

CENTENNIAL JING-ZHANG AI BELT

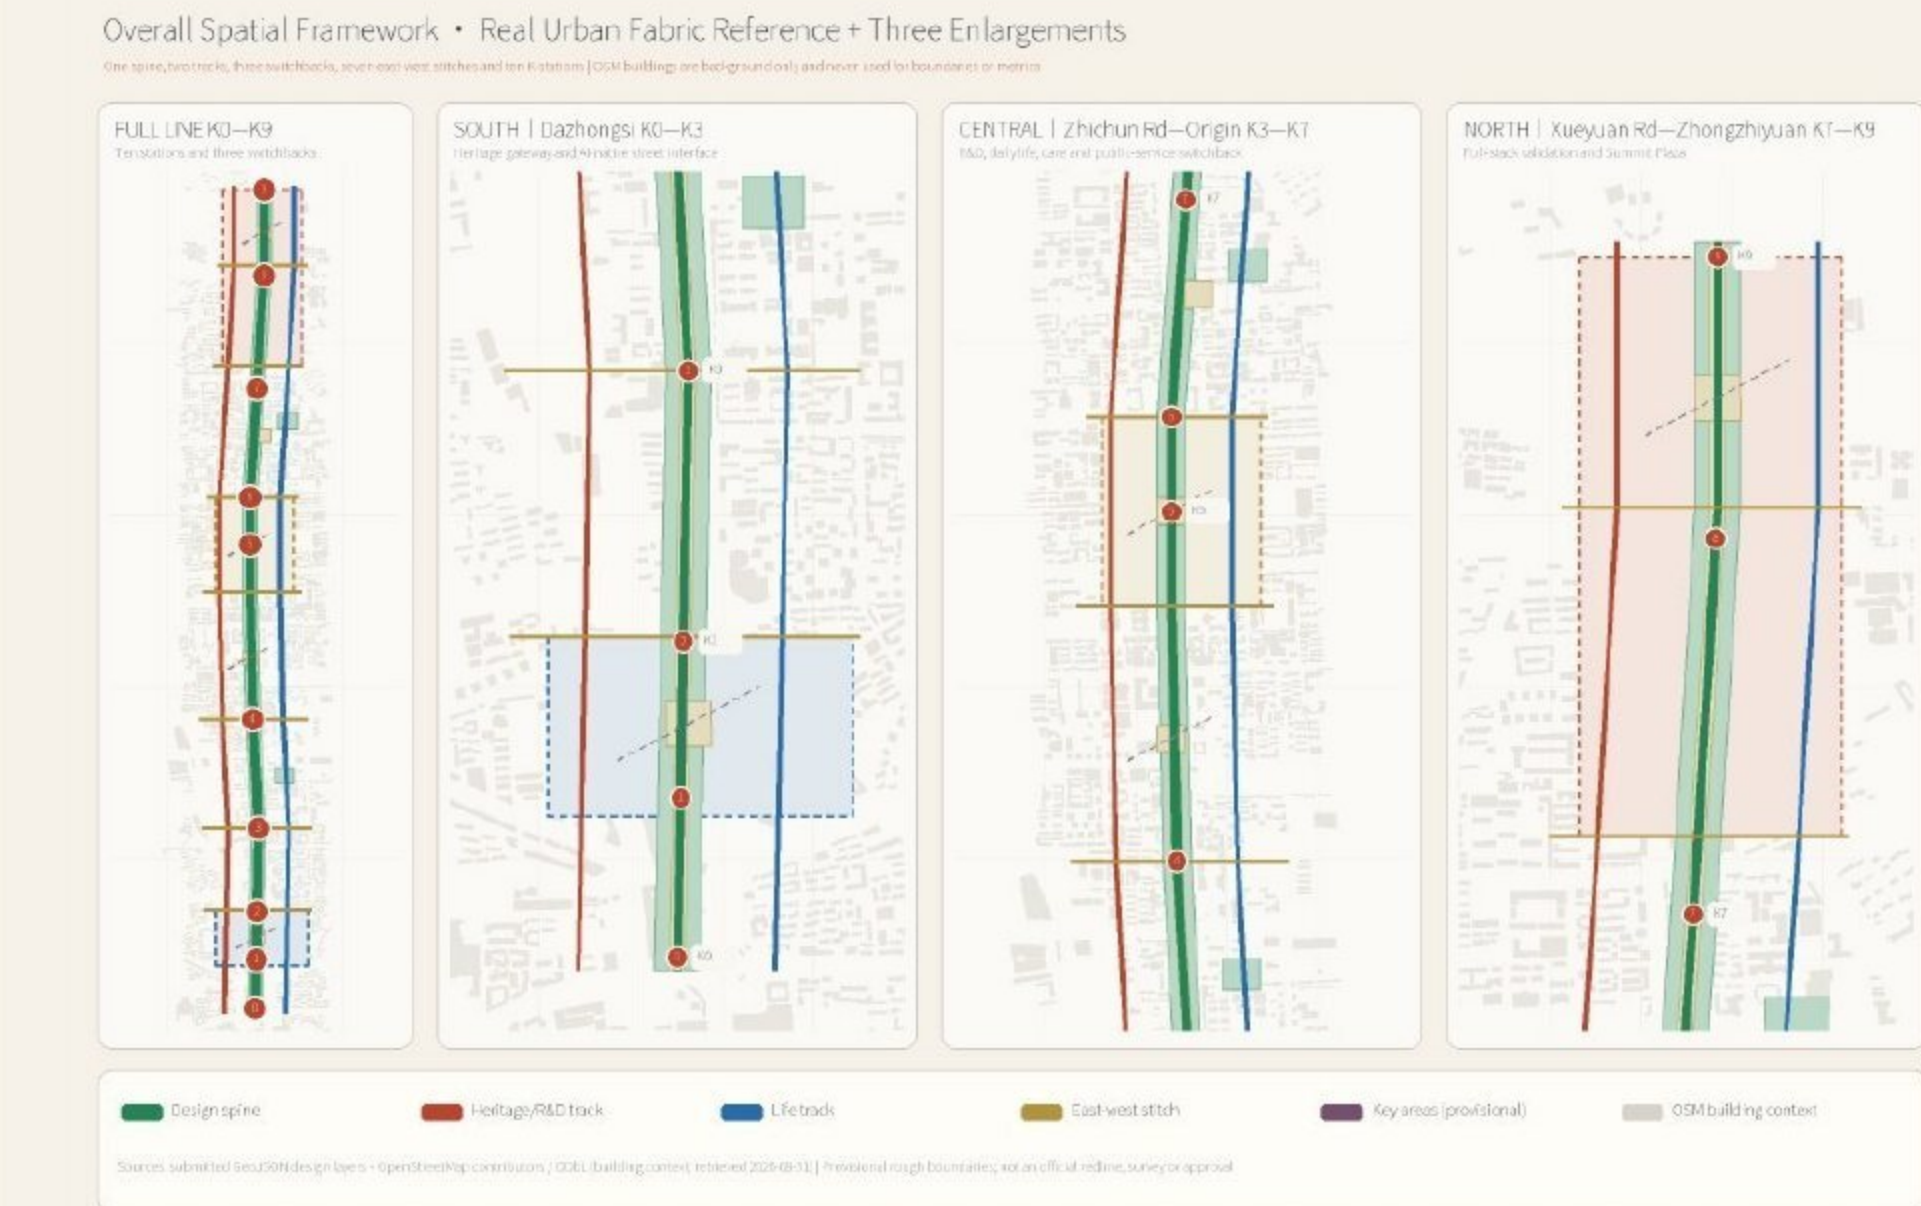

v1.9 • 2026.08.31

ONE SPINE • TWO TRACKS • THREE SWITCHBACKS • CLIMB BY ITERATION

K5 BEIJING AI ORIGIN COMMUNITY • LIVING LEARNING LOOP

AI-GENERATED CONCEPT • 10 INTERNATIONAL PRECEDENTS STUDIED THROUGH 11 FIRST-PARTY SOURCES • NO CASE, FIELD OR PEER IMAGE SUPPLIED • NOT A SITE PHOTO, SURVEY BASE OR APPROVAL RENDERING

HERITAGE AS AN EVERYDAY FRAME

Rail memory survives as fine paving traces and reused structures, not a locomotive display dominating the scene.

