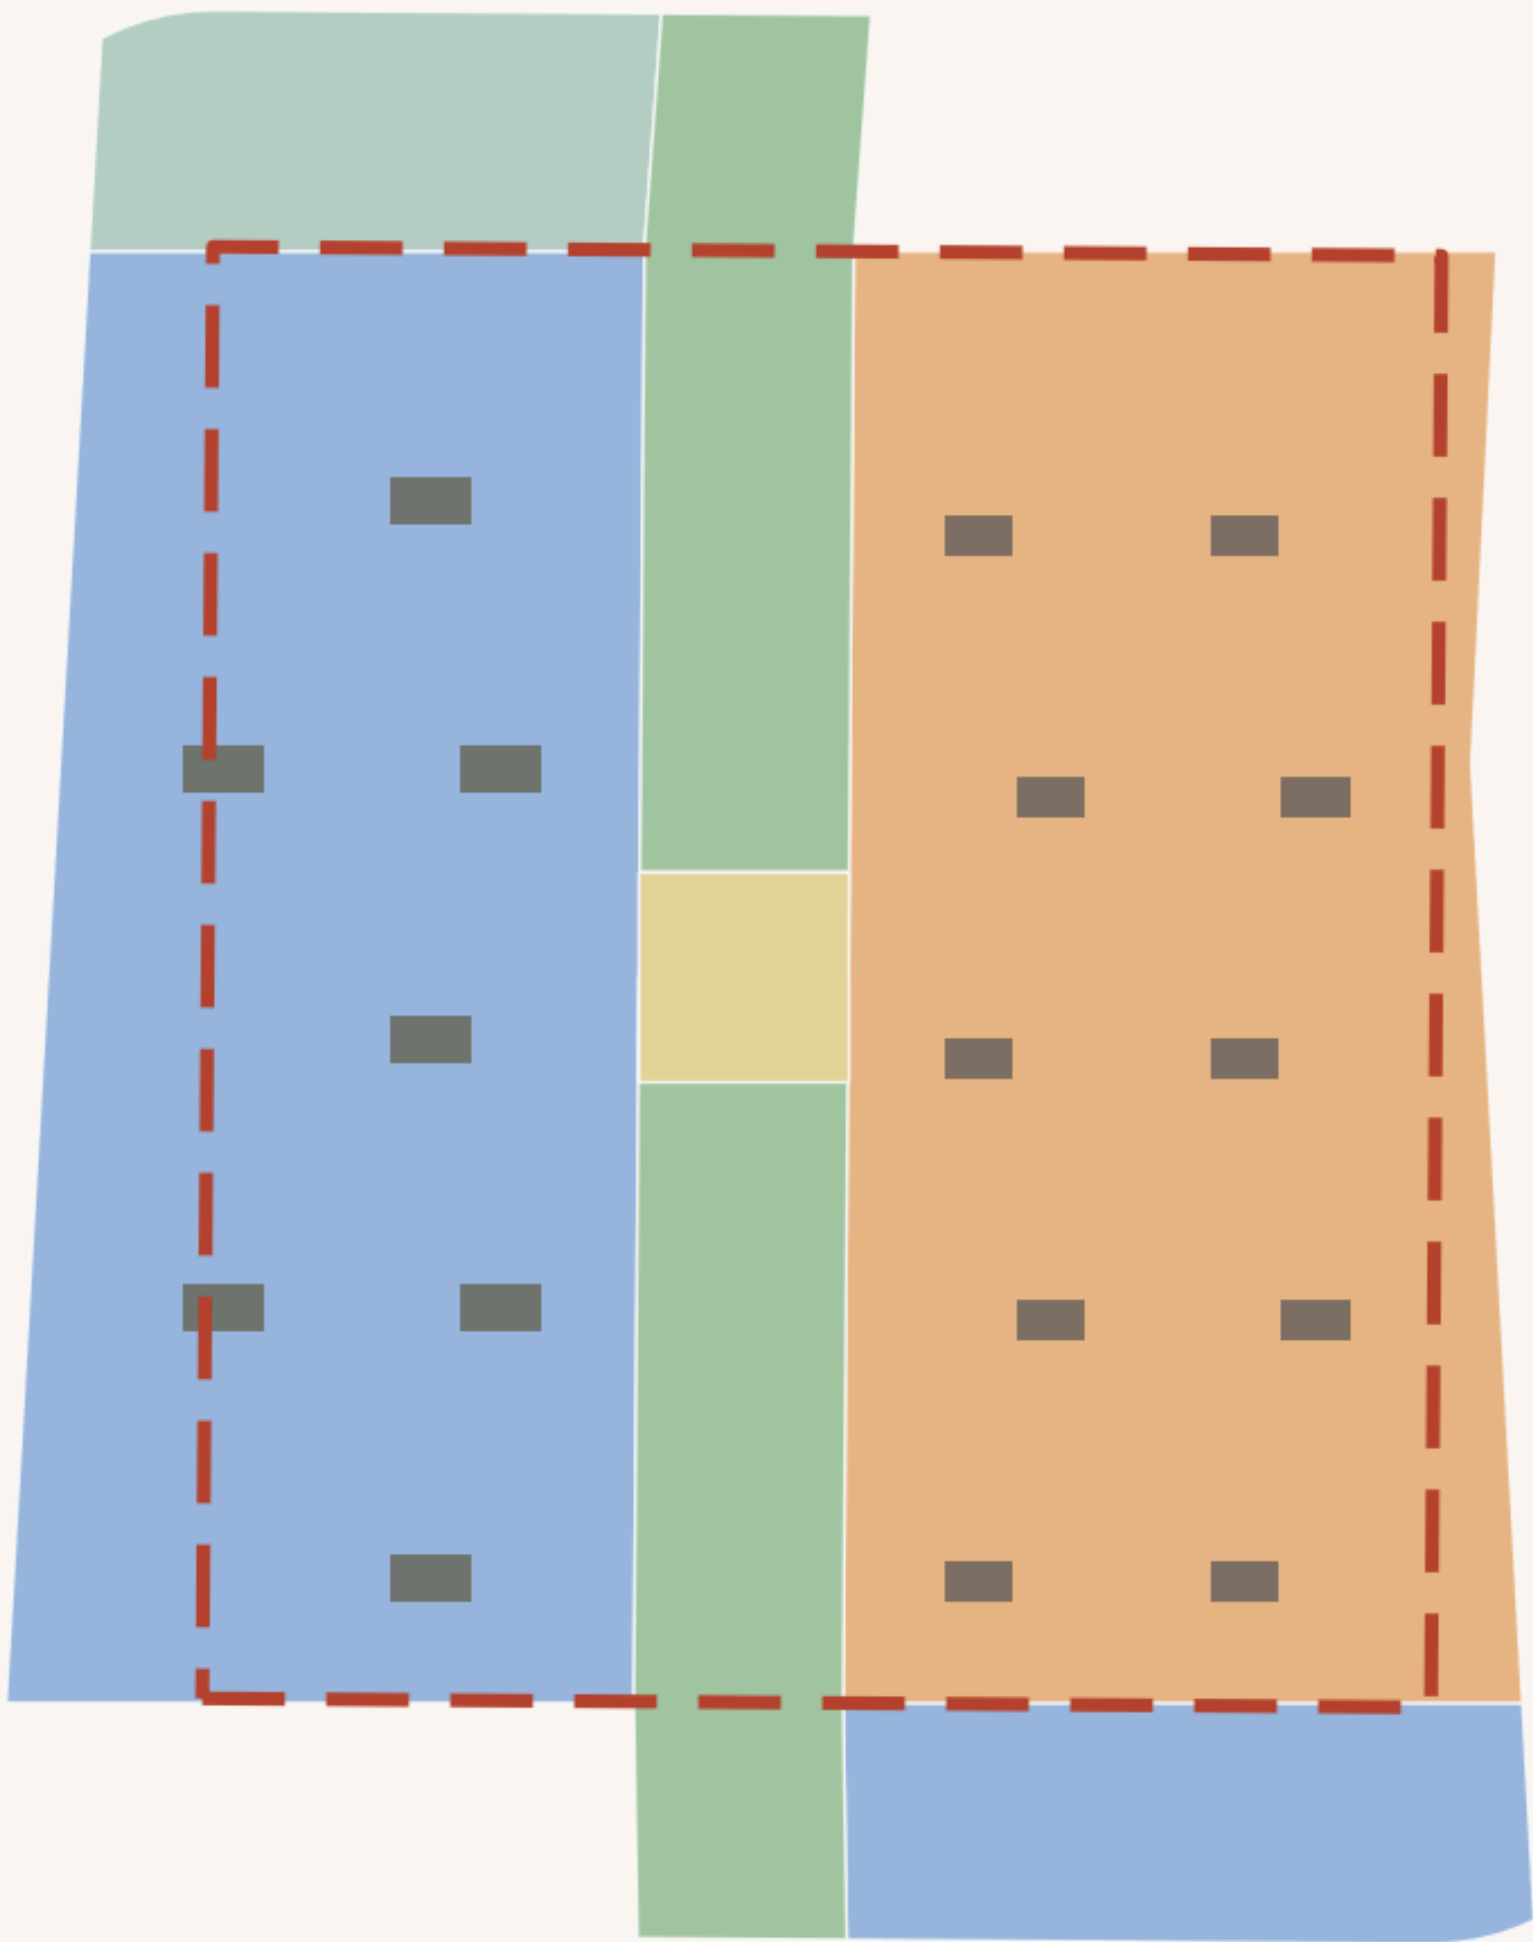

Handles: pilot plants, proving ground, reserve

Renewal: new-build led · Summit Plaza/Ren Tower

Risk: land prep & municipal capacity pending

Beijing AI Origin Community

Origin Station K0 · innovation ecosystem · ~104.3 ha (provisional)

