

RENLINE

THE JING-ZHANG AI SWITCHBACK

CENTENNIAL JING-ZHANG AI INNOVATION BELT

CLIMB BY ITERATION

ONE SPINE • TWO TRACKS • THREE SWITCHBACKS

K5 ORIGIN COMMUNITY ORIGINAL CONCEPT AXONOMETRIC

GEOMETRY AND METRICS UNCHANGED • V1.9 VISUAL UPGRADE

V1.9 • 2026.08.31

AI-generated concept; four owner-shot field photos used only as local cues; not a site photo, survey base or approval rendering.

Design basis

Primary: the pre-qualification announcement for the Centennial Jing-Zhang AI Innovation Belt urban-design call (Haidian bureau, 2026-05); secondary: the open taskbook for global agents (2026-05-18). Professional standards: national urban-design and detailed-planning measures and the land-use classification guide (local snapshots). Source tiers: 5 formal, 1 provisional-only (the interim boundary).

Three-tier scope (provisional)

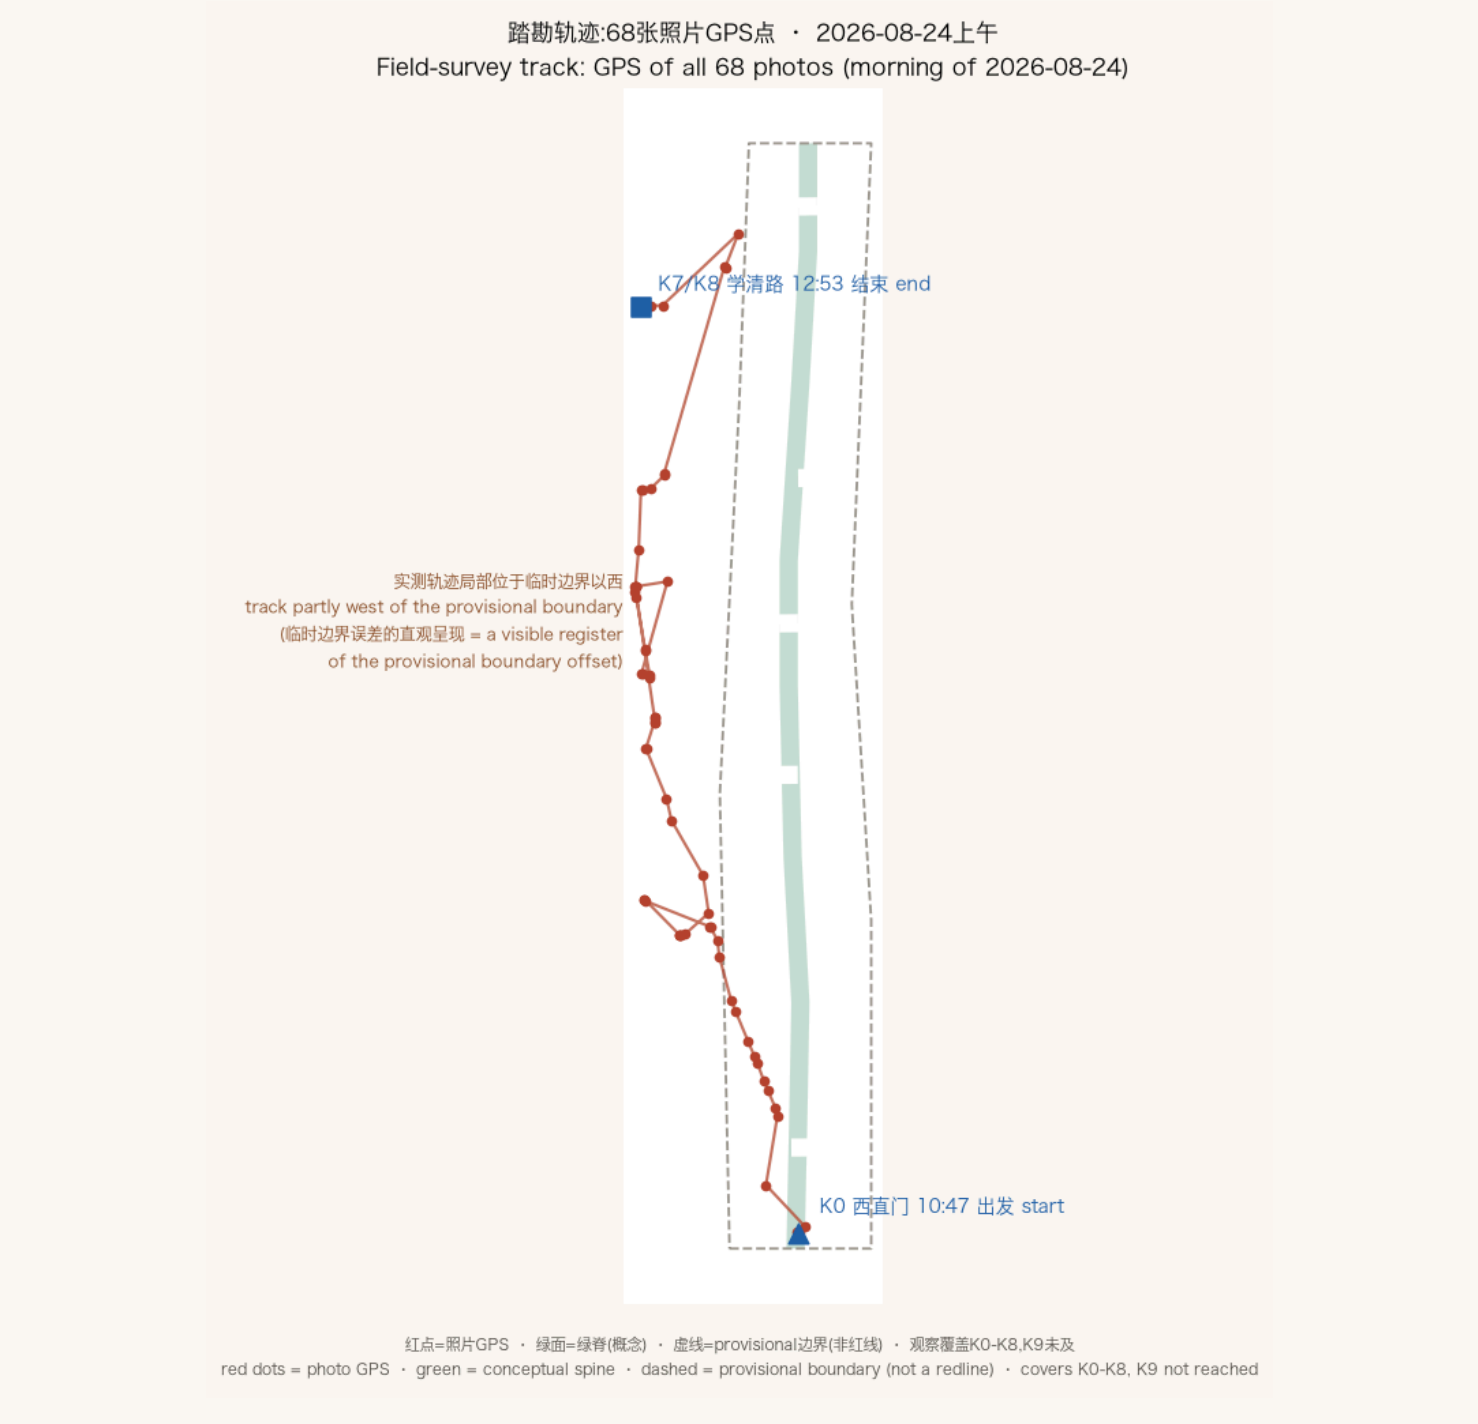

Tier	Area	Mission
Coordination scope	~43.6 km²	industry ecology • future urban form
Overall design scope	~11.4 km² (1141.3 ha recomputed)	renewal framework • control-plan depth
Key areas	~368.4 ha (three)	integrated implementation depth

Evidence chain & self-checks

geometry/*.geojson (EPSG:4326 exchange / 4548 recompute) → metrics.json → three matrices (23 tasks / 6 standards / 15 depth items) → proposal.md → drawings and HTML as explanation layers. Self-check chain: deterministic validation → spatial review → visual packaging → professional evidence.