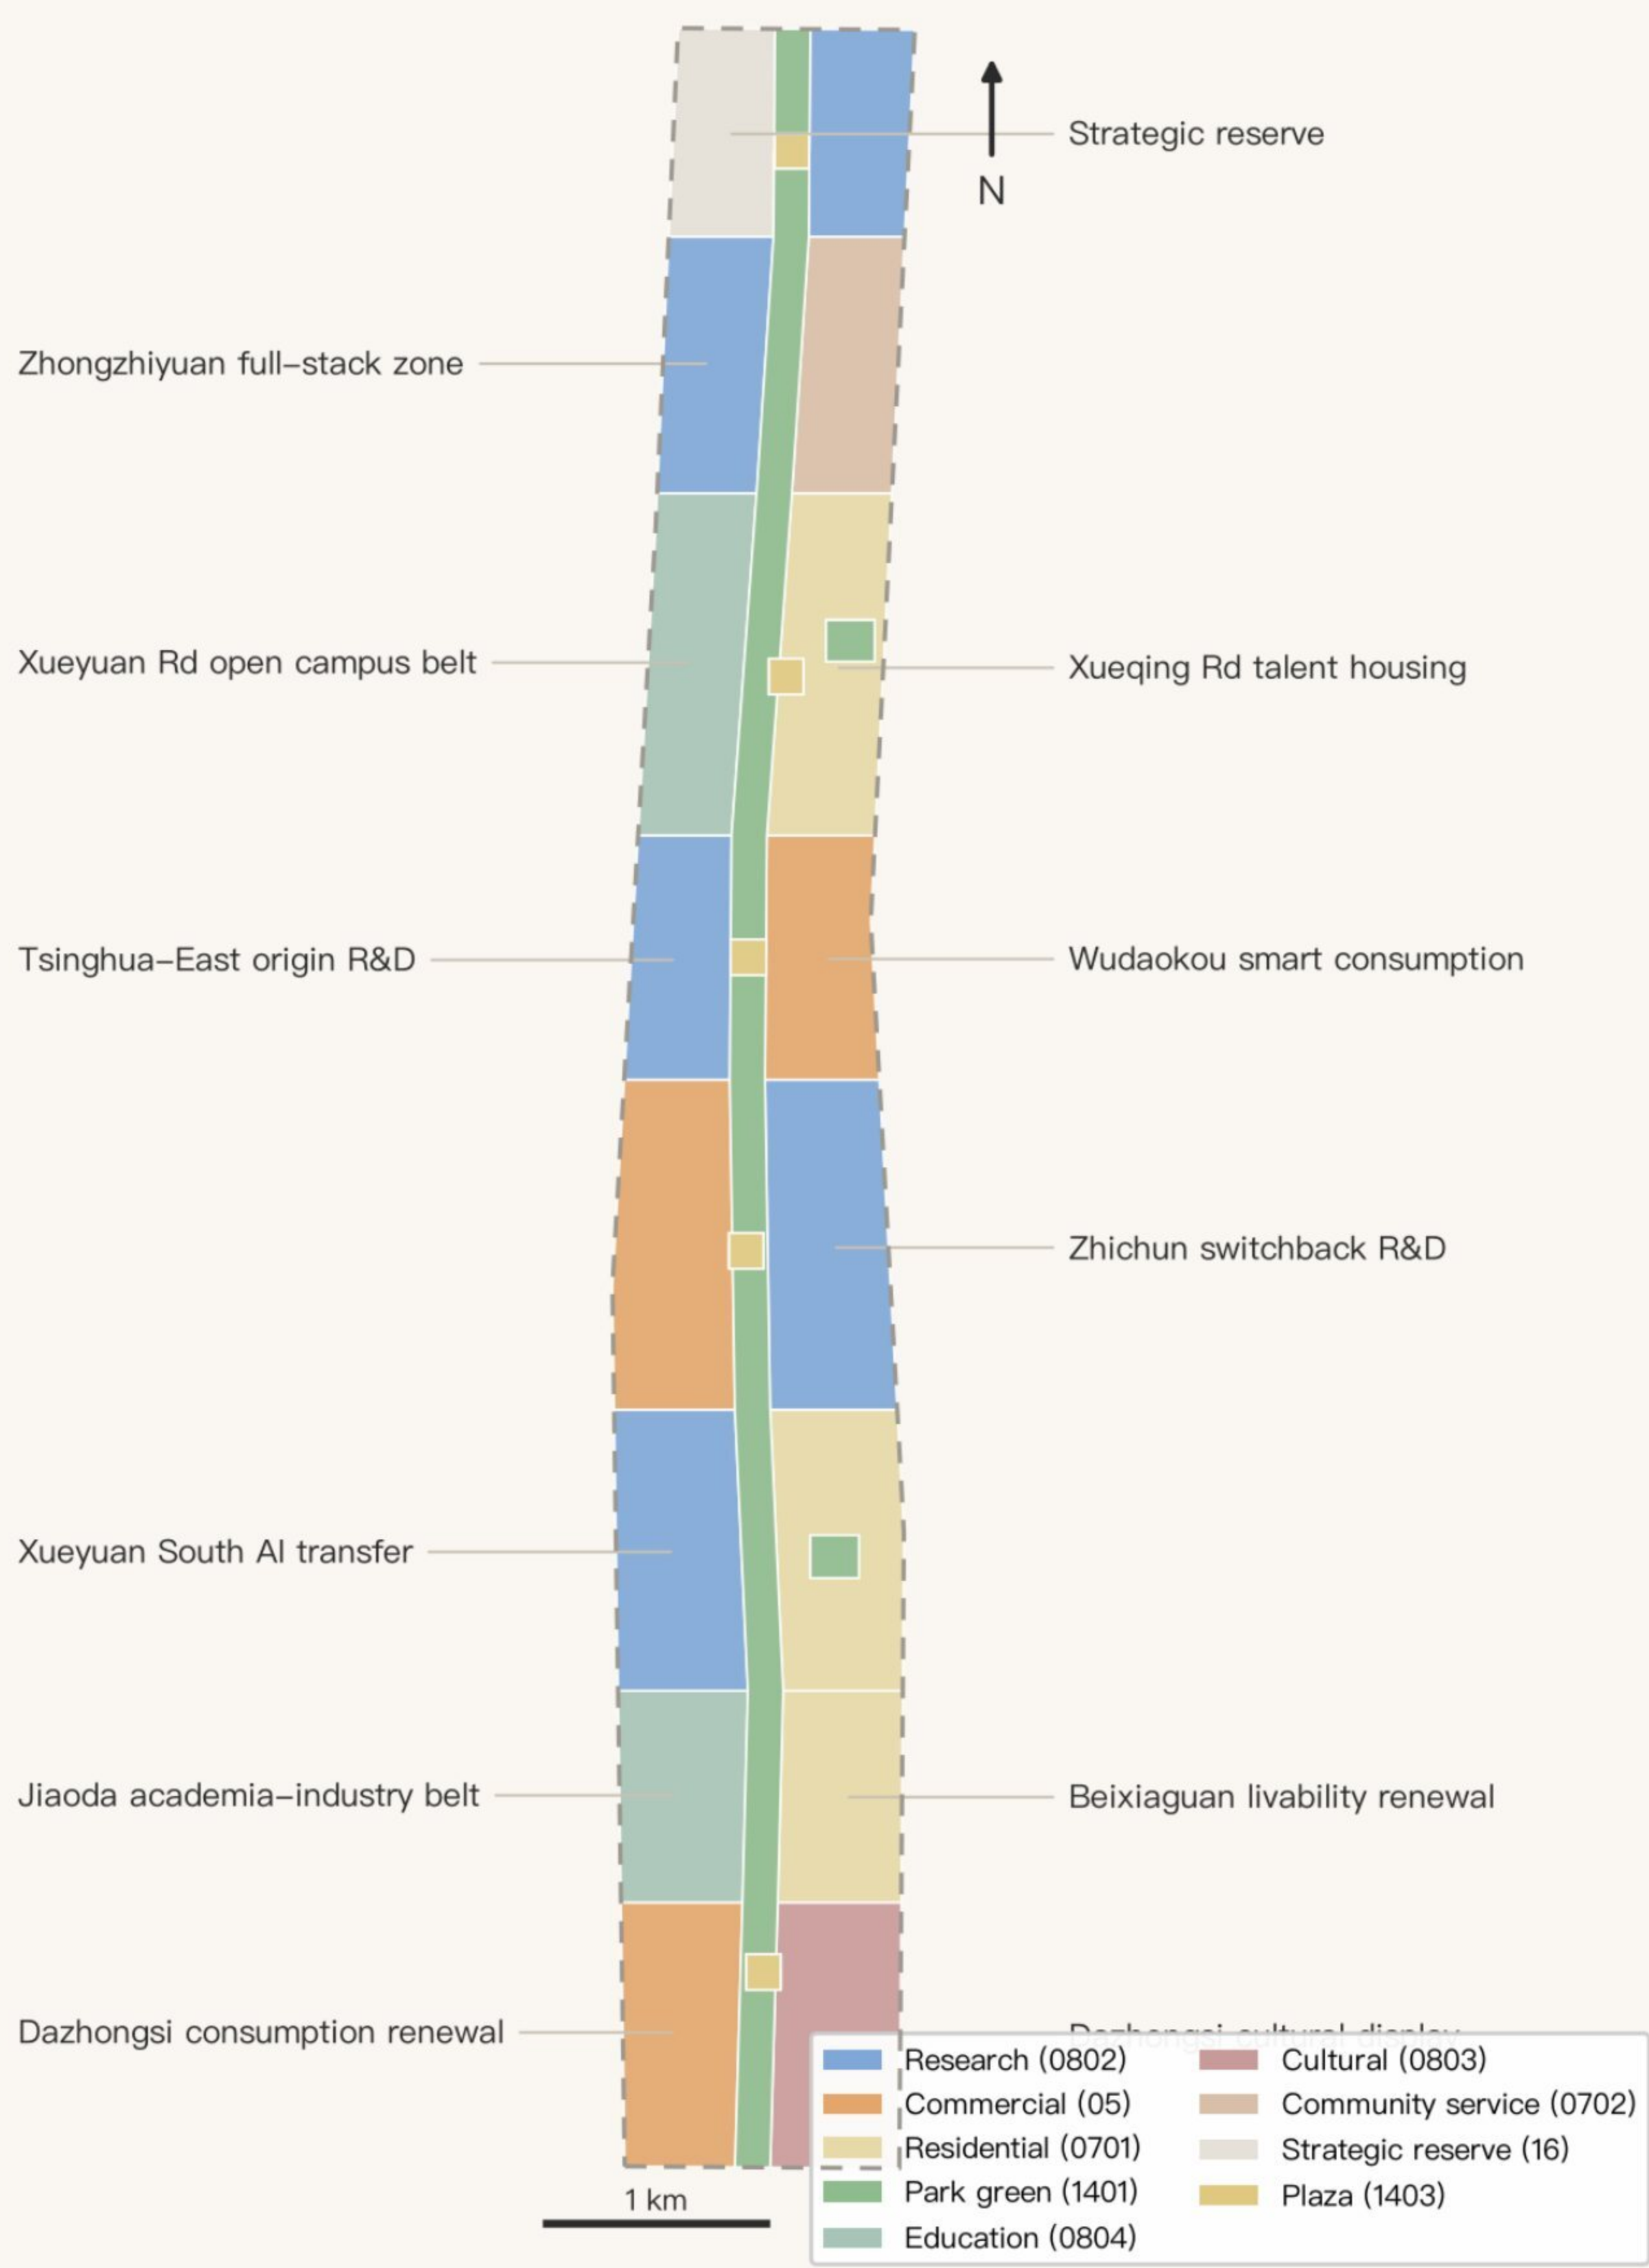

A COMPLETE COMMUNITY

Research, housing, services, active developer frontages, shared courts and collaboration bridges form one living-learning loop.