Position: a model community that lives

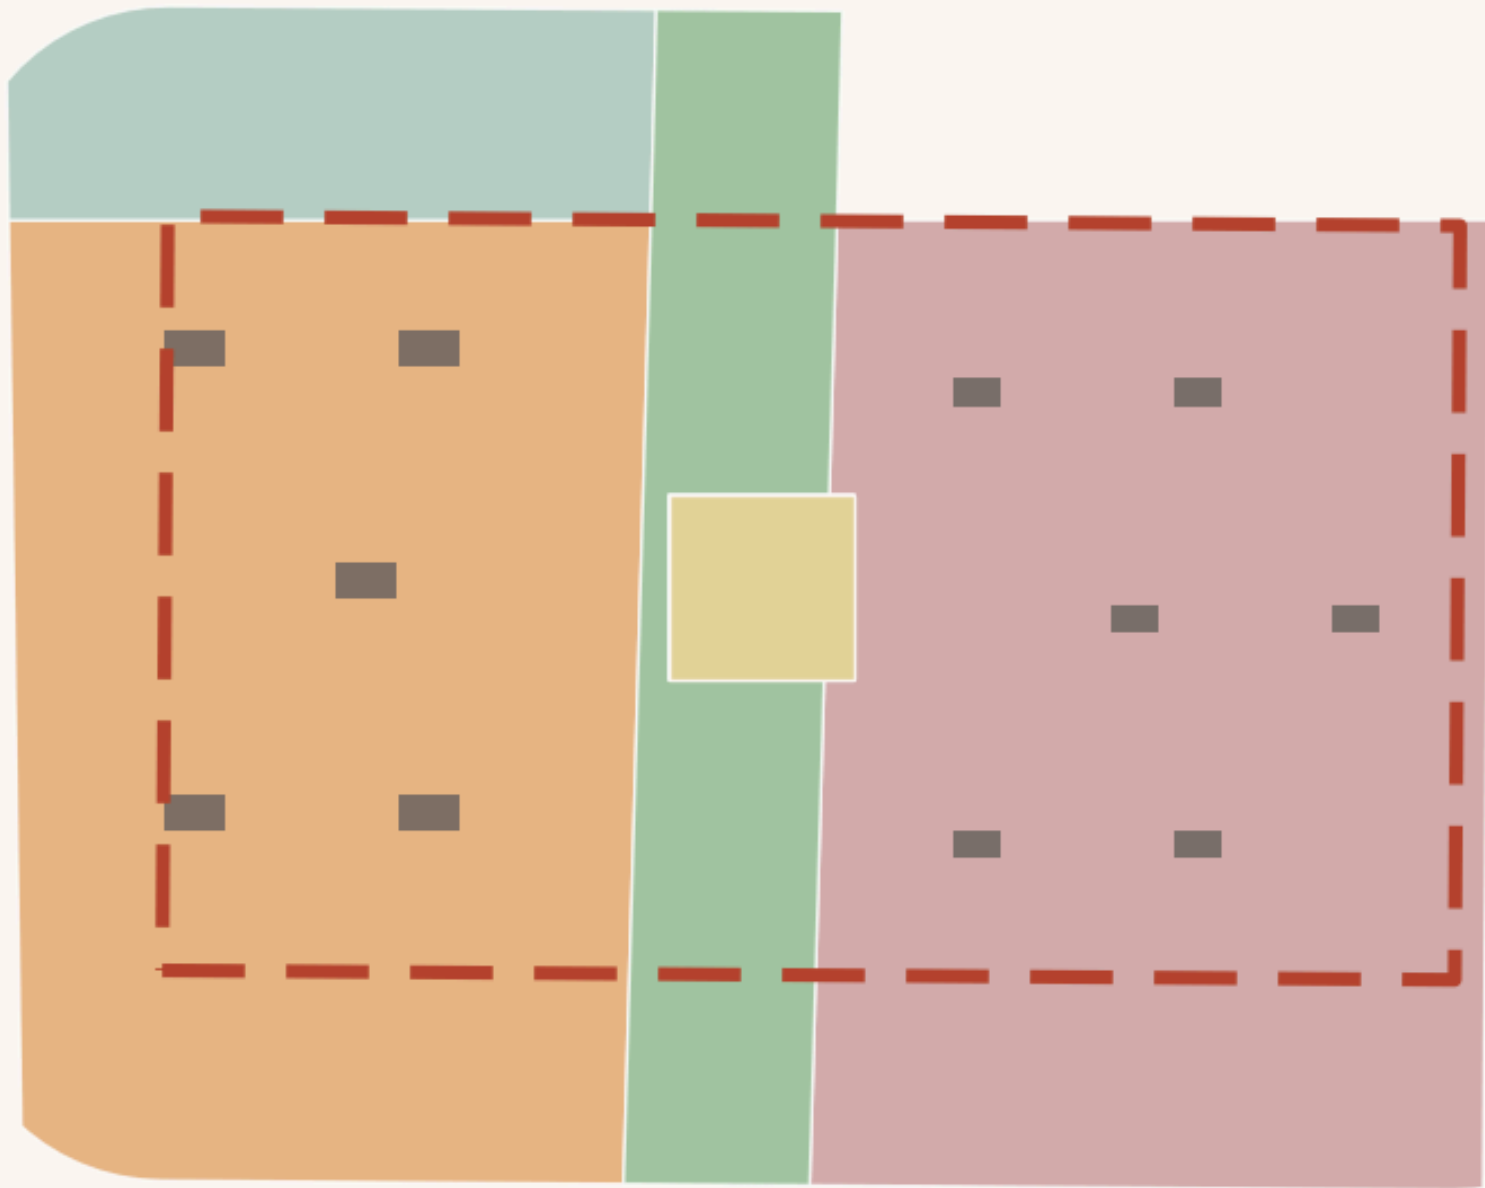

Handles: dev streetfront, K0 Plaza, agent market

Renewal: building renewal + open interfaces

Risk: campus co-building & crowd mgmt pending

Dazhongsi AI Industry Cluster

Bell Station · intelligence-native business · ~72.0 ha (provisional)

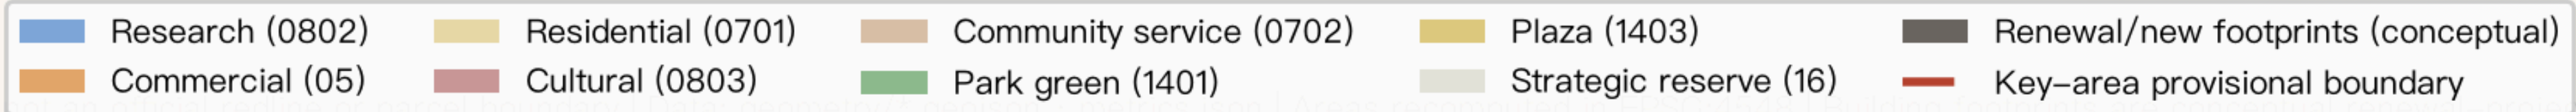

Position: intelligence-native retail flagship

Handles: mall retrofit, Bell Plaza, AI chimes

Renewal: renovation-led, heritage setbacks

Risk: conceptual until heritage assessment

Provisional rough boundary for illustration only — Project layouts only

Summit Station · Zhongzhiyuan (192.1 ha): full-stack verification + governance dialogue, new-build led, northern strategic reserve. Origin Station K0 · AI Origin Community (104.3 ha): a model community that lives, building renewal + open interfaces. Bell Station · Dazhongsi (72.0 ha): intelligence-native retail flagship, stock conversion + low-intensity heritage setbacks. All boundaries provisional; parcel-level conclusions await official redlines.