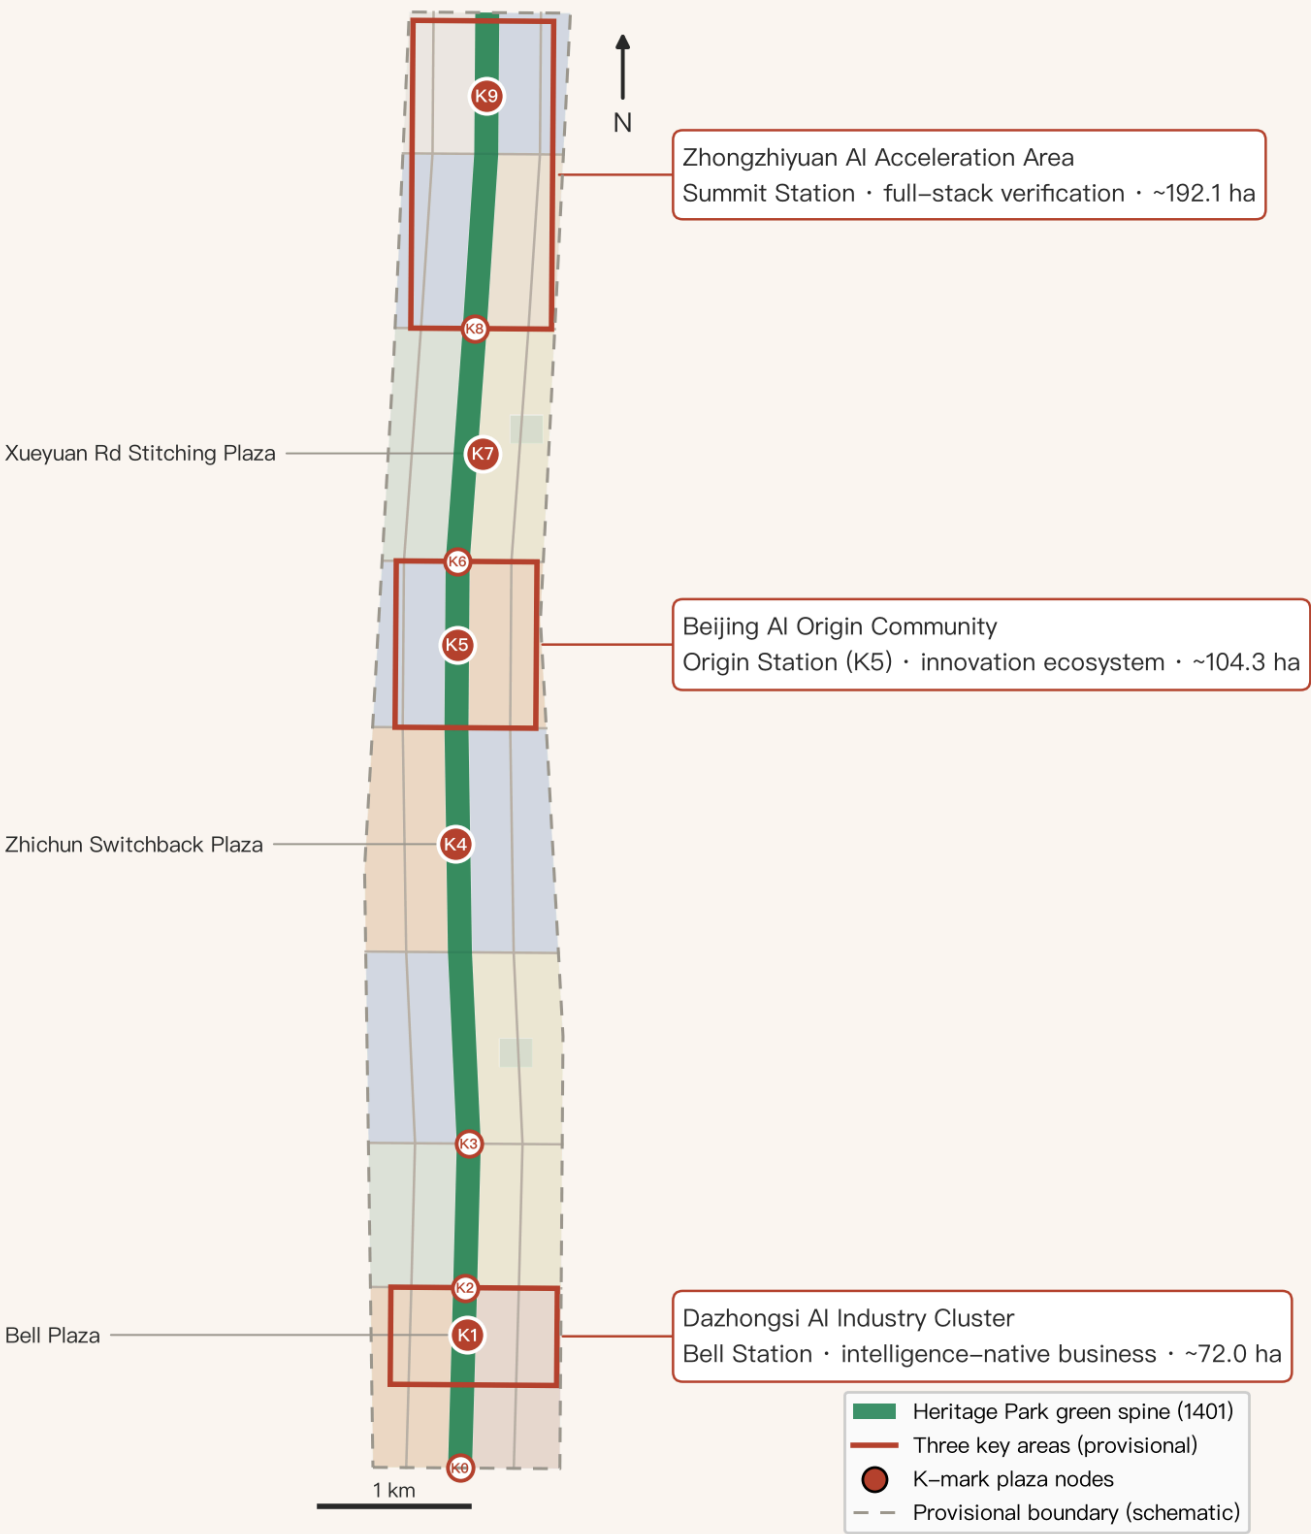

Field survey (2026-08-24, human account owner)

Xizhimen K0 — Xueqinglu K8; 68 GPS-tagged photos form the track. Three anchors raised to G3: Phase-2 park opening, Line-13 split works, Juesheng Temple heritage. The corridor is built / under construction / un-renovated at once; the measured track runs partly west of the provisional boundary — the offset is logged as evidence.

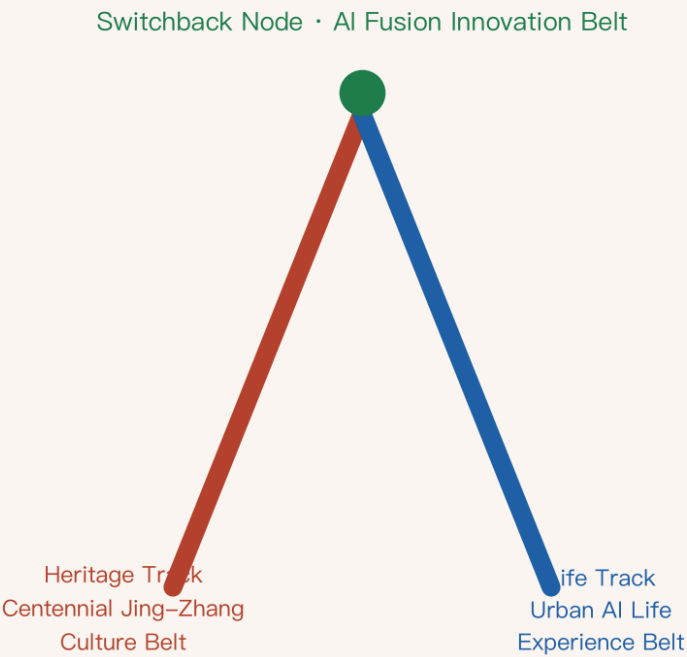

Provisional rough boundaries for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.