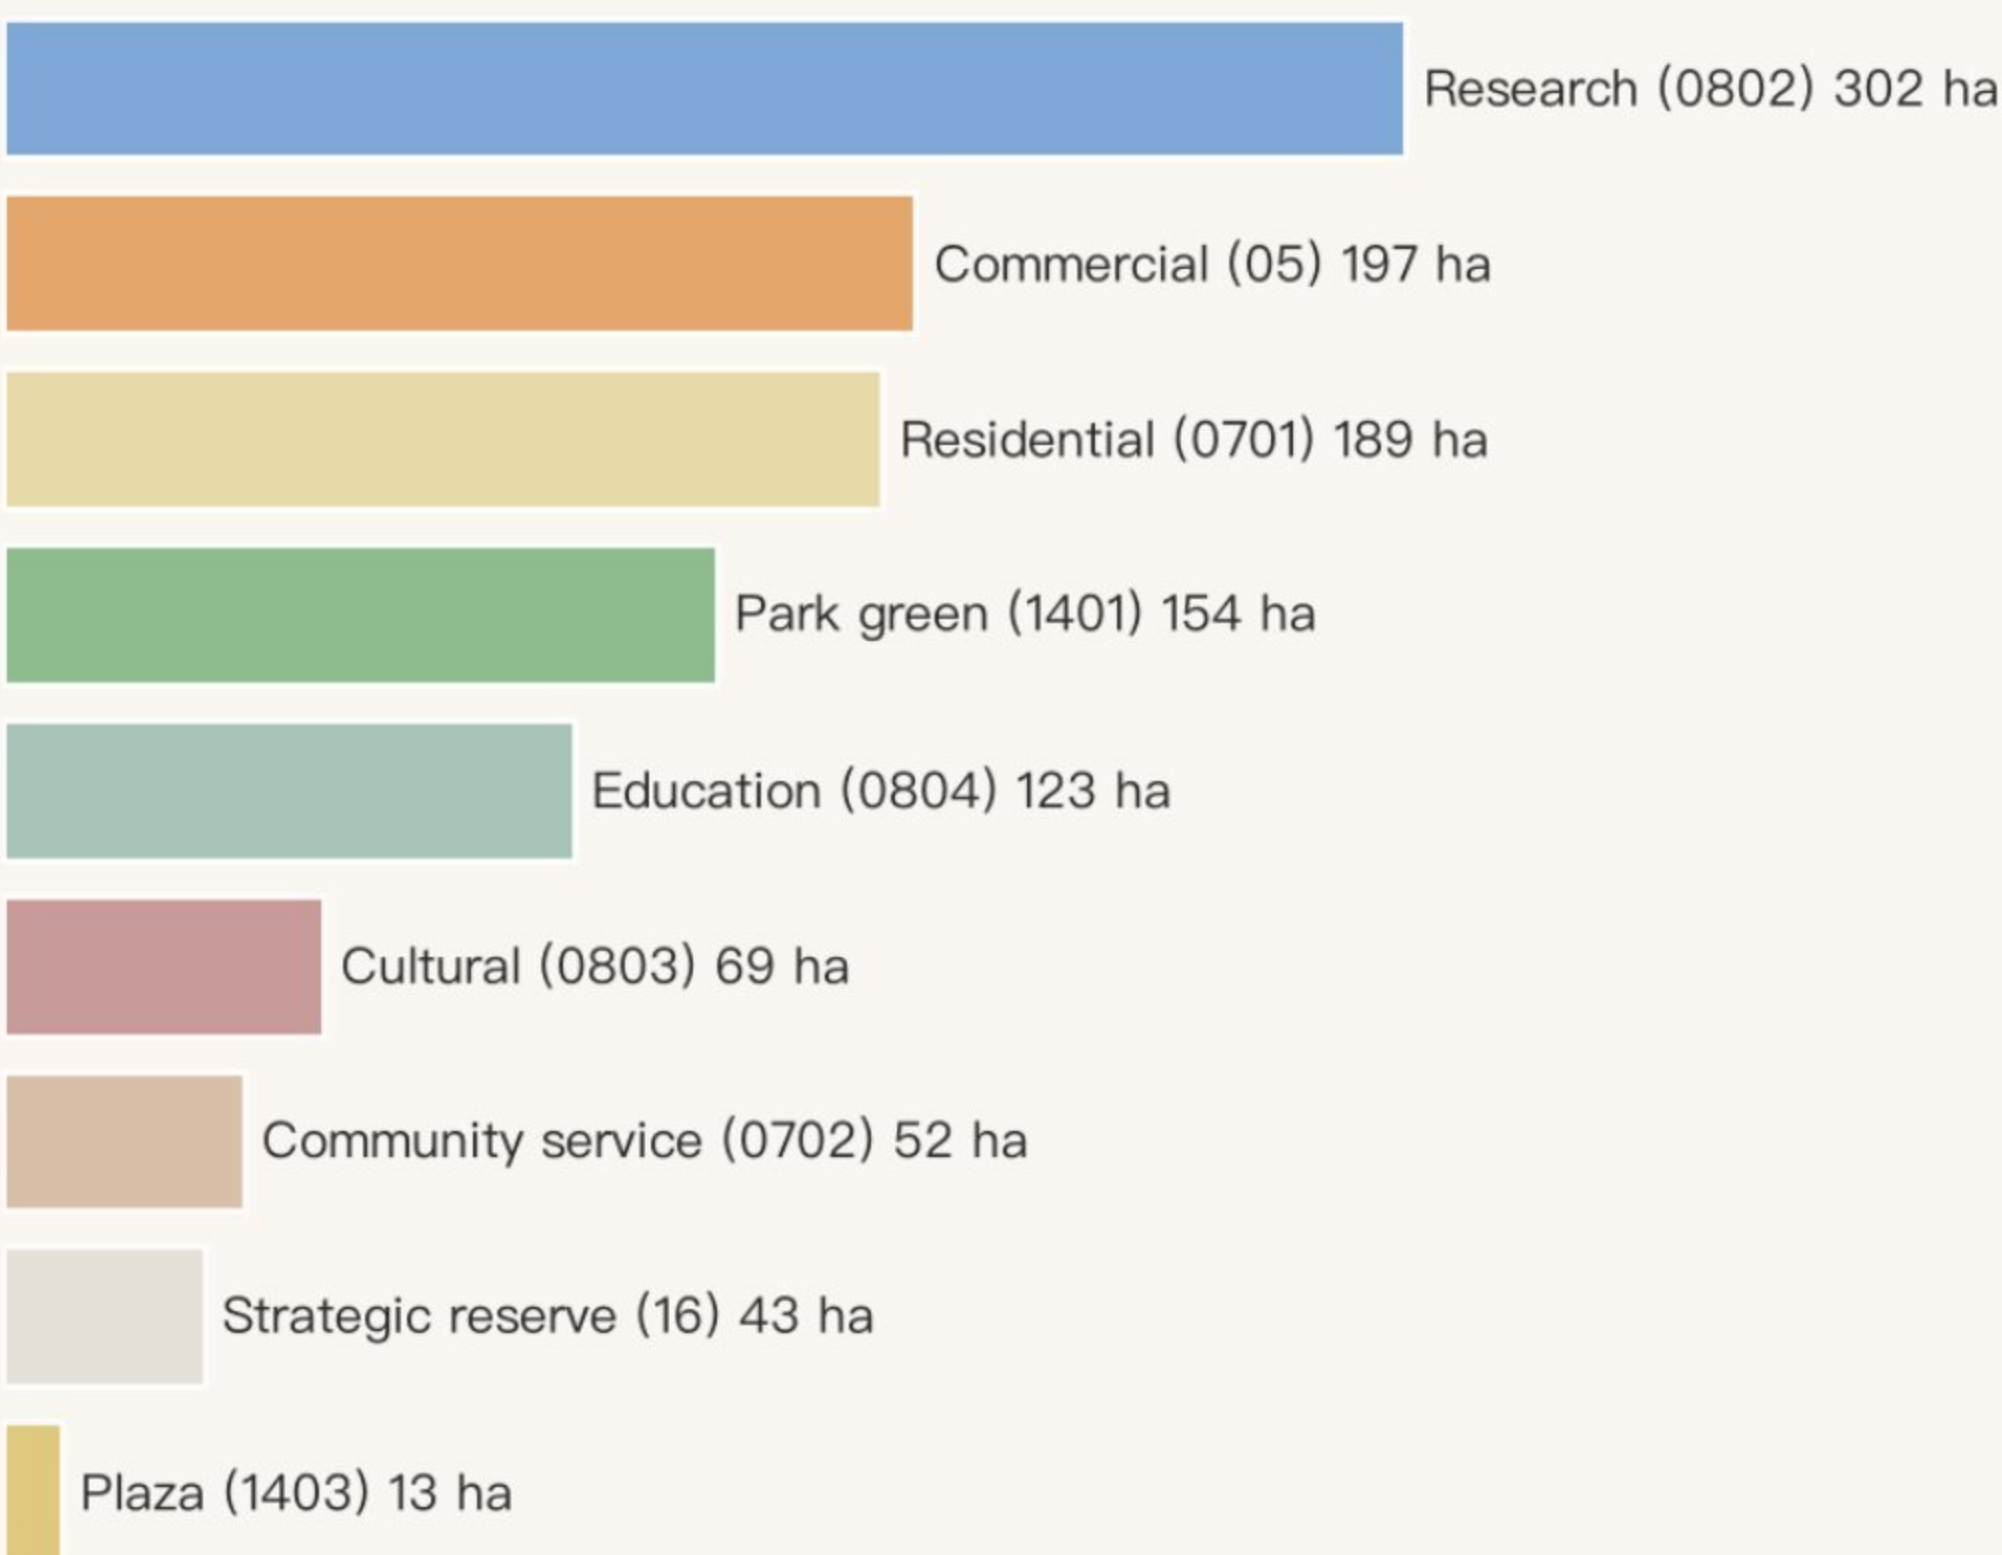

AI REVERSIBLE, PUBLIC LIFE CONTINUOUS

Modular services and the test lane stay at the edge; an accessible ground network and human service path remain.

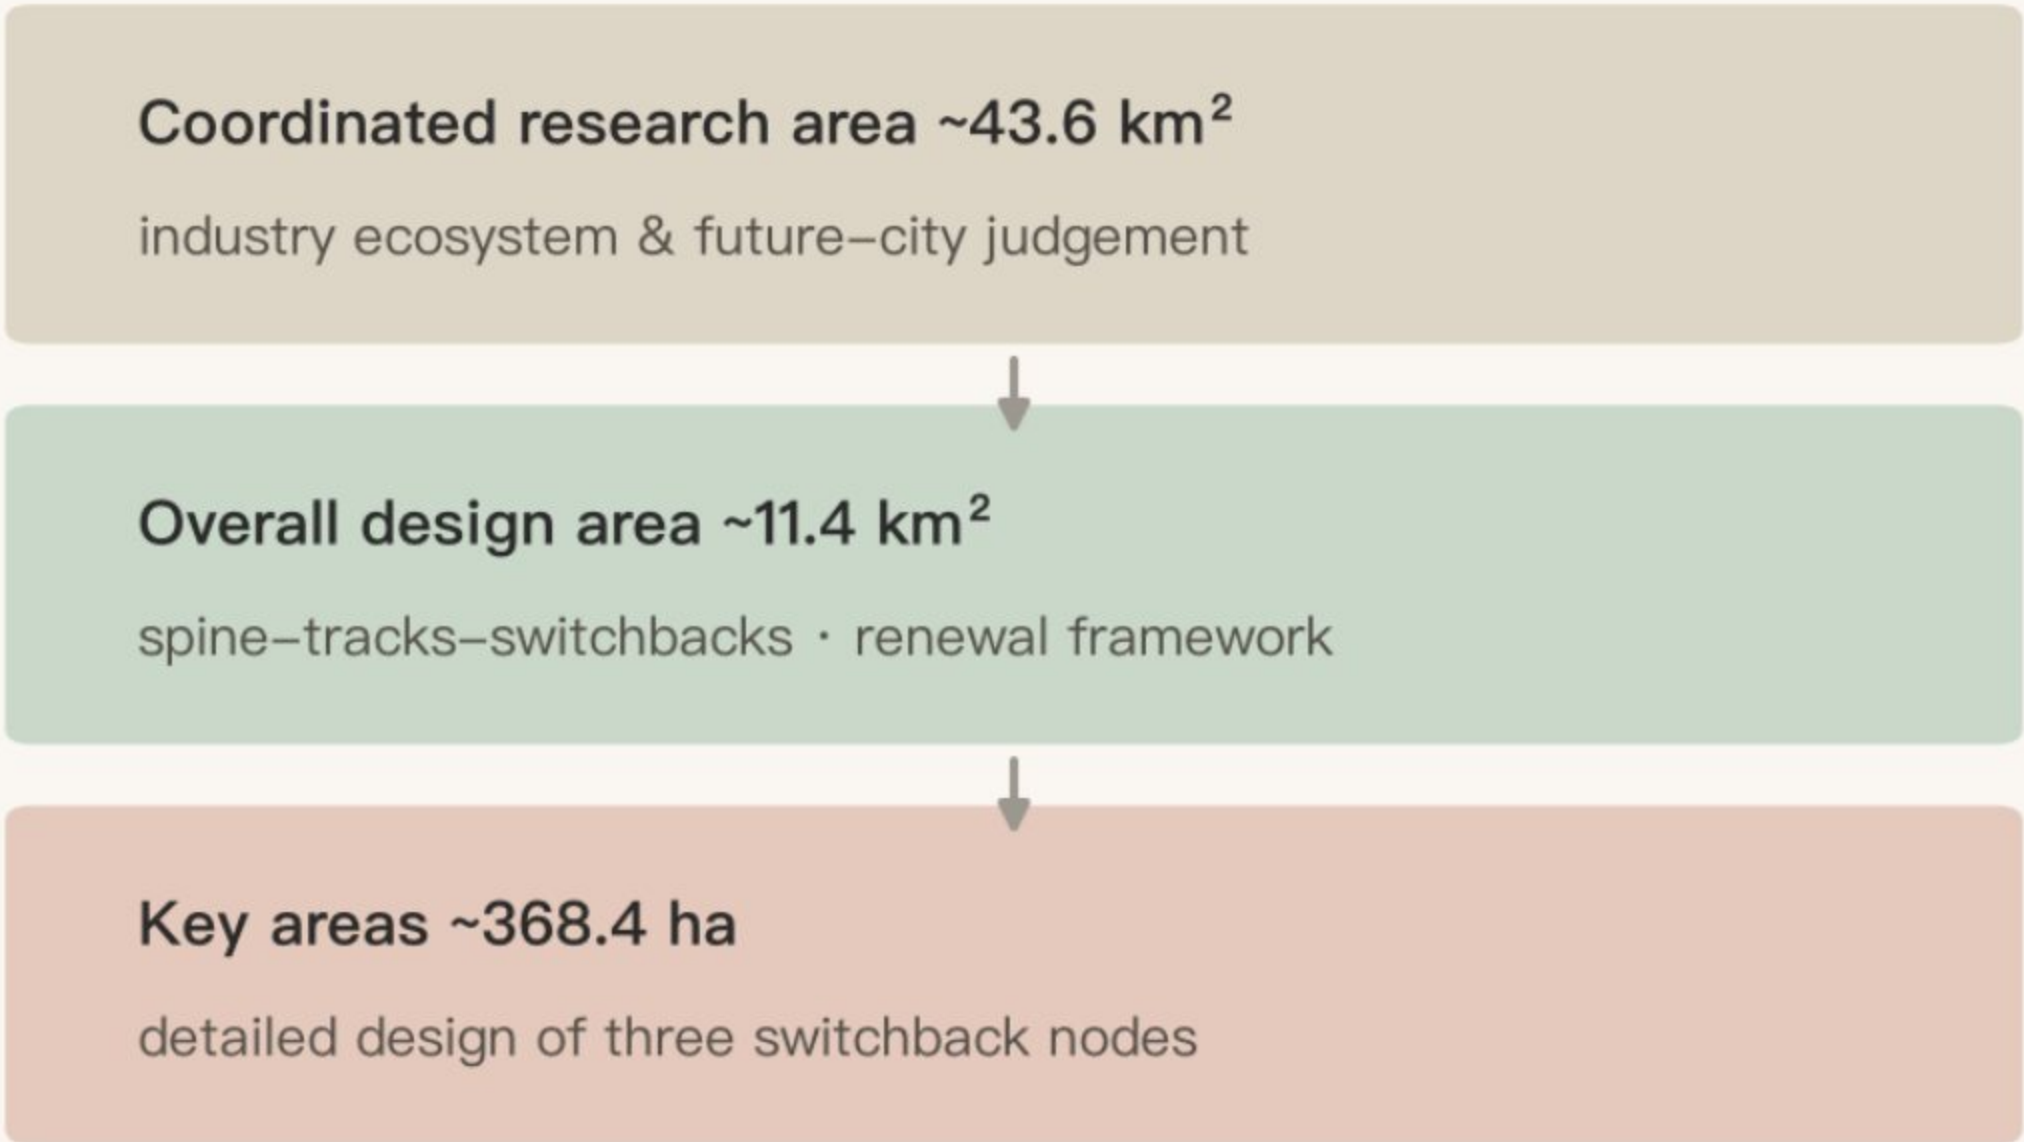

Scope transmission & land-use structure · 24 cells, gapless and overlap-free

Land-use structure (ha, EPSG:4548)