Scenario card	Type	Spatial anchor	Privacy & human review
T1 Green-spine autonomous shuttle	Test	Greenway lane K2-K8	No facial capture; steward on board, human takeover
T2 Embodied-robot proving ground	Test	Enclosed site, Zhongzhiyuan	Ethics-board admission; blurred livestreams
T3 Municipal-asset AI health check	Test	Dazhongsi existing blocks	Asset data only; work orders signed by humans
4 K-mark AR history layer	Culture	K0-K9 milestones	On-device rendering; historian-vetted
5 Developer streetfront	Ecosystem	Origin Community frontages	Real-name booking, anonymous display
6 Multilingual guide & accessibility copilot	Public service	Belt-wide greenway & stations	On-device speech; human fallback
7 Elder-care AI companion	Livelihood	Beixiaguan renewal area	Informed consent; family + social-worker review
8 Campus-industry internship matching	Academia-industry	Xueyuan Rd open belt	Students own resumes; humans decide hiring
9 Night-economy governance	Governance	Wudaokou consumption area	Aggregated data; district-consulted measures
10 Agent marketplace	Ecosystem	K0 Origin Plaza	Registered listings; human arbitration
11 Eco sensing & bird-friendly lighting	Ecology	Full spine	Environmental sensing only; expert-reviewed
12 AI chime co-creation	Culture	Dazhongsi cultural area	Museum authorization; AI participation labeled

Annual event system

RENLINE Summit (global AI open-source conference) · quarterly Switchback Days · Jing-Zhang AI Marathon · Bell Ceremony.

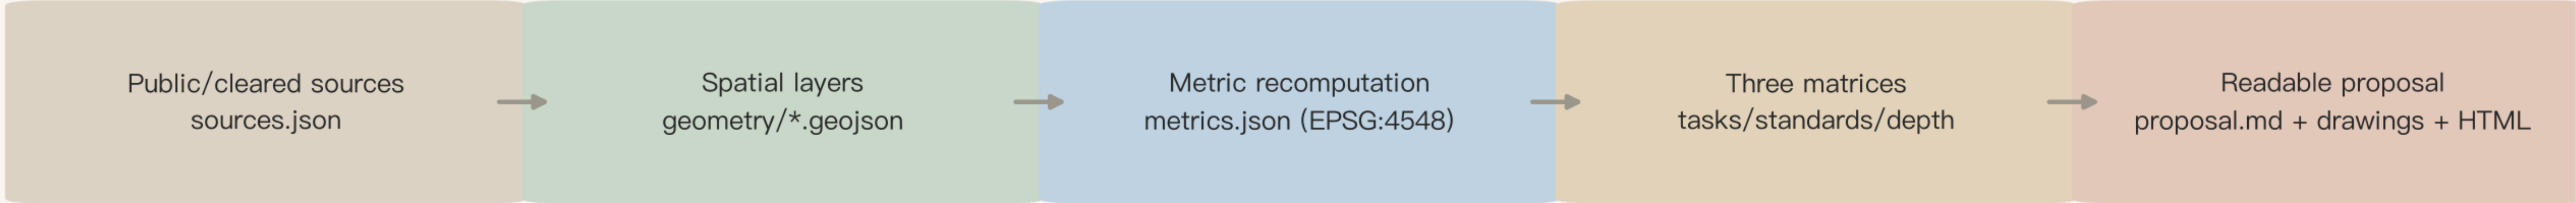

Operating mechanisms

Developer chapters; scenario-voucher opening mechanism (application → review → insurance → public reporting); sister innovation belts (King's Cross / Station F / one-north); the Global Switchback Prize channels winners toward reserve-land landing.