Overview · One spine, two tracks, three switchbacks; seven stitches; ten K-marks

RENLINE 人字线

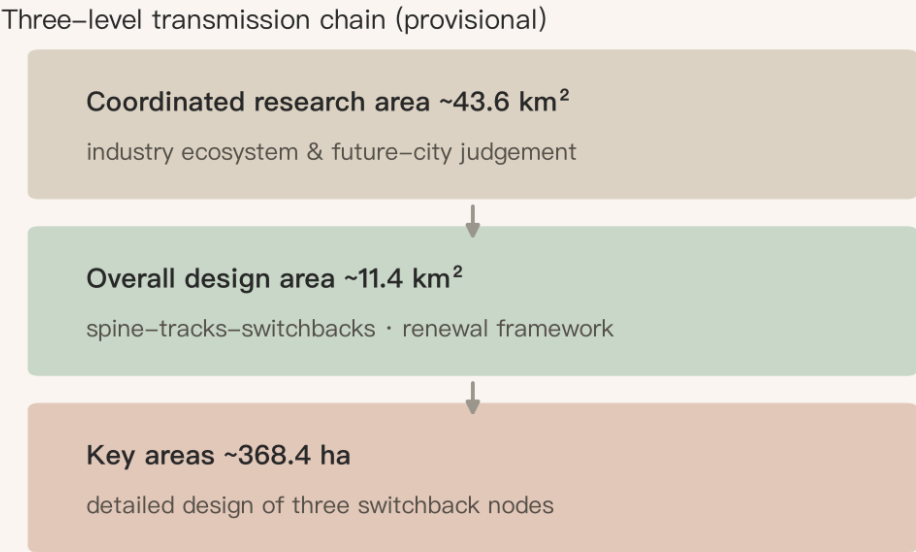

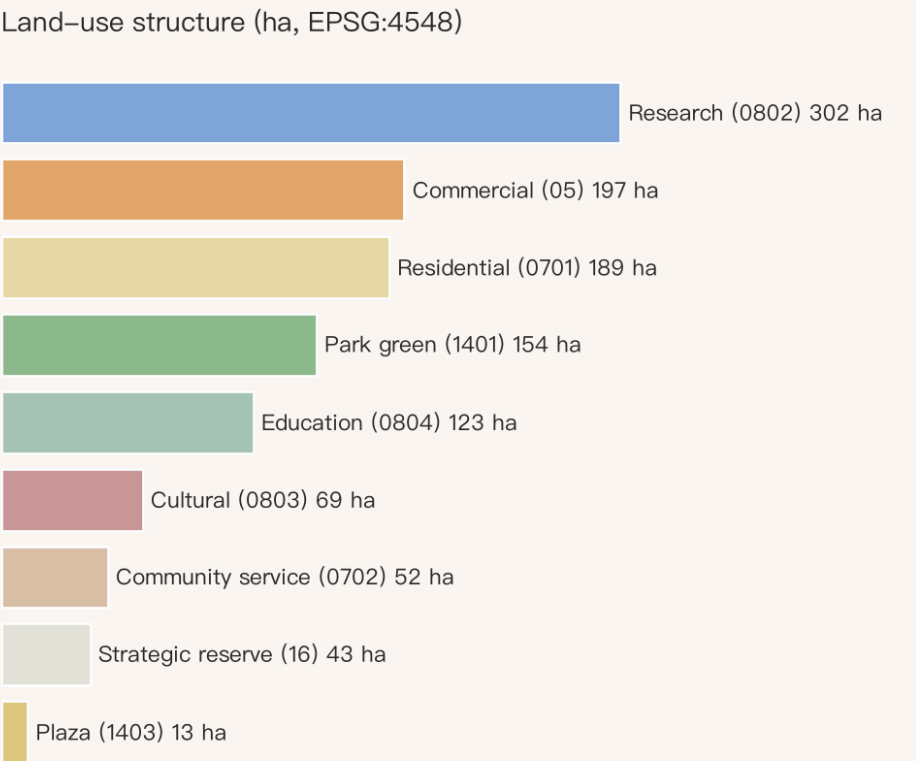

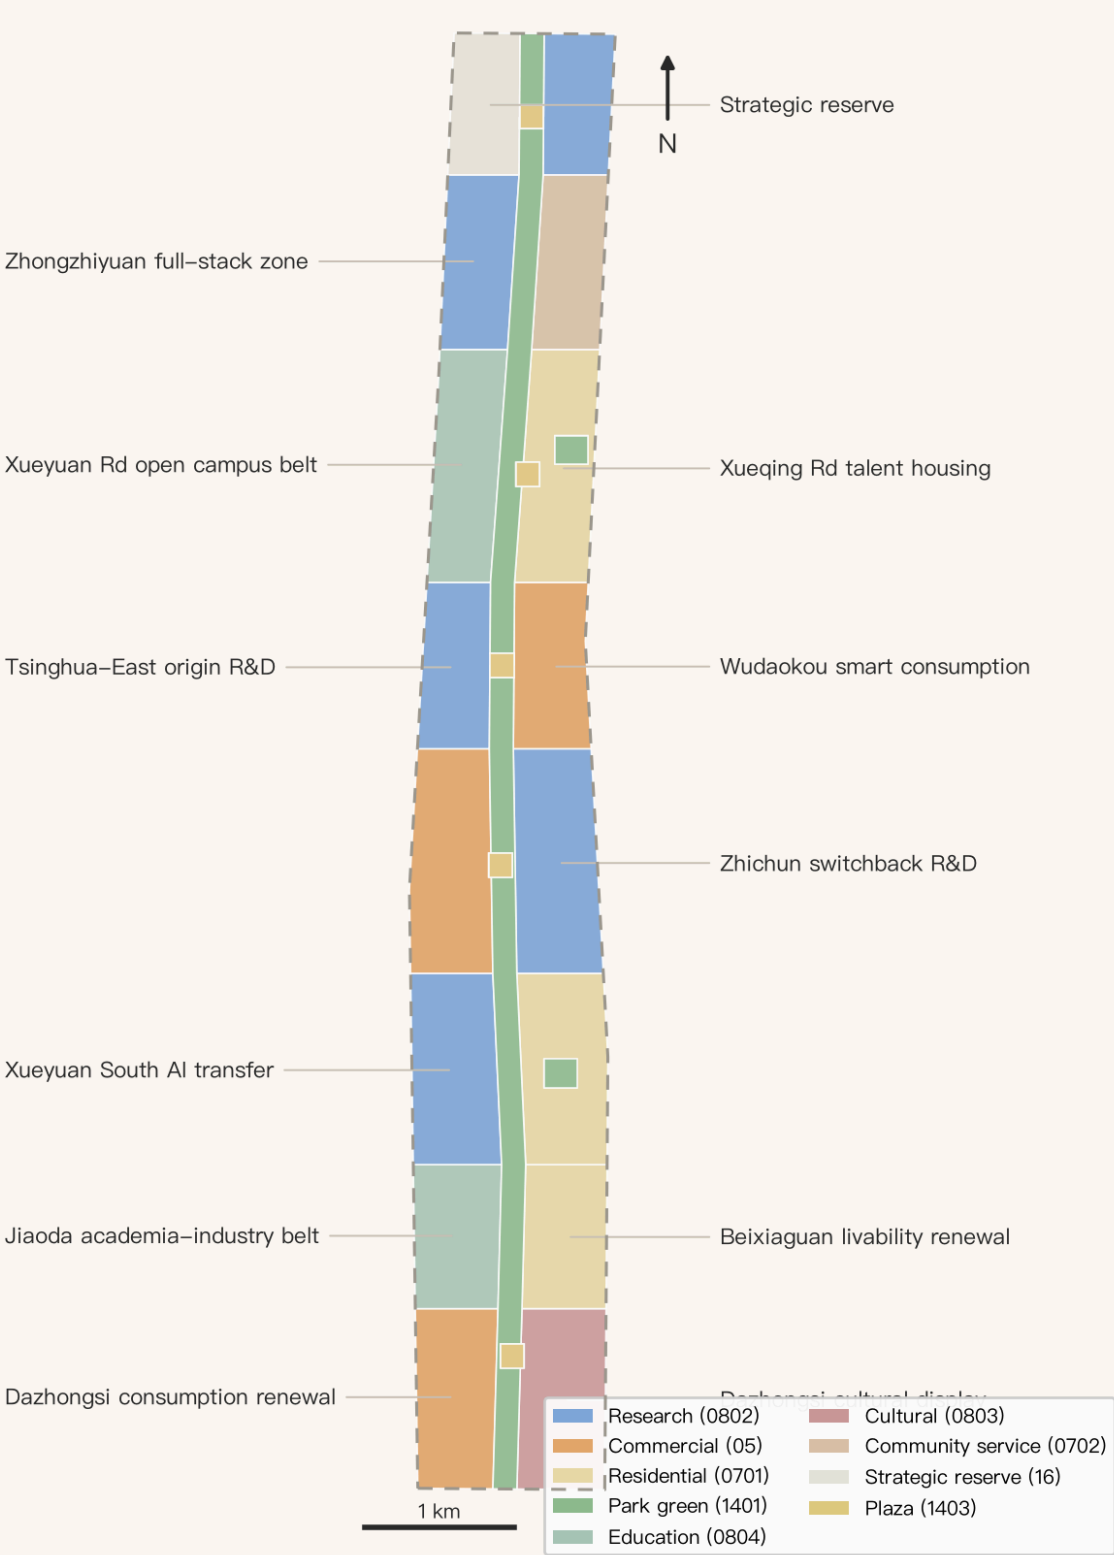

The Jing-Zhang AI Switchback — Climb by Iteration

- Spine** Jing-Zhang Heritage Park green spine, ~160 m wide
- Tracks** R&D Track (west) × Life Track (east)
- Switchbacks** Bell Stn (Dazhongsi) · Origin (K5) · Summit Stn
- 7 Stitches** seven E-W stitching streets mend the severance
- 10 Waypoints** K0 at the south gateway; AI kilometre-zero at K5