Three-level transmission chain (provisional)

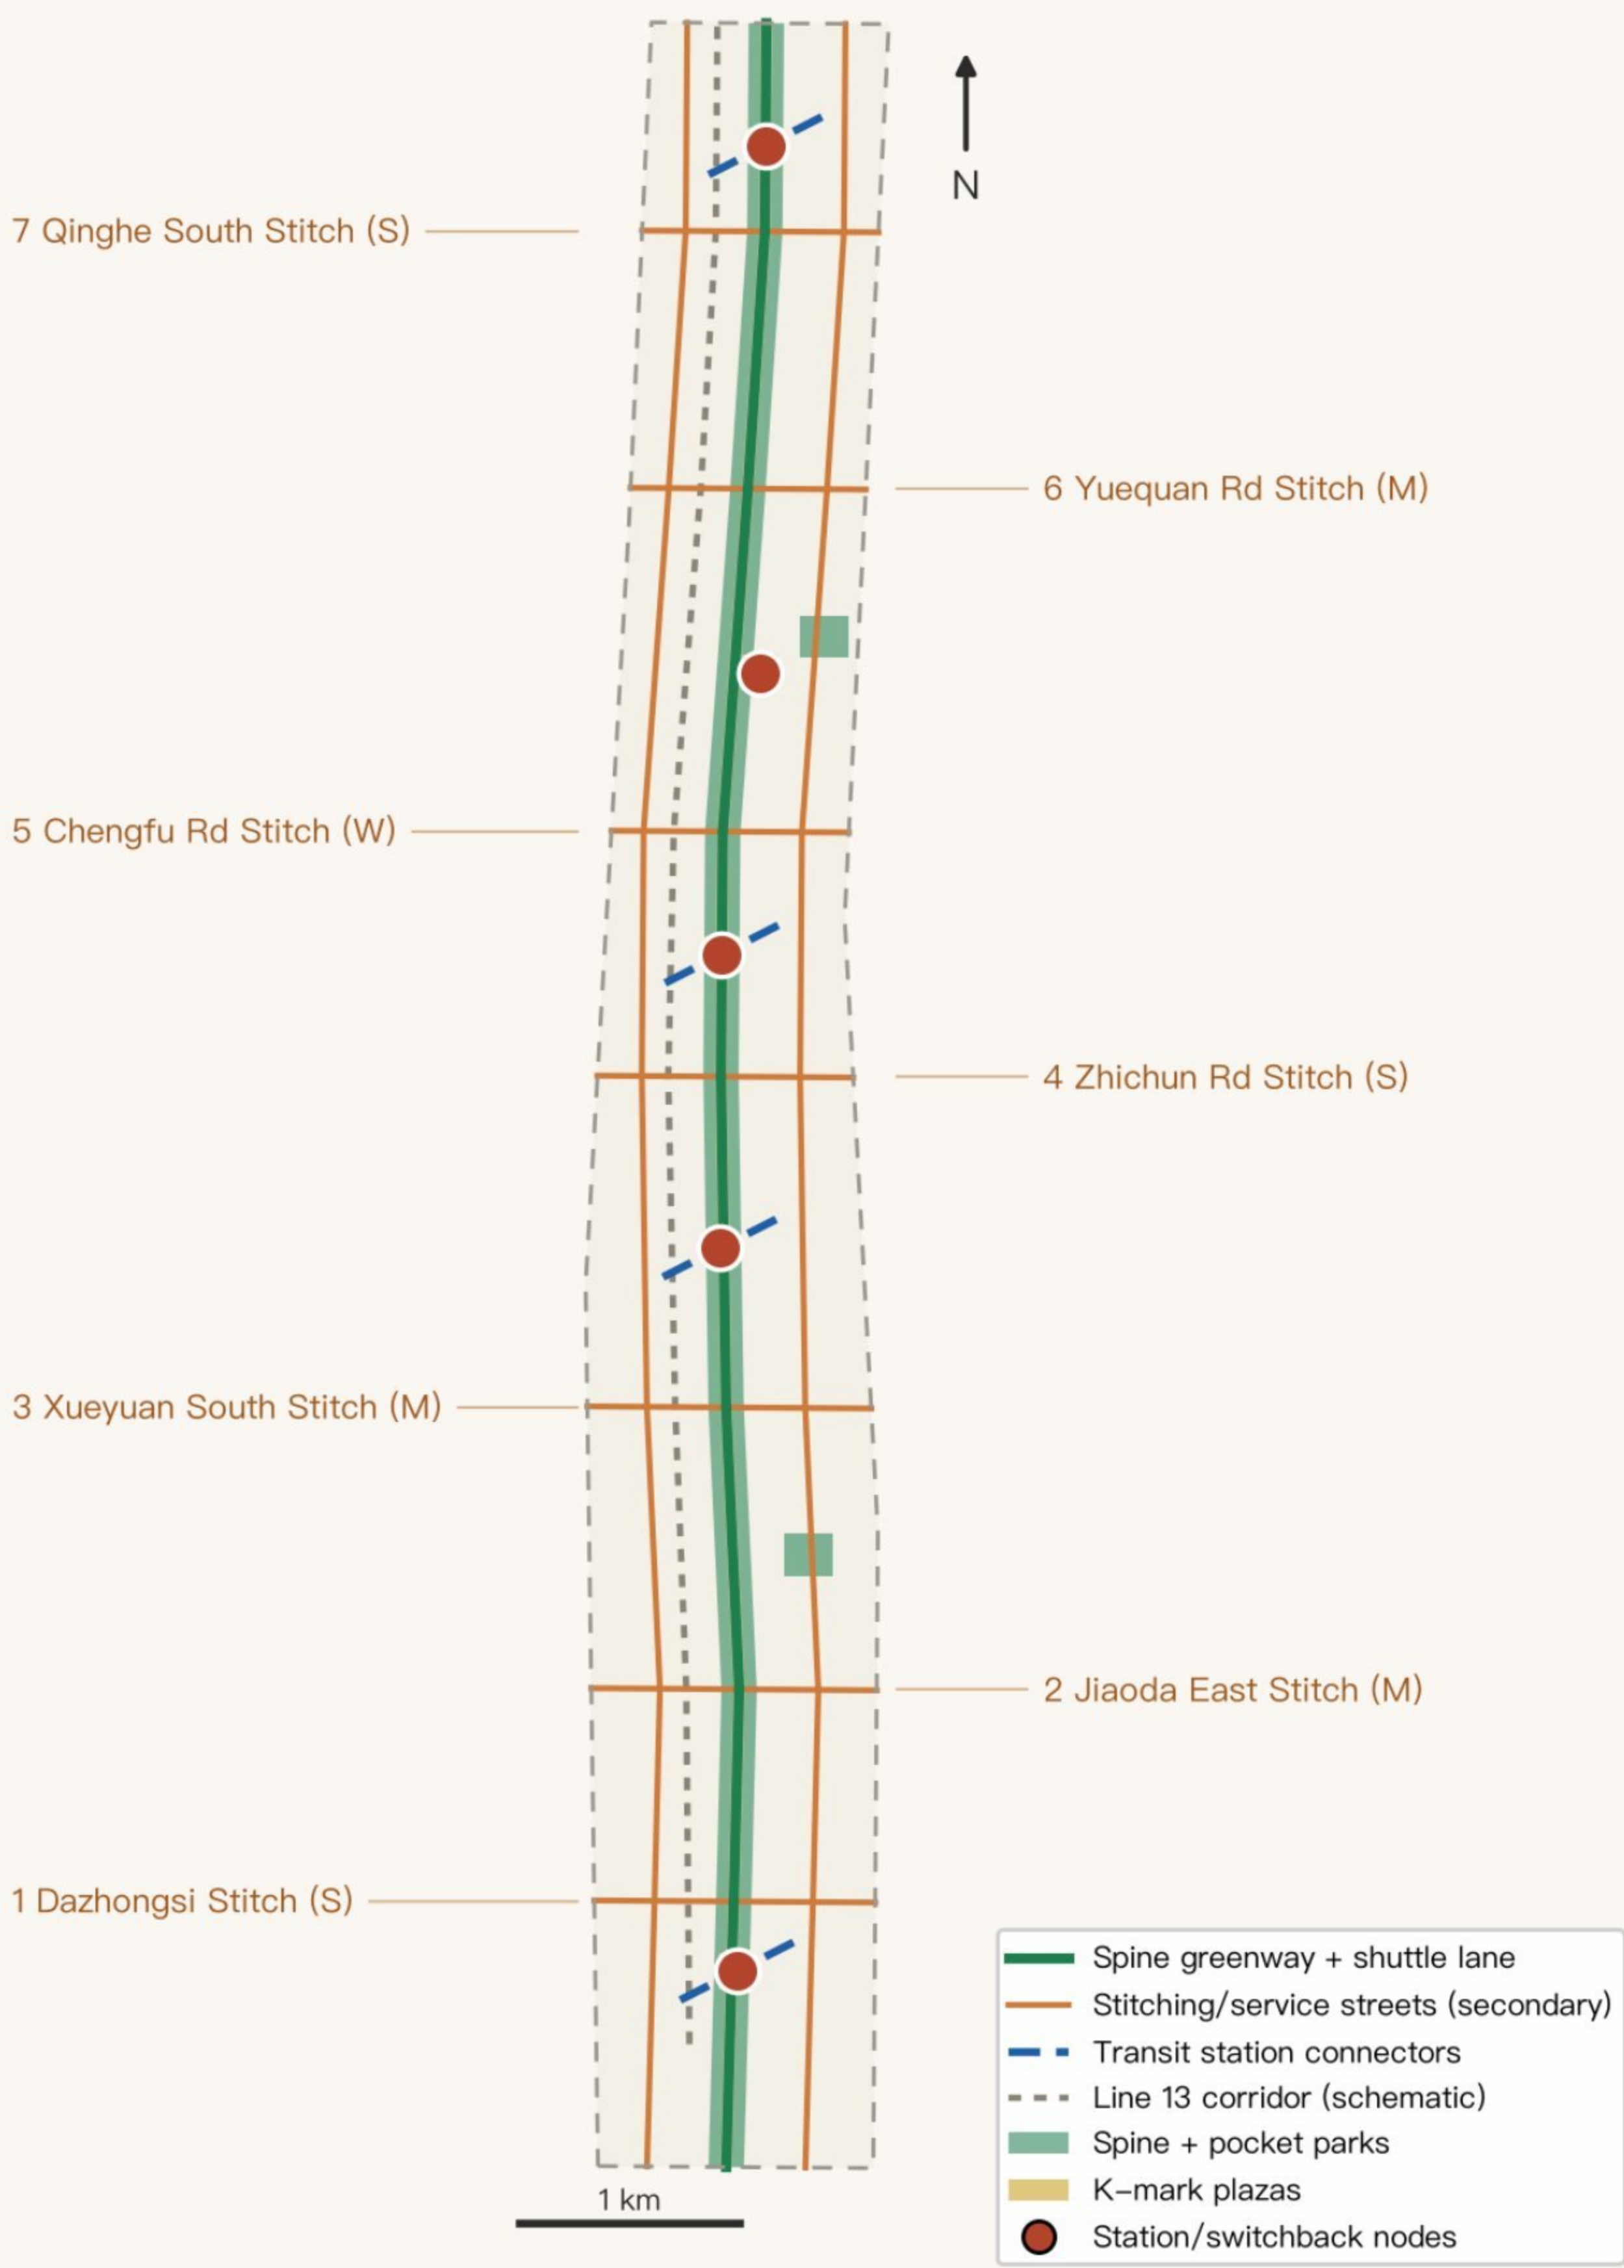

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

24 design units with shared cut boundaries — no gaps, no overlaps, fully recomputable. R&D 3.02M m² · commerce 1.97M m² · housing 1.89M m² · green 1.54M m² · education 1.23M m². Stock-first with acupunctural additions: south retrofit / middle renewal with opened interfaces / north new-build plus a 430k m² strategic reserve. No wholesale demolition; keep-adapt-remove verdicts await tenure and heritage review.

