

CENTENNIAL JING-ZHANG AI INNOVATION BELT · OPEN CALL · A3 BOOKLET

RENLINE 人字线

The Jing-Zhang AI Switchback — Climb by Iteration

In 1909, Zhan Tianyou crossed Badaling with the "人"-shaped switchback — climbing by reversal, exactly how AI learns by iteration. RENLINE translates that switchback wisdom into a spatial prototype: one spine, two tracks, three switchbacks; seven east-west stitches; ten K-mark waypoints. One stroke of 人 is the heritage track of the centennial railway, the other the future track of urban AI life; their junction is human-centered AI fusion innovation.

All spatial boundaries in this booklet are provisional rough boundaries — not official redlines. All content is a conceptual suggestion / reference scheme for professional teams to deepen; no government-approved conclusion. Generated by an AI agent (Claude Fable 5 / chucky1102), v0.1.

Design basis

Primary: the Pre-qualification Announcement for the International Solicitation (Haidian Branch, 2026-05).
Secondary: the agent open-call taskbook excerpt (2026-05-18). Professional standards: the Urban Design Administration Measures, the Regulatory Detailed Planning Measures, and the Territorial Land Classification Guide (local repository snapshots). Source grading per data/source_registry.json: 5 formal-ready sources, 1 provisional-only (the interim boundary).

Three scope levels (provisional)

Level	Area	Task
Coordinated research area	~43.6 km²	industry ecosystem · future urban form
Overall design area	~11.4 km² (recomputed 1141.3 ha)	renewal framework · regulatory-plan depth
Key areas	~368.4 ha (three)	implementation-plan depth

Provisional boundaries serve generation, display and self-checks only; after official redlines the site boundary, key areas, all design layers and all area metrics are recalculated as one package. Verbal extents and news schematics are never treated as redlines.

Evidence chain and self-check

geometry/*.geojson (authoritative spatial data, EPSG:4326 exchange / EPSG:4548 computation) → metrics.json (recomputed indicators) → three matrices (23 tasks / 6 standards / 15 depth items) → proposal.md (readable argument) → drawings and HTML (presentation layer). Self-check chain: deterministic validation → spatial review → visual packaging → professional evidence.

Core recomputed metrics

Metric	Value
Overall area	11,412,825 m² (provisional)
Green ratio (plan layers)	13.46%
Public-space ratio	5.26%
Renewal footprints / conceptual floor area	256k m² / 2.11M m²
Total road centerline	39.7 km (incl. 7 stitching streets)
FAR	unknown · pending official controls

Overview · One spine, two tracks, three switchbacks; seven stitches; ten K-marks

The Jing-Zhang AI Switchback — Climb by Iteration

Switchback Node · AI Fusion Innovation Belt

The switchback climbs by iteration
From Switchback to Backprop

- Spine** Jing-Zhang Heritage Park green spine, ~160 m wide
- Tracks** R&D Track (west) × Life Track (east)
- Switchbacks** Bell Stn (Dazhongsi) · Origin K0 · Summit Stn
- 7 Stitches** seven E-W stitching streets mend the severance
- 10 Waypoints** K0-K9 milestone scenario nodes

Scope transmission & land-use structure · 24 cells, gapless and overlap-free

Three key areas · differentiated tasks of three switchback nodes

key areas

Three key areas · differentiated tasks of three switchback nodes

Zhongzhiyuan AI Acceleration Area

Summit Station · full-stack verification · ~192.1 ha (provisional)

Position: full-stack verification + governance

Handles: pilot plants, proving ground, reserve

Renewal: new-build led · Summit Plaza/Ren Tower

Risk: land prep & municipal capacity pending

Beijing AI Origin Community

Origin Station K0 · innovation ecosystem · ~104.3 ha (provisional)

Position: a model community that lives

Handles: dev streetfront, K0 Plaza, agent market

Renewal: building renewal + open interfaces

Risk: campus co-building & crowd mgmt pending

Dazhongsi AI Industry Cluster

Bell Station · intelligence-native business · ~72.0 ha (provisional)

Position: intelligence-native retail flagship

Handles: mall retrofit, Bell Plaza, AI chimes

Renewal: renovation-led, heritage setbacks

Risk: conceptual until heritage assessment

Mobility × blue-green public-space composite system

Spine standard section (conceptual)

Network scale (recomputed from geometry)

Core metric recomputation and evidence chain

Self-check chain: deterministic validation → spatial review → visual packaging → professional evidence; review starts after all PASS

Land-use recomputation (overlap-free union, 100% coverage)

1141.3 ha

overall area, recomputed · site_area_sqm

task matrix entries

Phase areas (ha)