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

Scope transmission & land-use structure · 24 cells, gapless and overlap-free

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

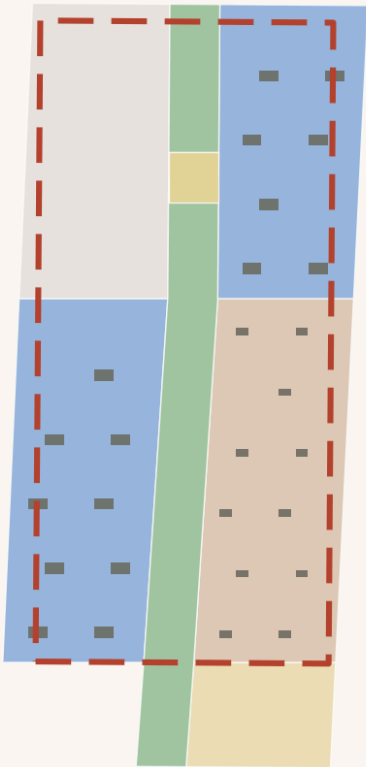

Three Key Areas • Three Missions

provisional • EPSG:4548

Three key areas • differentiated tasks of three switchback nodes

Zhongzhiyuan AI Acceleration Area

Summit Station • full-stack verification • ~192.1 ha (provisional)

Position: full-stack verification + governance

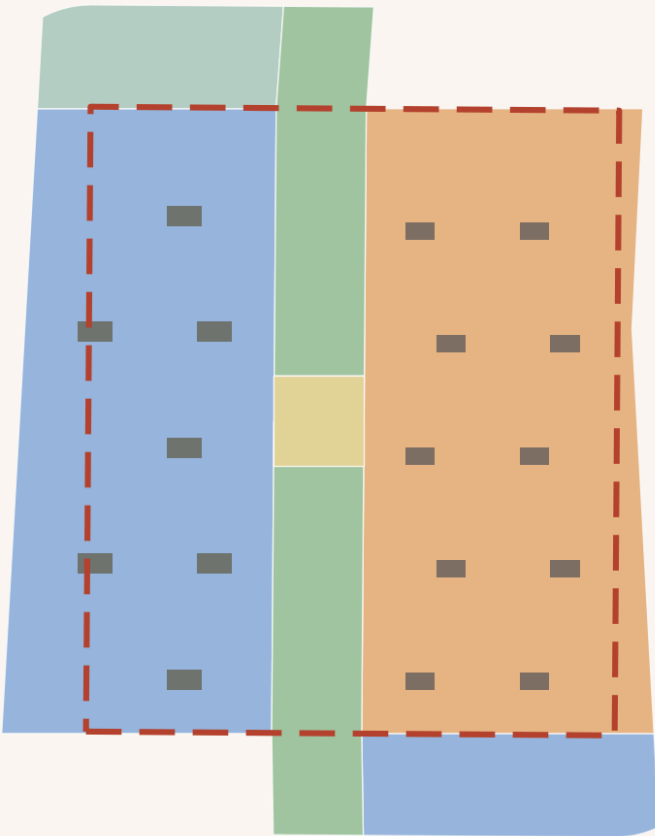

Handles: pilot plants, proving ground, reserve

Renewal: new-build led • Summit Plaza/Ren Tower

Risk: land prep & municipal capacity pending

Beijing AI Origin Community

Origin Station (K5) • innovation ecosystem • ~104.3 ha (provisional)

Position: a model community that lives

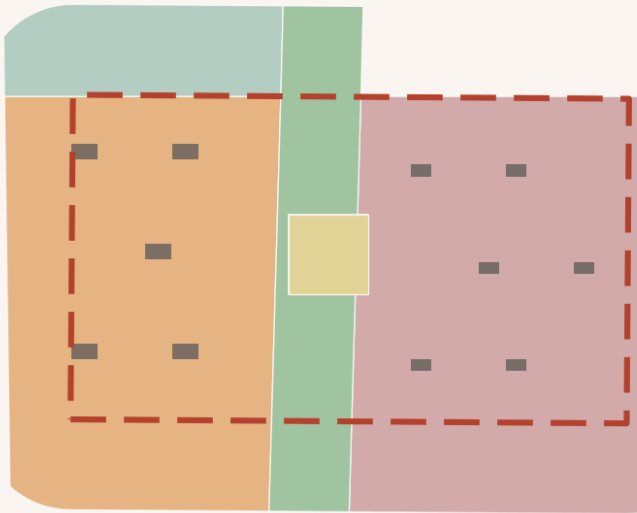

Handles: dev streetfront, K0 Plaza, agent market

Renewal: building renewal + open interfaces

Risk: campus co-building & crowd mgmt pending

Dazhongsi AI Industry Cluster

Bell Station • intelligence-native business • ~72.0 ha (provisional)