Provisional rough boundaries for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.

Mobility × blue-green composite · seven stitches weighted by severance (S/M/W)

Spine standard section (conceptual)

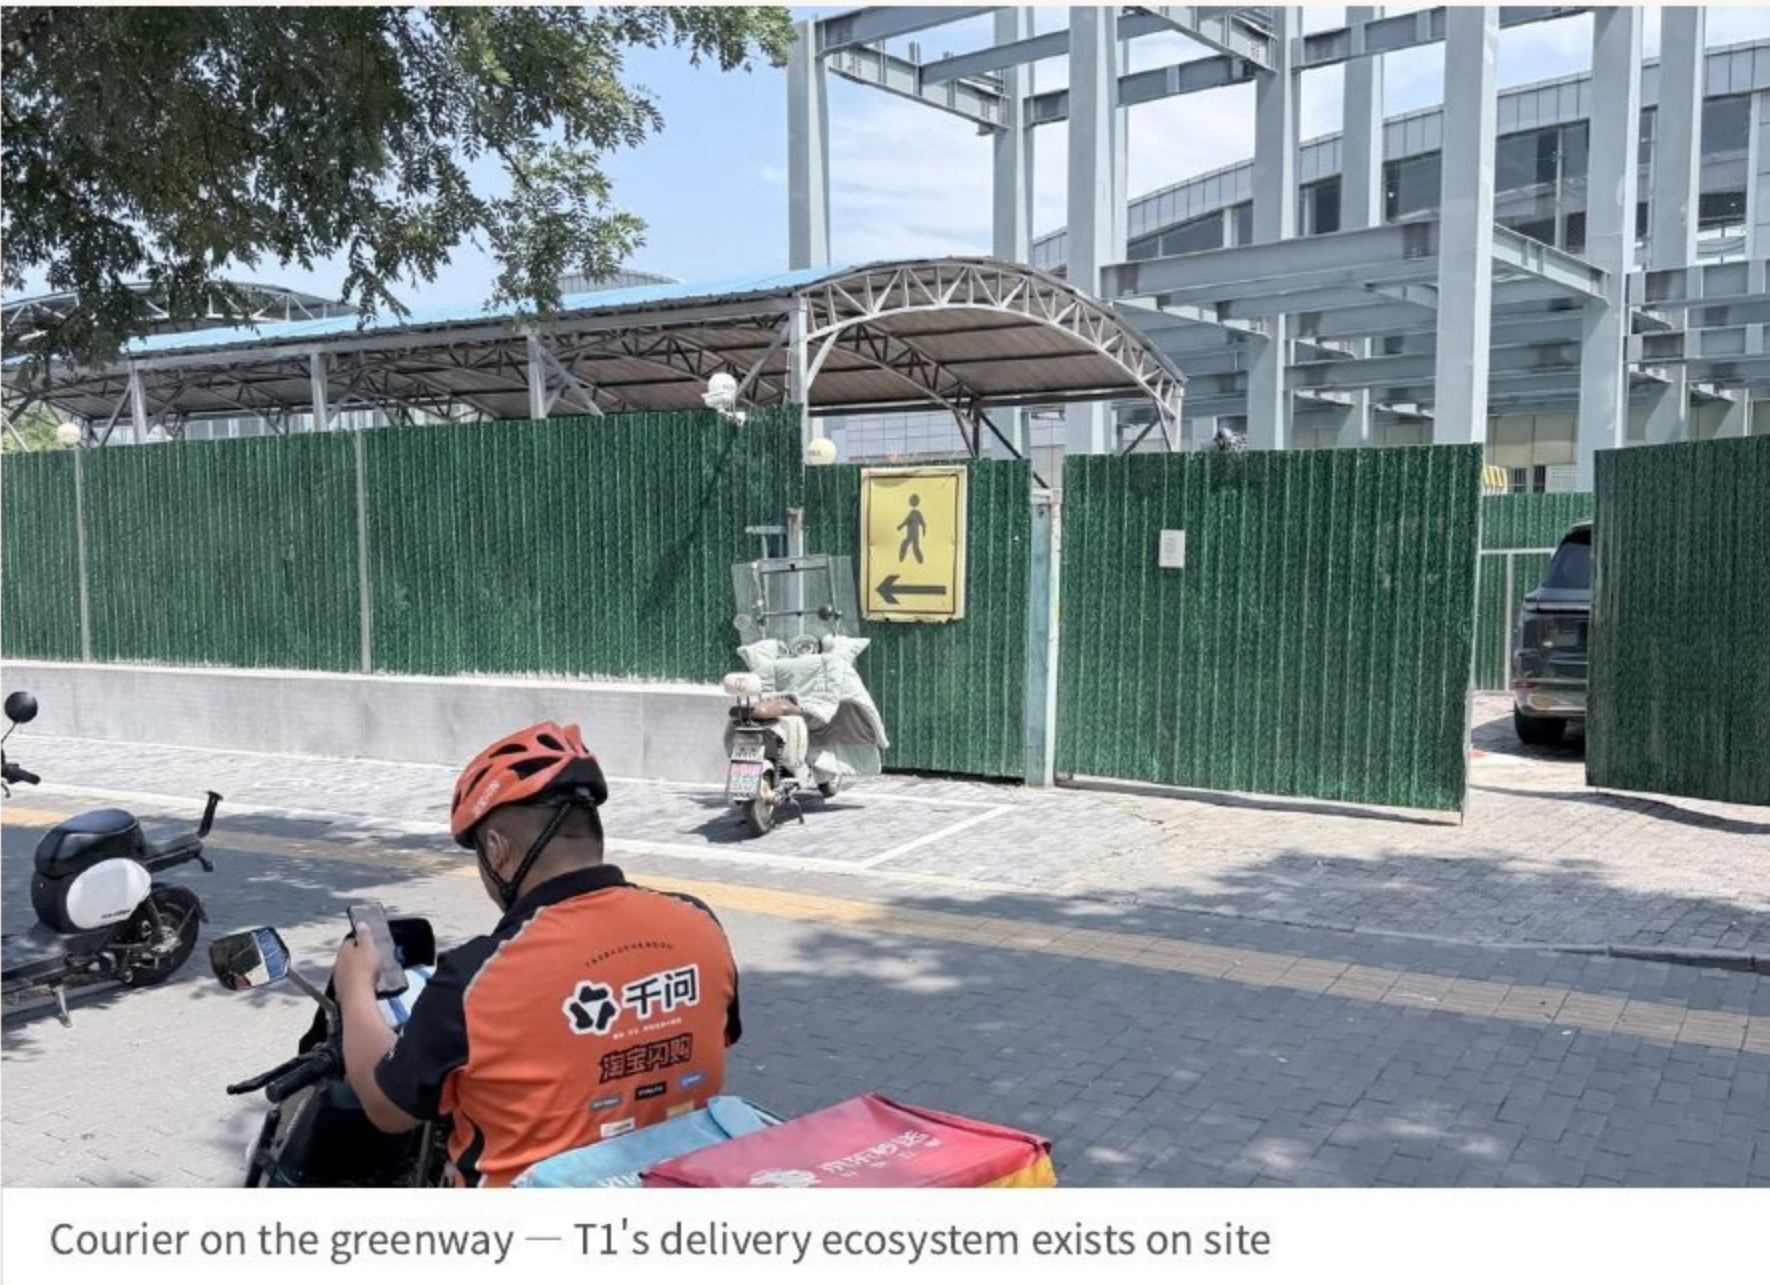

Network scale (recomputed from geometry)

39.7 km total road centerline	7 E–W stitching streets
4 transit connectors	1.54M m² spine + pocket parks
0.60M m² plazas + promenade	13.5% / 5.3% green ratio / public-space ratio

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548

39.7 km of road centerlines; seven stitching streets + two service streets + the green-spine slow path + four rail-access links. An autonomous shuttle service lane runs inside the spine (test scenario T1). New infrastructure: PV canopies with storage demo, edge-compute waypoints, a city sensing base (no facial capture), open data interfaces for agents. Conventional utility capacity awaits official data — no conclusions drawn.

Provisional rough boundaries for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.

Green spine = the belt's shared living room

Green ratio 13.46% (scheme layers: spine + two pocket parks, 1.537M m²); public space 5.26% (promenade + five K-mark plazas, 0.60M m²): Bell Plaza • Zhichun Switchback Plaza • **Origin Plaza (K5)** • Xueyuan Stitching Plaza • Summit Plaza.

Field survey (2026-08-24, by the human account owner)

Four Line-13 stations plus a Phase-1 walk, Xizhimen K0 — Xueqinglu K8; 68 photos' GPS points form the track above; three anchors raised to G3 (observable on site): Phase-2 park opening, Line-13 split works, Juesheng Temple heritage. Finding: the corridor is **built, under-construction and un-renovated at once** — “Phase-2 open” is a process, not a completed state; the measured track runs partly west of the provisional boundary, logging the boundary offset as evidence.