14 renewal projects

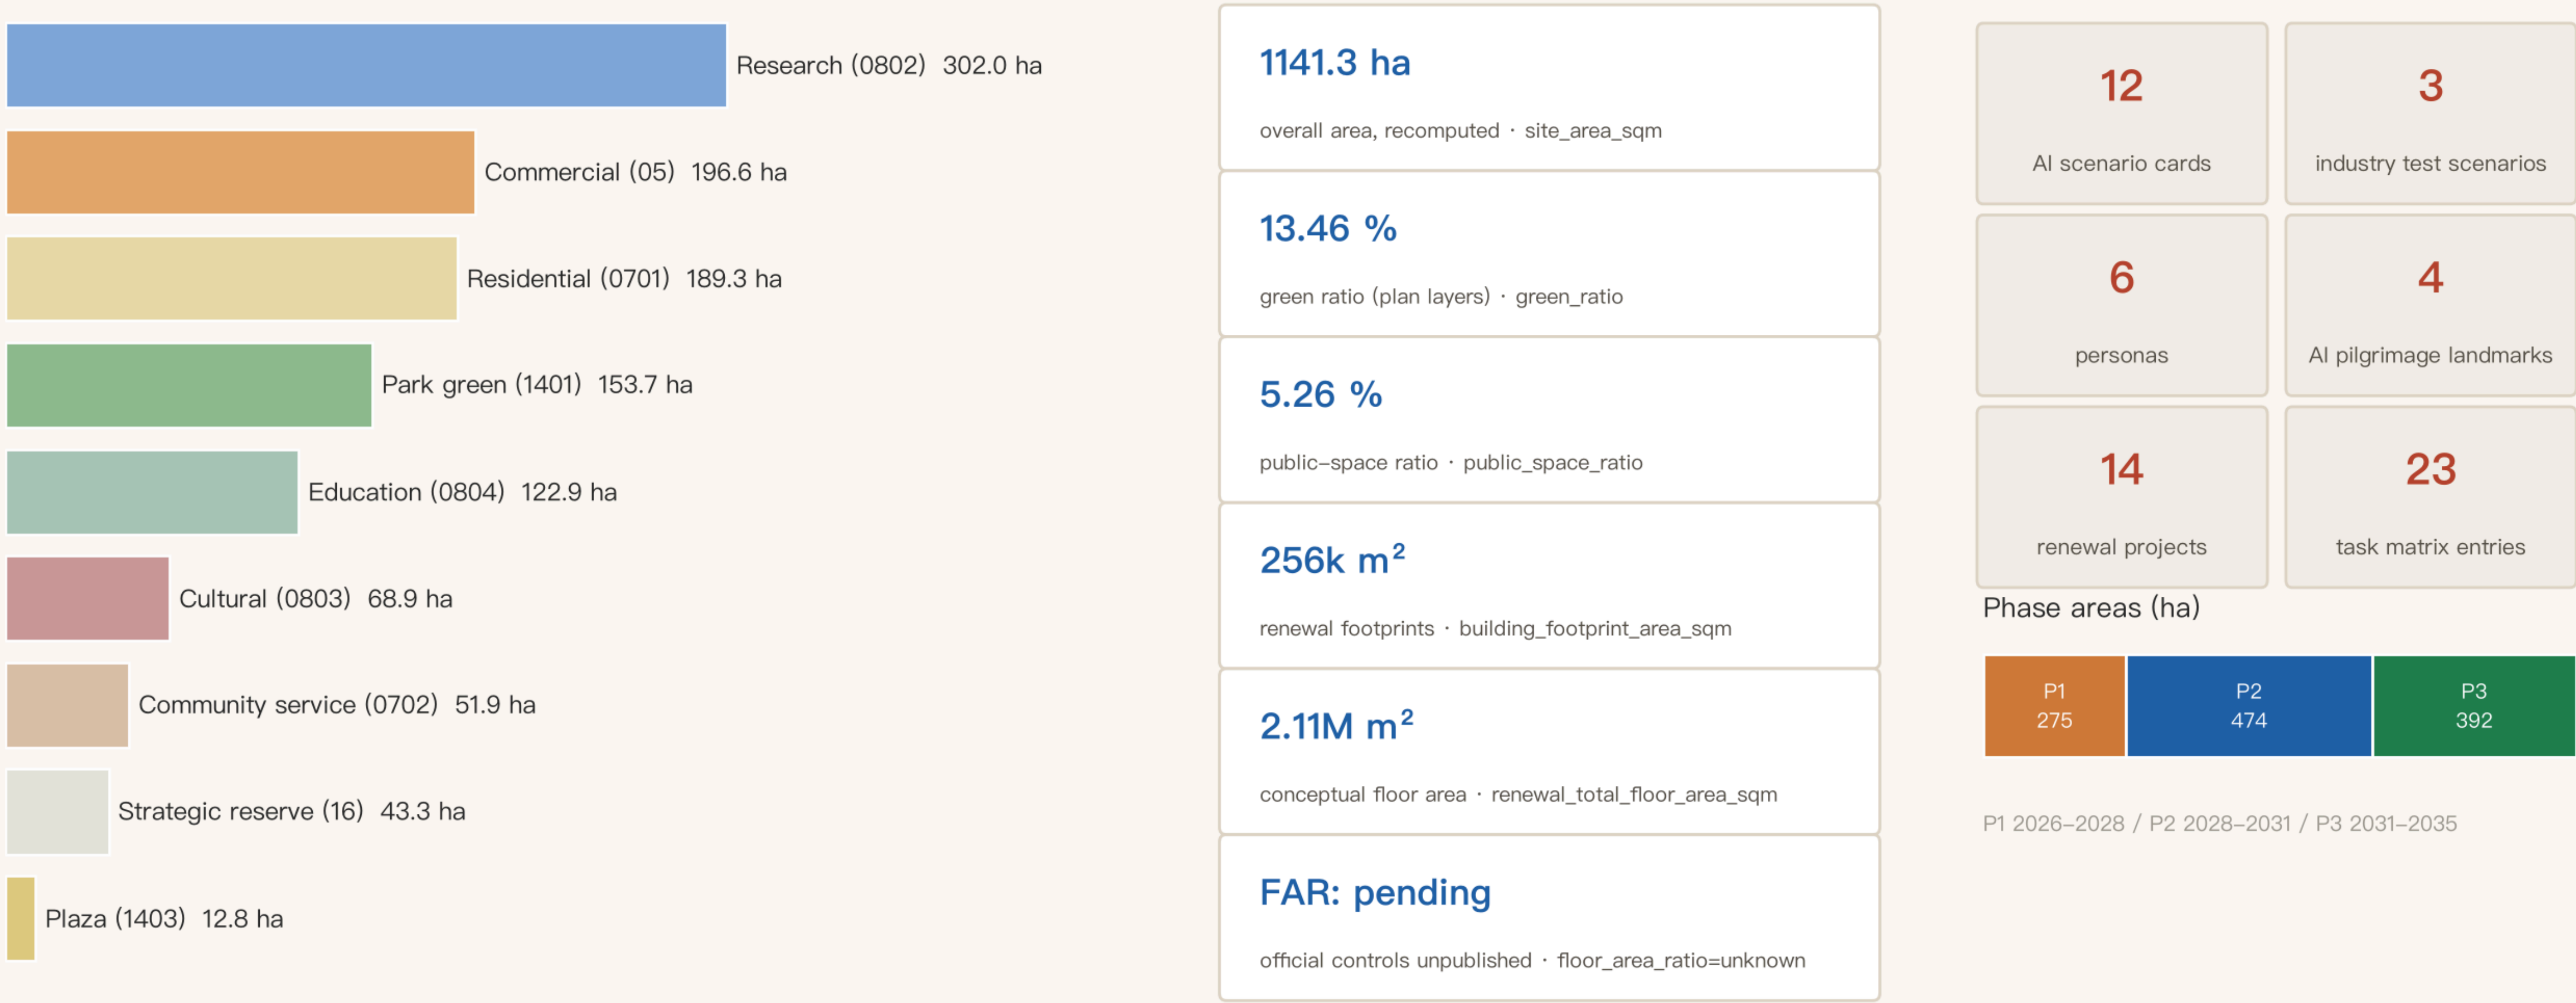

Phase 1 (2026-2028) southern double-stitch launch, 5 projects; Phase 2 (2028-2031) middle switchback engine, 5 projects; Phase 3 (2031-2035) northern summit, 4 projects.

Core metric recomputation and evidence chain

Self-check chain: deterministic validation → spatial review → visual packaging → professional evidence; review starts after all PASS

Land-use recomputation (overlap-free union, 100% coverage)

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548 | Metric statuses and formulas in metrics.json; unknown metrics claim nothing

All indicators recomputed from GeoJSON in EPSG:4548; 23 tasks (announcement 1.3/1.4/1.5 + agent.1-6) fully covered; six standards and fifteen design-depth items fully answered; FAR and other official controls unpublished — status unknown, nothing claimed. Provisional-boundary precision warnings remain; the organizer-side data gap does not block content review; full recalculation after official redlines.