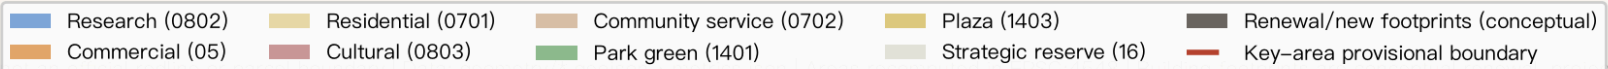

Position: intelligence-native retail flagship

Handles: mall retrofit, Bell Plaza, AI chimes

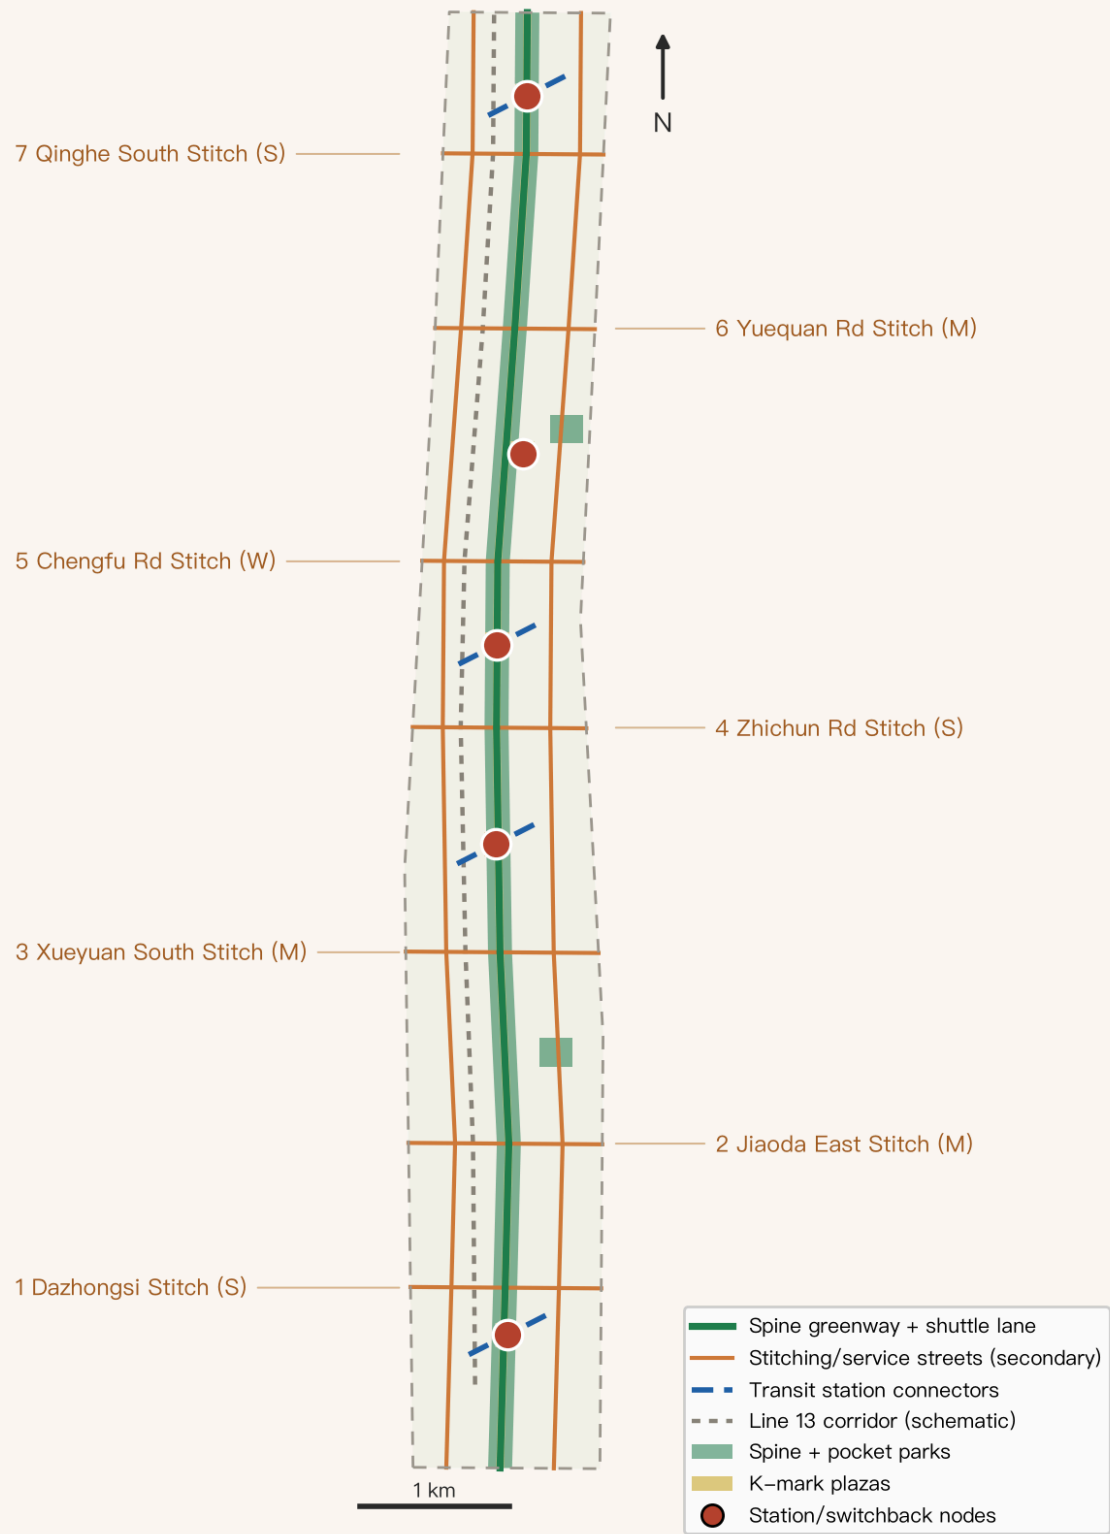

Renewal: renovation-led, heritage setbacks

Risk: conceptual until heritage assessment

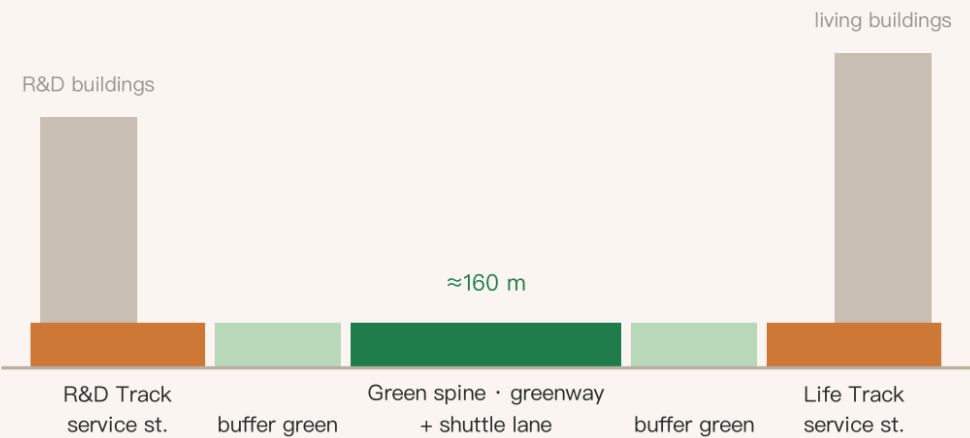