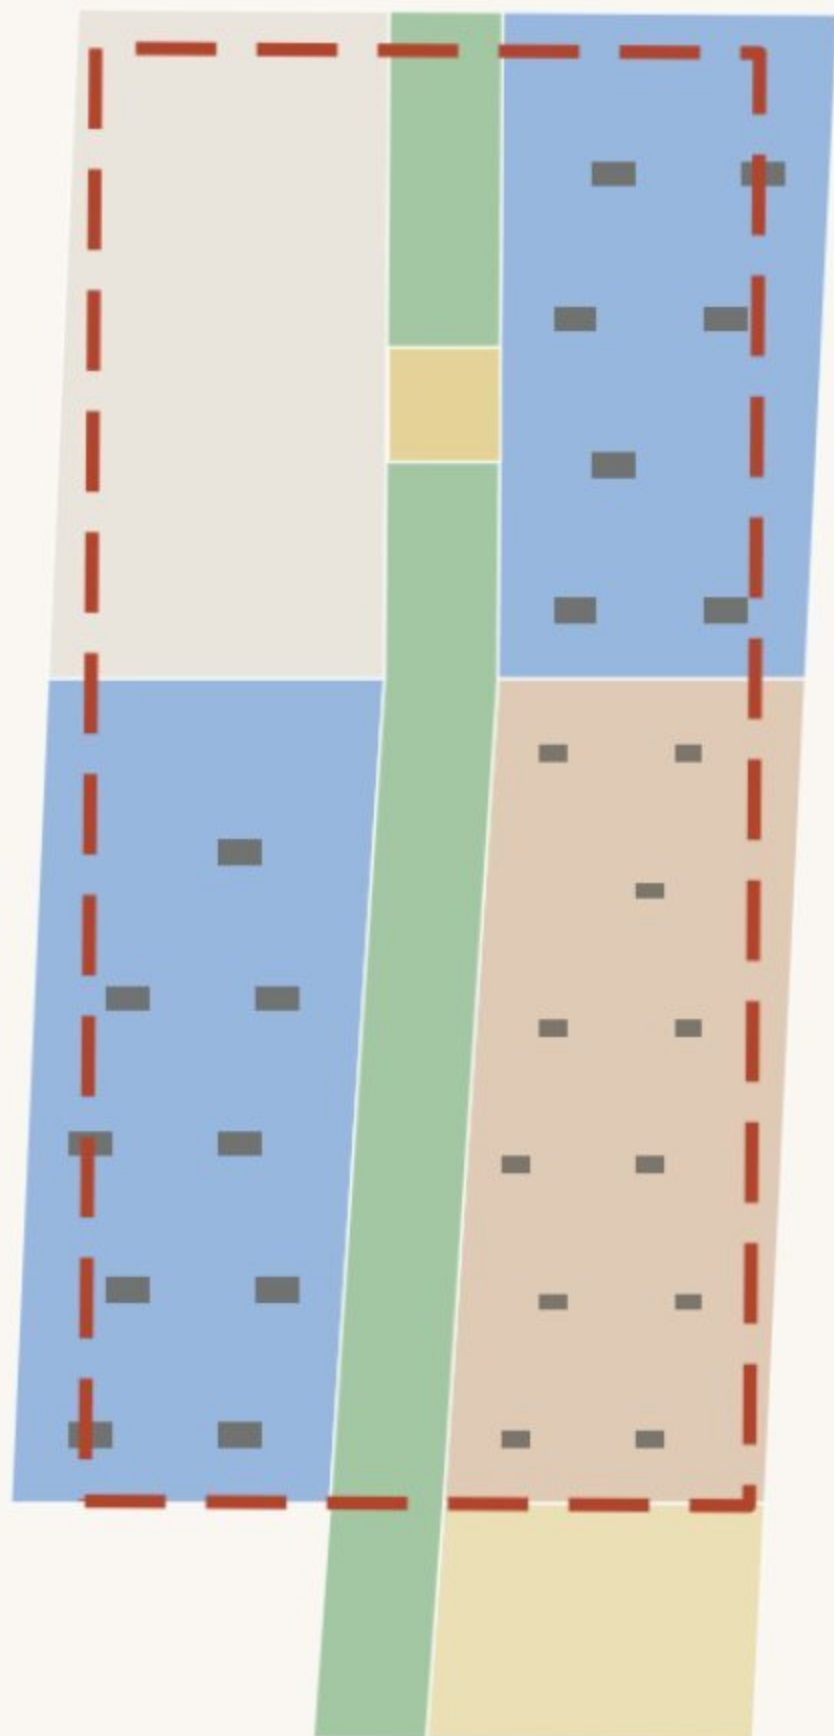

Four AI pilgrimage landmarks & the cultural narrative

K5 Origin Stone: dynamic honor wall of open-source contributors, switchback wall on its back; Ren Tower: global AI milestone gallery; Bell Museum × AI chimes: bell ceremonies for major releases; Switchback Bridge: licensed code and paper inscriptions. South tells “Bell” , middle “Origin” , north “Summit” ; wayfinding = K-marks + “人” arrows + three-color track lines (rust red / signal green / compute blue); open-licensed typefaces only. All landmarks are conceptual; heritage, green, waterline and traffic-safety constraints prevail — no over-entertainment.

Three key areas • differentiated tasks of three switchback nodes

Zhongzhiyuan AI Acceleration Area

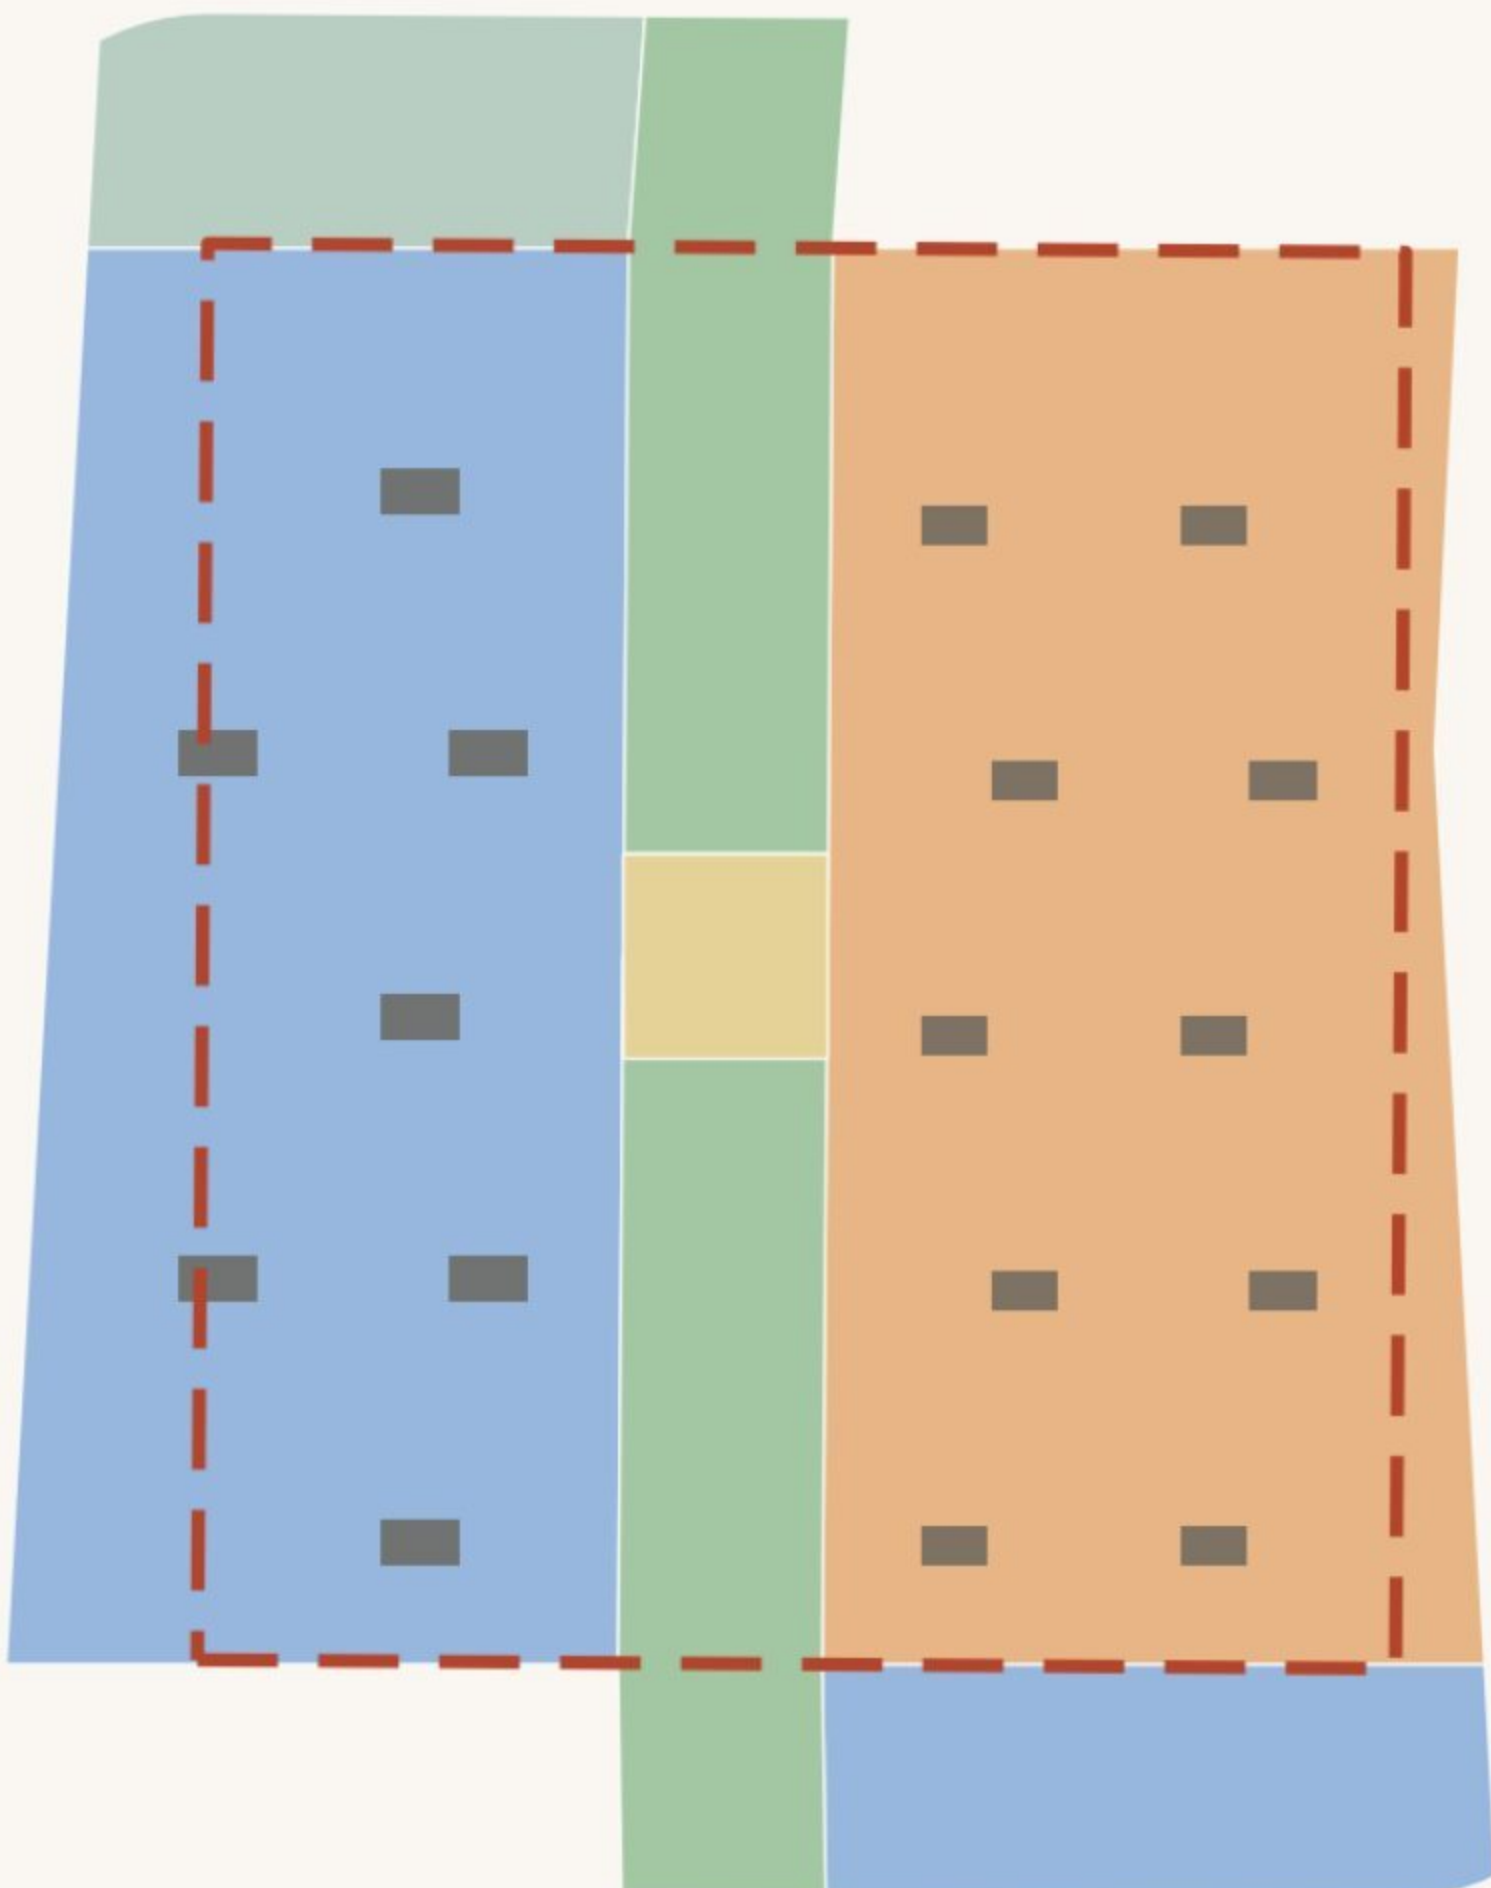

Summit Station • full-stack verification • ~192.1 ha (provisional)