P1 2026–2028 / P2 2028–2031 / P3 2031–2035

Scenario card	Type	Spatial anchor	Privacy boundary & human review
T1 Green-spine autonomous shuttle	Test	Greenway lane K2-K8	No facial capture; steward on board, human takeover
T2 Embodied-robot proving ground	Test	Enclosed site, Zhongzhiyuan	Ethics-board admission; blurred livestreams
T3 Municipal-asset AI health check	Test	Dazhongsi existing blocks	Asset data only; work orders signed by humans
4 K-mark AR history layer	Culture	K0-K9 milestones	On-device rendering; historian-vetted
5 Developer streetfront	Ecosystem	Origin Community frontages	Real-name booking, anonymous display
6 Multilingual guide & accessibility copilot	Public service	Belt-wide greenway & stations	On-device speech; human fallback
7 Elder-care AI companion	Livelihood	Beixiaguan renewal area	Informed consent; family + social-worker review
8 Campus-industry internship matching	Academia-industry	Xueyuan Rd open belt	Students own resumes; humans decide hiring
9 Night-economy governance	Governance	Wudaokou consumption area	Aggregated data; district-consulted measures
10 Agent marketplace	Ecosystem	K0 Origin Plaza	Registered listings; human arbitration
11 Eco sensing & bird-friendly lighting	Ecology	Full spine	Environmental sensing only; expert-reviewed
12 AI chime co-creation	Culture	Dazhongsi cultural area	Museum authorization; AI participation labeled

Six personas

1 AI researchers/PhD students → Origin research area + talent apartments; 2 founders/developers → developer streetfront + agent marketplace; 3 industry engineers → Zhongzhiyuan proving ground; 4 original residents/elders → Beixiaguan and Zaojunmiao livability belts; 5 teens and families → K-mark science waypoints; 6 international visitors → Summit Plaza convention belt.

Scenario opening mechanism

Scenario vouchers: application → district review → insurance filing → public reporting; test revenues reinvested in public-space maintenance. All scenarios: data minimization, human reviewability, no reliance on non-public data or designated vendors, and no test scenario described as approved operation.

Four AI pilgrimage landmarks

K0 Origin Stone (contributor honor wall) · Ren Tower (AI milestone gallery) · Bell Museum × AI Chimes (open-source release bell ceremony) · Switchback Bridge (authorized code/paper engravings). Honor system = K-marks + contributor register + the annual Ren Prize.

Renewal projects (14, all conceptual)	Phase	Type
1 Dazhongsi mall intelligence-native retrofit	Phase 1 2026-2028	Renovation
2 Bell Plaza & museum interface opening	Phase 1	Public space
3 Dazhongsi TOD stitching street	Phase 1	Stitching
4 Jiaoda East stitch & under-viaduct activation	Phase 1	Stitching
5 Southern green-spine connection	Phase 1	Blue-green
6 Zhichun R&D building renewal	Phase 2 2028-2031	Renovation
7 K0 Origin Plaza & Origin Stone	Phase 2	Landmark
8 Wudaokou station-front smart district	Phase 2	Renovation
9 Middle spine & two pocket parks	Phase 2	Blue-green
10 Switchback Bridge over Line 13	Phase 2	Landmark/stitch
11 Zhongzhiyuan full-stack innovation area	Phase 3 2031-2035	New build
12 Summit Plaza & Ren Tower	Phase 3	Landmark
13 Xueyuan Rd open-the-walls program	Phase 3	Interface
14 Strategic reserve starter area	Phase 3	Reserve

Implementation policy suggestions

Urban-renewal-ordinance pathways for stock conversion; campus-city co-building agreements with operating concessions; regulatory sandboxes for test scenarios; "headquarters reserve + triggered activation" for the reserve land. Public participation: disclosure and co-creation workshops each phase; renewal without displacement as a precondition.

Annual event system

RENLINE Summit (global AI open-source conference, Summit Plaza) · quarterly Switchback Days (demo days, K0 Plaza) · Jing-Zhang AI Marathon (full spine) · Bell Ceremony (major open-source releases, Dazhongsi).

Long-term operations

Developer chapters (models/embodiment/scenarios/governance); contribution points redeem honor-wall placement and desk privileges; sister innovation belts with King's Cross, Station F and one-north; the Global Switchback Prize channels winners toward reserve-land landing. Brand assets (RENLINE, K-marks, Ren Prize, marathon) held by the district platform company.

All events, policies, funding and investment-attraction arrangements are conceptual suggestions, not confirmed government arrangements or investment commitments.

Data gaps (organizer-side; do not block content review)

1 official redlines and precise key-area polygons; 2 regulatory controls (FAR/height/density/green/setbacks); 3 as-built and ownership data; 4 municipal capacities; 5 statutory heritage extents. Publication of any item triggers recalculation of the affected layers and metrics, and the proposal iterates accordingly.

AI ethics and privacy

All 12 scenario cards embed data minimization, human review and explainability; no facial-recognition surveillance, social scoring, or automated decisions beyond human takeover; test scenarios require insurance filing and public incident reports.

Copyright

Text, figures and GeoJSON are original AI-agent output; international cases cite public facts only; any physical display of historical imagery, museum bell samples, names, code or papers requires authorization or open-license compliance; the logo and wayfinding are direction descriptions using no existing typeface or trademark assets. See report/copyright_statement.md.

Statement boundary

This proposal is an open co-creation concept and reference scheme for professional teams to deepen; it does not replace statutory planning and constitutes no government-approved conclusion, statutory control judgement, engineering feasibility conclusion, investment estimate or implementation commitment. "Stations", "landmarks" and "events" are brand and operations concepts.

Responsibility and iteration

Generated by an AI agent (Claude Fable 5, GitHub: chunky1102); the human account owner is responsible for the act of submission. The proposal iterates with taskbook updates, data and community feedback — reviews via Issues and PRs are welcome.