Provisional rough boundary for illustration only — Project layouts only

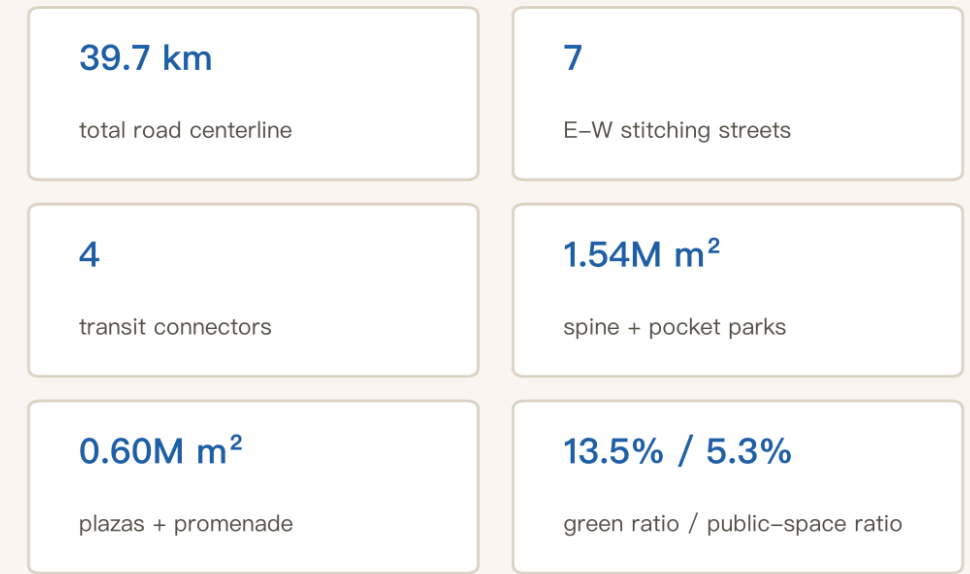

Mobility × blue-green composite · seven stitches weighted by severance (S/M/W)

Spine standard section (conceptual)

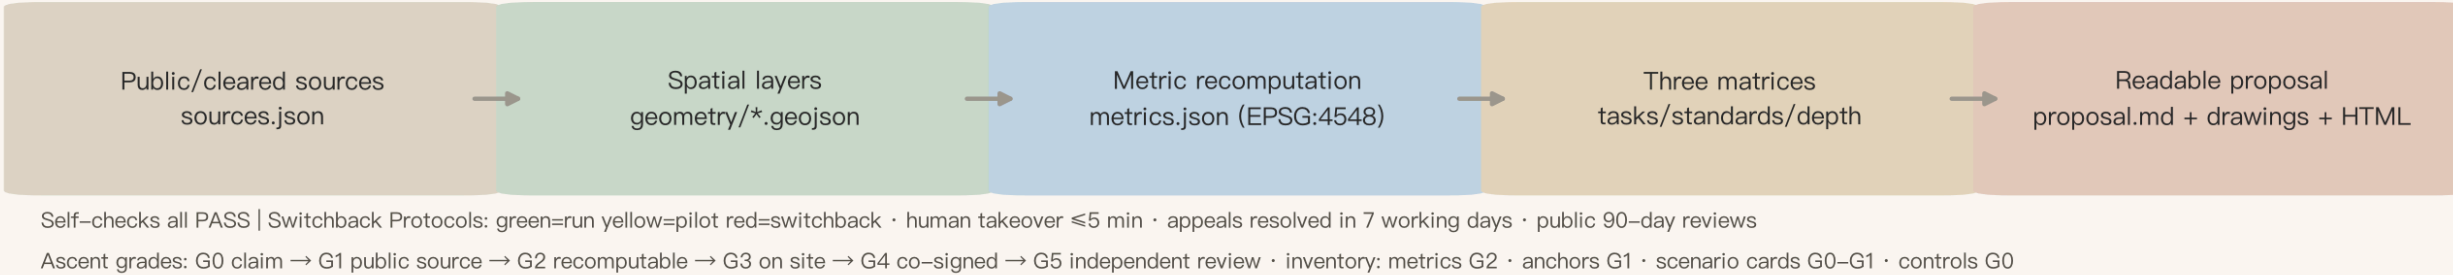

Network scale (recomputed from geometry)