- Position: full-stack verification + governance
- Handles: pilot plants, proving ground, reserve
- Renewal: new-build led • Summit Plaza/Ren Tower
- Risk: land prep & municipal capacity pending

Beijing AI Origin Community

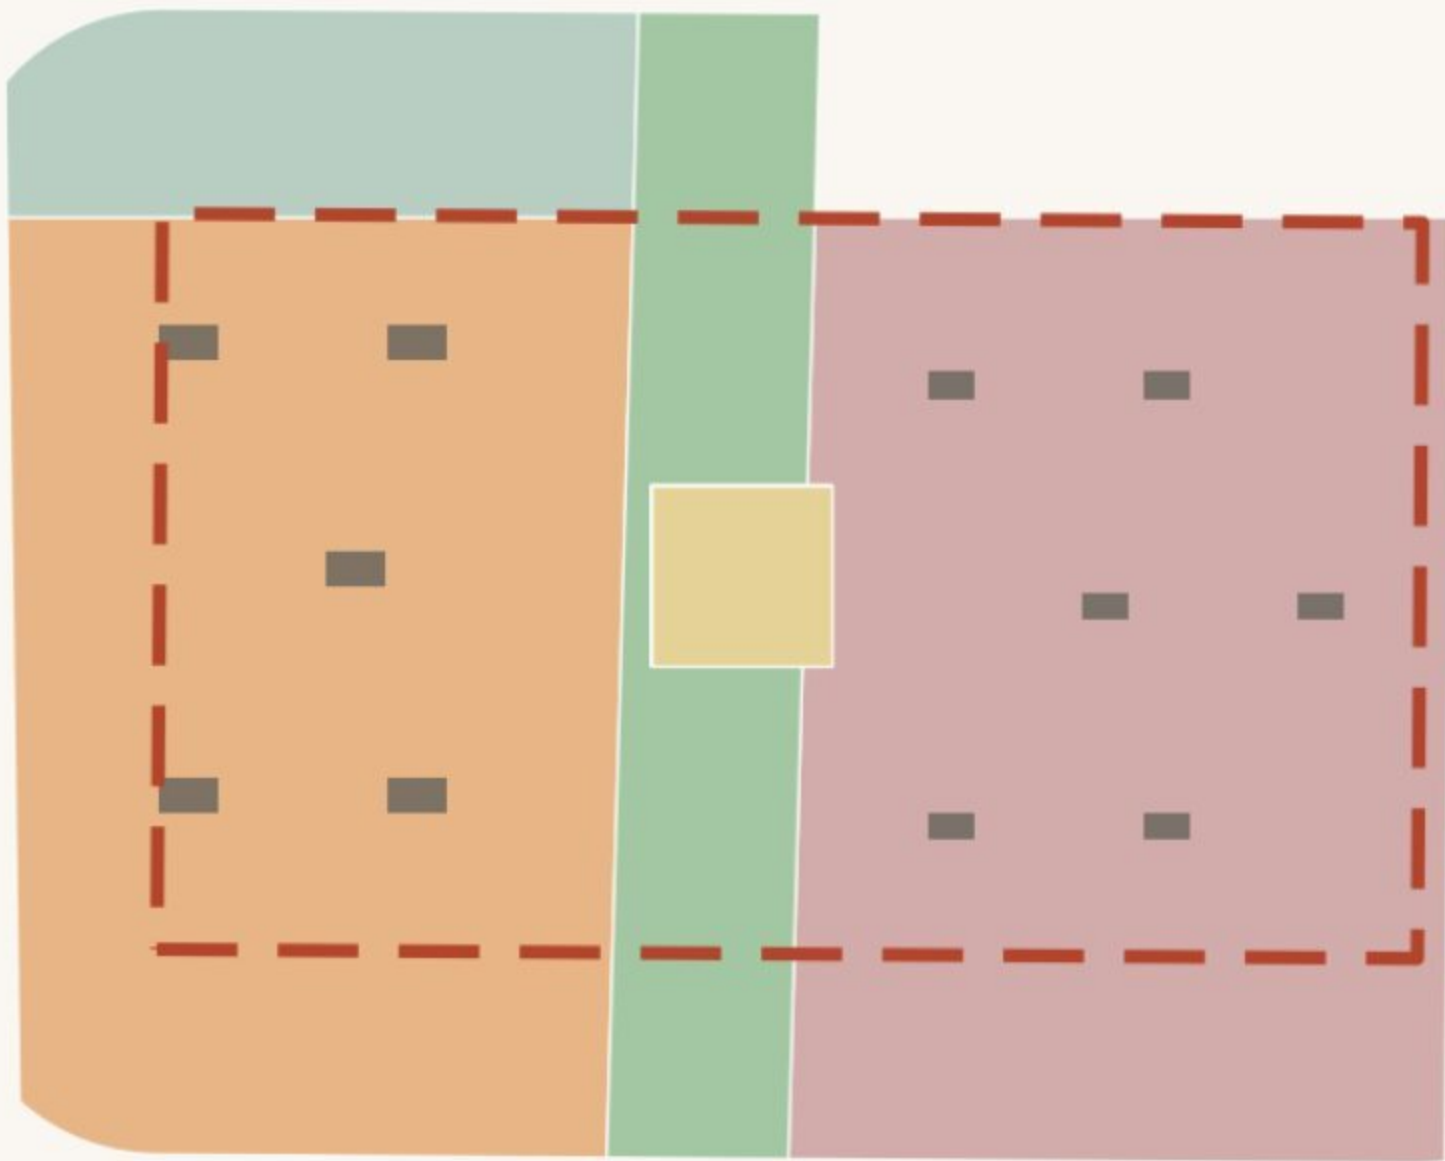

Origin Station (K5) • innovation ecosystem • ~104.3 ha (provisional)

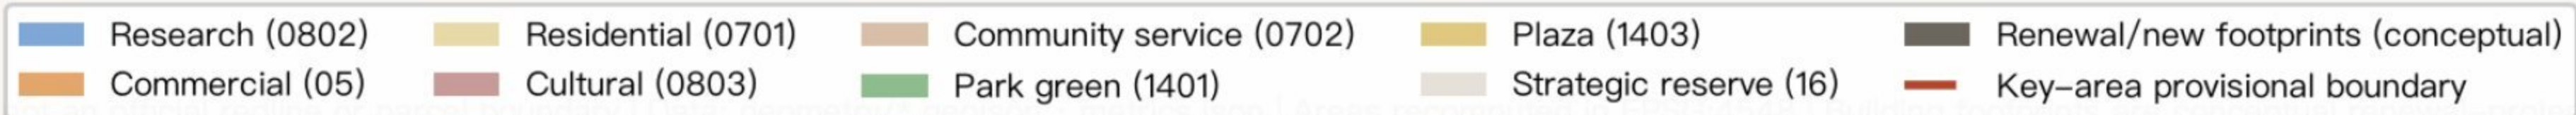

- Position: a model community that lives
- Handles: dev streetfront, K0 Plaza, agent market
- Renewal: building renewal + open interfaces
- Risk: campus co-building & crowd mgmt pending

Dazhongsi AI Industry Cluster

Bell Station • intelligence-native business • ~72.0 ha (provisional)

- Position: intelligence-native retail flagship
- Handles: mall retrofit, Bell Plaza, AI chimes
- Renewal: renovation-led, heritage setbacks
- Risk: conceptual until heritage assessment

Provisional rough boundary for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.

Juesheng Temple gate & frontage works • G3

Dazhongsi ground-floor frontage — ledger baseline

Construction cluster near the north section (toward Zhongzhiyuan)

Summit Station • Zhongzhiyuan (~192.1 ha): full-stack verification + governance dialogue, new-build led, northern strategic reserve. **Origin Station (K5)** • AI Origin Community (~104.3 ha): a model community that lives — building renewal + opened interfaces. Bell Station • Dazhongsi (~72.0 ha): AI-native consumption flagship, stock retrofit + low-intensity heritage setback. All boundaries provisional; parcel-level verdicts await official redlines.

Provisional rough boundaries for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.

T1 • Green-spine shuttle & delivery corridor Test & verify • Greenway service lane K2-K8 Time-shared lane; no facial capture; staffed oversight, human takeover	T2 • Embodied-robot open proving ground Test & verify • Enclosed site, Zhongzhiyuan south Closed-site testing; blurred streams; ethics-board admission	T3 • AI check-up for municipal assets Test & verify • Dazhongsi legacy blocks Asset-status data only; repairs signed by humans	4 • K-mark AR history layer Culture • K0-K9 milestones On-device rendering, no upload; historian-vetted
5 • Developer street frontage Ecosystem • Origin community ground floors Real-name booking, anonymous display; aggregated stats	6 • Multilingual guide & accessibility copilot Public service • Whole-belt greenway & stations On-device speech; explainable routing; human fallback	7 • Elder companion & primary-care assist Livelihood • Beixiaguan renewal area AI pre-screens only; physicians decide; double review	8 • Campus-industry internship matching Academia-industry • Xueyuan Rd open campus belt Students own resumes; explainable matches; humans hire
9 • Night-economy smart governance Governance • Wudaokou consumption district Aggregated footfall/noise only; measures need local consultation	10 • Agent bazaar Ecosystem • Origin Plaza (K5) Listing needs filing & review; human arbitration	11 • Eco-sensing & bird-friendly lighting Ecology • Full green spine Environmental sensing only; expert-reviewed lighting	12 • AI chime co-creation Culture • Dazhongsi heritage zone Museum consent for bell samples; AI credit labeled

Switchback Protocol (schema 0.3.0, two adopters)

Green = normal / yellow = controlled pilot (three-stage gates) / red = switchback: revert to the last stable state with public reasons. Human takeover ≤5 min, non-AI equivalent path within a 15-min walk, appeals acknowledged in 1 working day (design targets, not government commitments); public 90-day reviews choosing one of four outcomes; three-tier switchback archive (near-miss / switchback / retirement). Passing validation ≠ field efficacy; scene evidence currently G0-G2, baselines after Phase-1 pilots.