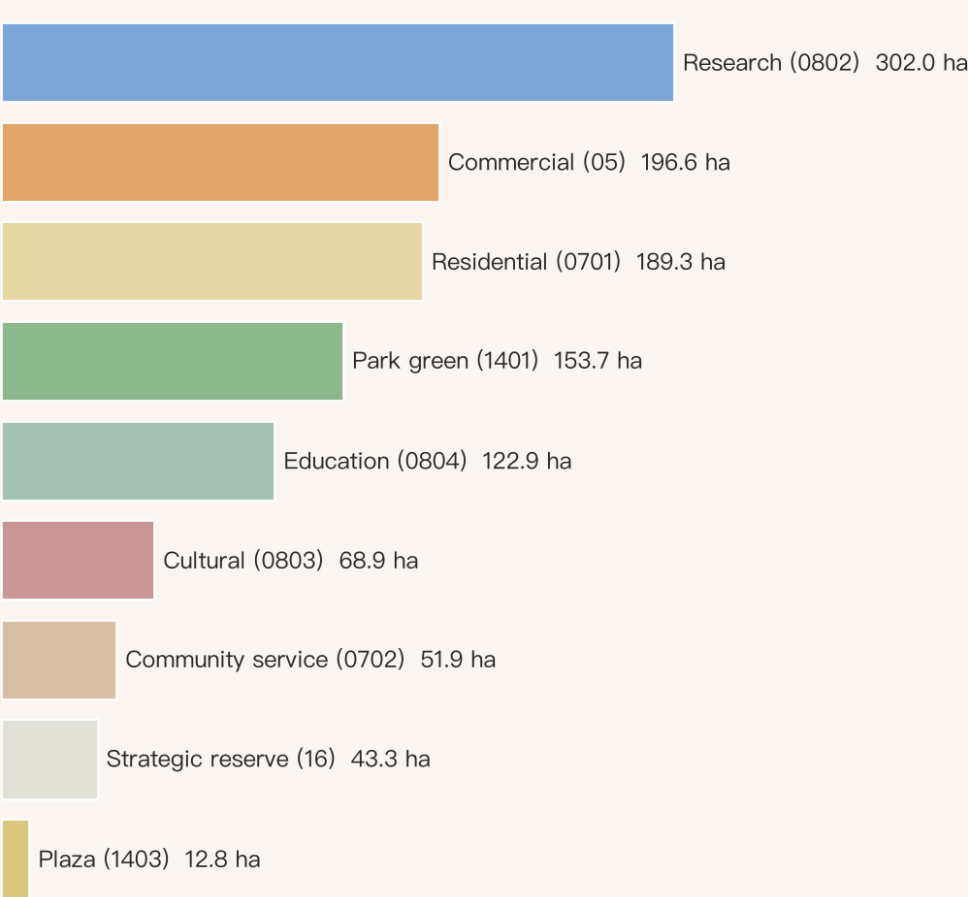

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

Core metrics • evidence chain • Switchback Protocols & ascent grades

Land-use recomputation (overlap-free union, 100% coverage)

1141.3 ha

overall area, recomputed • site_area_sqm

13.46 %

green ratio (plan layers) • green_ratio

5.26 %

public-space ratio • public_space_ratio

256k m²

renewal footprints • building_footprint_area_sqm

2.11M m²

conceptual floor area • renewal_total_floor_area_sqm

FAR: pending

official controls unpublished • floor_area_ratio=unknown

Phase areas (ha)

P1 2026–2028 / P2 2028–2031 / P3 2031–2035

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson • metrics.json | Areas recomputed in EPSG:4548 | Metric statuses and formulas in metrics.json; unknown metrics claim nothing

scenario cards

T1 • Green-spine shuttle & delivery corridor Test & verify • Greenway service lane K2-K8 Time-shared lane; no facial capture; staffed oversight, human takeover	T2 • Embodied-robot open proving ground Test & verify • Enclosed site, Zhongzhiyuan south Closed-site testing; blurred streams; ethics-board admission	T3 • AI check-up for municipal assets Test & verify • Dazhongsi legacy blocks Asset-status data only; repairs signed by humans	4 • K-mark AR history layer Culture • K0-K9 milestones On-device rendering, no upload; historian-vetted
5 • Developer street frontage Ecosystem • Origin community ground floors Real-name booking, anonymous display; aggregated stats	6 • Multilingual guide & accessibility copilot Public service • Whole-belt greenway & stations On-device speech; explainable routing; human fallback	7 • Elder companion & primary-care assist Livelihood • Beixiaguan renewal area AI pre-screens only; physicians decide; double review	8 • Campus-industry internship matching Academia-industry • Xueyuan Rd open campus belt Students own resumes; explainable matches; humans hire
9 • Night-economy smart governance Governance • Wudaokou consumption district Aggregated footfall/noise only; measures need local consultation	10 • Agent bazaar Ecosystem • Origin Plaza (K5) Listing needs filing & review; human arbitration	11 • Eco-sensing & bird-friendly lighting Ecology • Full green spine Environmental sensing only; expert-reviewed lighting	12 • AI chime co-creation Culture • Dazhongsi heritage zone Museum consent for bell samples; AI credit labeled

Six personas: researchers • founders • industry engineers • original residents & elders • teen families • international visitors. Every scenario embeds data minimization, human review and explainability; no un-reviewable automated decisions. Switchback Protocol (schema 0.3.0): green/yellow/red states, public 90-day reviews, three-tier archive; passing validation ≠ field efficacy — scene evidence currently G0-G2.

Renewal Projects • Phasing • Operations

14 projects, 3 phases

#	Project	Phase
①	AI-native retrofit of Dazhongsi legacy retail	Ph.1 2026-28
②	Bell Plaza & museum interface opening	Ph.1
③	Dazhongsi station TOD stitching street	Ph.1
④	Jiaoda East Rd stitch & under-bridge space	Ph.1
⑤	Southern green-spine completion	Ph.1
⑥	Zhichun switchback R&D building renewal	Ph.2 2028-31
⑦	Origin Plaza (K5) & Origin Stone	Ph.2

#	Project	Phase
⑧	Wudaokou station-front smart district	Ph.2
⑨	Mid-spine greenway & two pocket parks	Ph.2
⑩	Switchback Bridge over Line 13	Ph.2
⑪	Zhongzhiyuan full-stack innovation zone	Ph.3 2031-35
⑫	Summit Plaza & Ren Tower	Ph.3
⑬	Xueyuan Rd campus-wall opening program	Ph.3
⑭	Strategic reserve starter zone	Ph.3

Three notes: projects ①②④⑤⑨ can start with preliminary studies, tenure/heritage negotiations and light pilots (implementation still subject to tenure, heritage and land-transfer preconditions); intensity uses S1-S3 scenario envelopes with FAR = unknown; long-term operations = RENLINE Assembly + quarterly Switchback Days + Jing-Zhang AI Marathon + Bell Ceremonies + scenario vouchers + the switchback archive.

Data gaps (organizer-side; do not block content scoring)

① official redlines and precise key-area polygons; ② control indicators (FAR/height/density/green ratio/setbacks); ③ existing buildings and tenure; ④ utility capacity; ⑤ statutory heritage protection lines. Once any is published, the affected layers and metrics must be recomputed and the scheme iterated.

AI ethics & privacy

All 12 scenario cards embed data minimization, human review and explainability; no facial-recognition deployment, social credit scoring or automation without human takeover; test scenarios require insurance filing and public incident reports.

Copyright

Texts, figures and GeoJSON are AI-agent originals; site photos were taken by the human account owner (2026-08-24) and licensed for in-package display; this booklet and the HTML reports use Noto Sans SC (SIL OFL 1.1, embedded subsets); physical display of historical imagery, museum bell samples, personal names, code and papers requires prior consent or open licenses; logo and wayfinding are directional descriptions only. See report/copyright_statement.md.

Boundary of claims

This is an open, co-created conceptual suggestion / reference scheme for professional teams to deepen; it does not replace statutory planning and constitutes no government-approved conclusion, statutory control-plan judgment, engineering feasibility, investment estimate or implementation commitment. “Station names” , “landmarks” and “events” are brand and operations concepts.

Responsibility & iteration

Generated by an AI agent (Claude Fable 5, GitHub: chucky1102); the human account owner is responsible for the submission. The scheme keeps iterating with the taskbook, data and community feedback — reviews via Issues and PRs are welcome.