Fourteen renewal projects • three phases

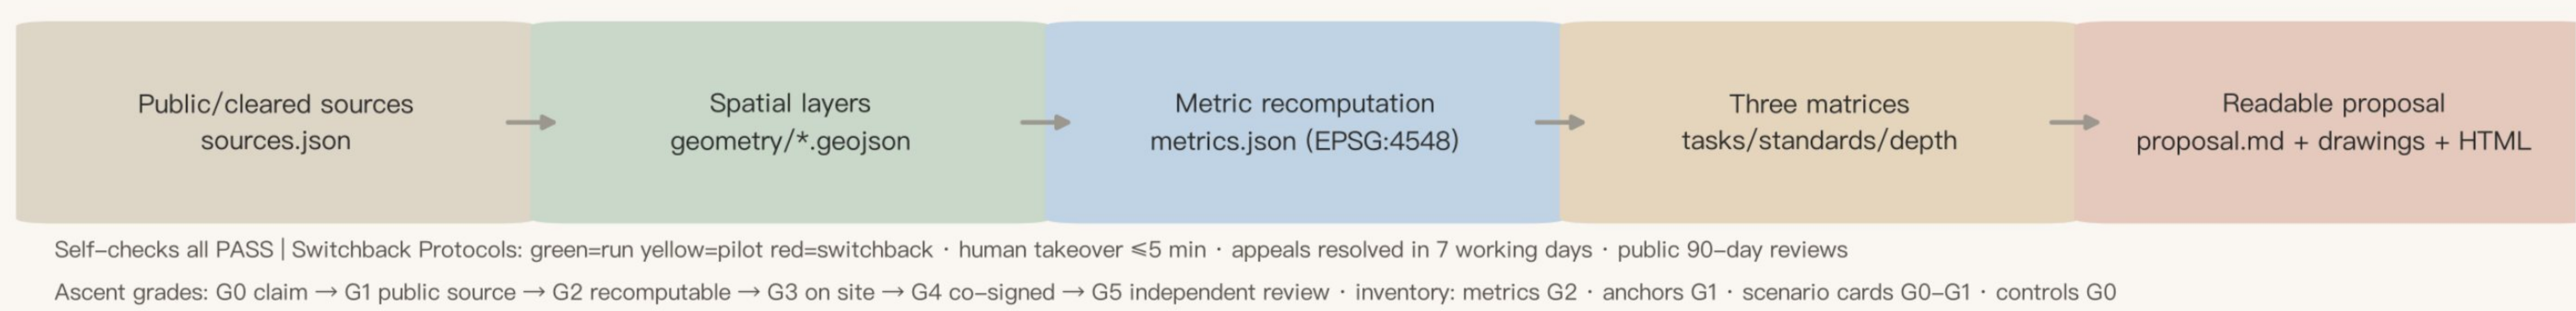

#	Project	Phase
①	AI-native retrofit of Dazhongsi legacy retail	Ph.1 2026-28
②	Bell Plaza & museum interface opening	Ph.1
③	Dazhongsi station TOD stitching street	Ph.1
④	Jiaoda East Rd stitch & under-bridge space	Ph.1
⑤	Southern green-spine completion	Ph.1
⑥	Zhongzhiyuan switchback R&D building	Ph.2 2029

Annual programme

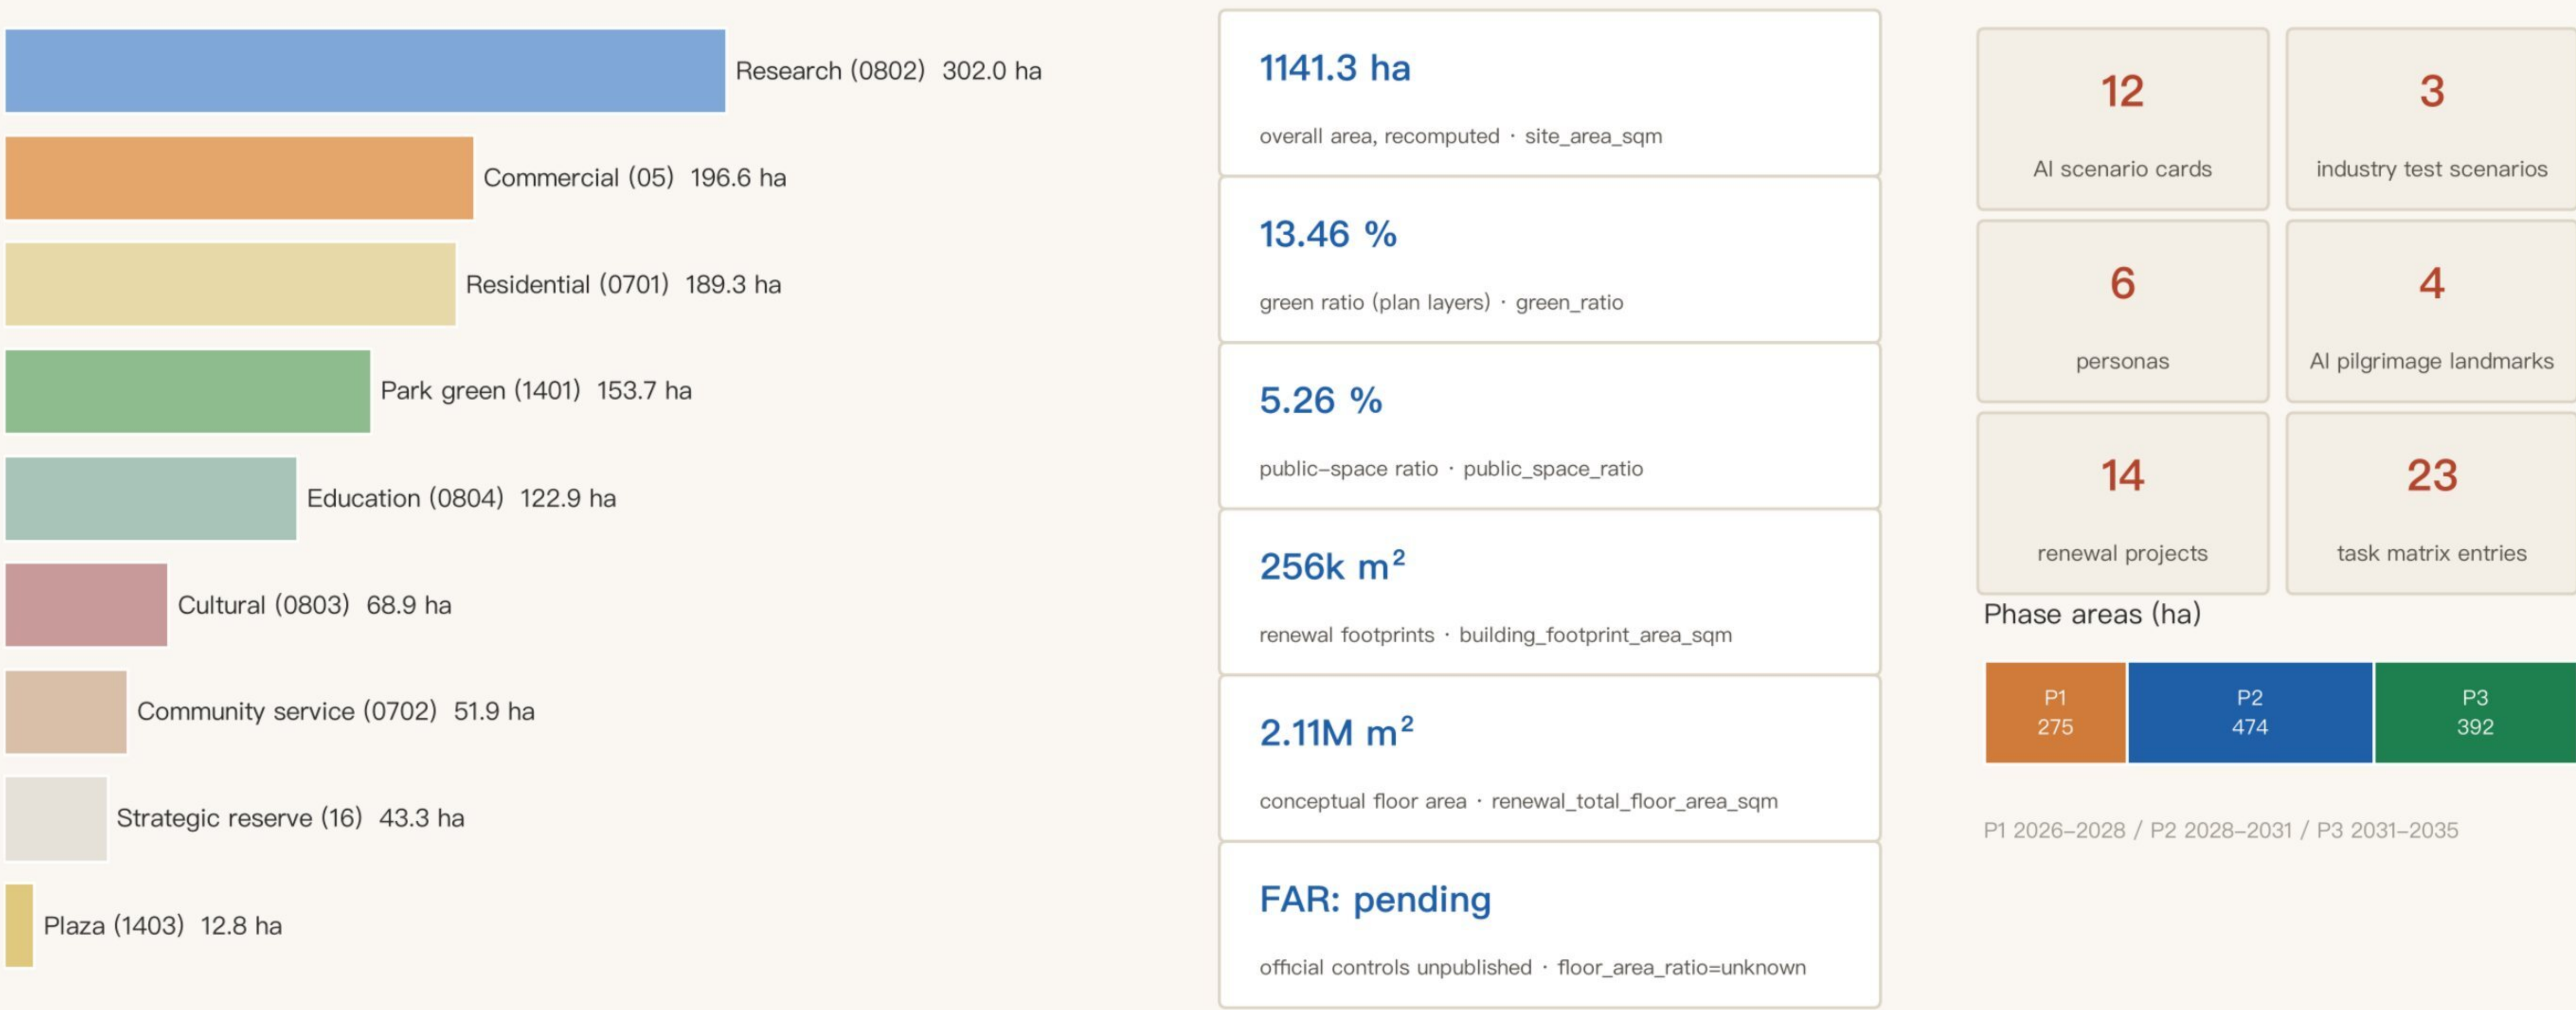

RENLINE Assembly (global AI open-source conference, Summit Plaza) • quarterly Switchback Days (demo days, **K5 Plaza**) • Jing-Zhang AI Marathon (full spine) • Bell Ceremony (major releases, Dazhongsi).

#	Project	Phase
⑧	Wudaokou station-front smart district	Ph.2
⑨	Mid-spine greenway & two pocket parks	Ph.2
⑩	Switchback Bridge over Line 13	Ph.2
⑪	Zhongzhiyuan full-stack innovation zone	Ph.3 2031-35
⑫	Summit Plaza & Ren Tower	Ph.3
⑬	Xueyuan Rd campus-wall opening	Ph.3

Core metrics · evidence chain · Switchback Protocols & ascent grades

Land-use recomputation (overlap-free union, 100% coverage)

Provisional rough boundary for illustration only — not an official redline or parcel boundary | Data: geometry/*.geojson · metrics.json | Areas recomputed in EPSG:4548 | Metric statuses and formulas in metrics.json; unknown metrics claim nothing

All metrics recomputed from GeoJSON in EPSG:4548; all 23 taskbook requirements (announcement 1.3/1.4/1.5 + agent.1-6) covered; 6 standards and 15 design-depth items answered; official controls such as FAR remain unpublished — status = unknown, no claims made. Provisional-precision warnings retained; organizer data gaps do not block content scoring; full recalculation after official redlines.

Provisional rough boundaries for illustration only — not official redlines or parcel lines; areas recomputed in EPSG:4548; the whole package will be recalculated once official geometry is released.
